EXECUTIVE SUMMARY

This report describes statutory requirements for minimum technology at hazardous waste landfills in the United States (U.S.). The U.S. Congress stipulated these minimum technology requirements in the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA). This report also describes the regulatory requirements which the U.S. Environmental Protection Agency (EPA) has developed under its authority in the RCRA. The regulatory requirements include and expand on the statutory requirements. An up-to-date compilation of the regulations is published every six months in the Code of Federal Regulations (CFR).

The U.S. regulations require, at a minimum, two or more bottom liners in series each with a leachate collection system immediately above it. They require a final cover to limit the entry of water into a landfill where the water could come in contact with the wastes to become leachate. The effect is to encapsulate the wastes and thereby minimize the rate of leachate production. What leachate that does occur must be collected and treated before disposal. Leachate collection and treatment is required to continue until the end of the post-closure period or until leachate is no longer detected.

It appears that the reason why the U.S. included minimum technology requirements in its regulations was to expedite prompt mitigation of what was developing into a hazardous waste disposal crisis. A system was needed to enable the disposal of hazardous wastes within a diversity of disposal environments across the country, and the system had to be implemented quickly. The statutory requirements for minimum technology provide a design concept that is easy to understand, and that can, at least ostensibly, be applied in most types of environments. This helps site developers and operators to get on with the job of disposing of hazardous wastes without delay over what kind of design would be acceptable.

Liners, especially flexible membrane liners, ultimately fail, releasing their contained liquids to the environment.

Therefore in the long-term, it is beneficial to the environment to dispose of hazardous wastes in locations that will naturally attenuate or harbour contaminants without damage to human health, enjoyment or natural ecosystems.

Southern Ontario has extensive thick clay deposits where naturally attenuating locations for hazardous waste disposal can be found. The use of double liner and leachate collection systems in Ontario could provide inferior

protection or be redundant to the alternative of selecting naturally attenuating sites. Ontario currently has only two hazardous waste landfills, one in use and one being developed. There are many well qualified engineers and hydrogeologists in Ontario who can select and design disposal sites that take advantage of the ample opportunities offered by the Ontario environment.

1. INTRODUCTION

This report is about technologies for the design of engineered facilities at landfills designated for the disposal of hazardous wastes. These technologies developed rapidly in the 1970's and 1980's, especially in the United States. Now they comprise a specialty field in engineering. The objective of this report is to summarize the current technology as promulgated by the United States Environmental Protection Agency (EPA), and to provide reference material for those who wish to pursue this subject further.

The U.S. Congress, through its statutes, has assigned to the EPA, the overall regulatory role for waste management across the nation. This role includes promulgating regulations and suggested guidelines. In this paper, we first identify the primary statutes and statutory requirements for landfill disposal that affect owners and developers of landfill disposal sites. We then describe the EPA regulations. Finally, we discuss the relevance of the EPA's regulations and associated technology transfer program to landfill disposal in Ontario. Appendix A provides an annotated bibliography of the Technical Resource Documents, and Technical Guidance Documents. The documents suggest engineering designs which, if followed, will be likely to meet the regulatory requirements. Appendix B provides exerpts of the statutory requirements imposed by Congress, and Appendix C provides exerpts of the regulations as promulgated by the EPA for hazardous wastes disposal in landfills. A companion report titled "A Summary of United States Regulatory Activities in Waste Disposal" is available from Technology and Site Assessment Section. This provides a broad summary of the statutes and regulations that pertain to waste disposal in the United States.

2. SUMMARY OF STATUTORY REQUIREMENTS BY CONGRESS

2.1 Statutes

In the United States, the Resource Conservation and Recovery Act of 1976 (RCRA), and the Hazardous and Solid Wastes Amendments Act of 1984 (HSWA) require the EPA to promulgate regulations and suggested technology for the management of solid wastes. The RCRA amended and incorporated the earlier Solid Waste Disposal Act of 1965. For the present study, we referred to the edition of the RCRA which was published on July 8, 1988 (See References). The edition contains all of the HSWA amendments.

In the RCRA, the Administrator of the Act is defined as the Administrator of the EPA. Under the RCRA, the EPA has the mandate to develop a Federal Hazardous Waste Management Program to ensure that hazardous wastes are handled safely from generation to final disposition. As part of this mandate, the EPA is required to develop and promulgate regulations and to develop and publish suggested guidelines for the disposal of solid wastes in landfills. The part of the RCRA that deals with hazardous wastes is called Subtitle C - Hazardous Waste Management. Exerpts from Subtitle C are provided in Appendix B of this report.

2.2 Statutory Requirements for Regulations

The RCRA requires the EPA to establish standards applicable to owners and operators of facilities for the disposal of hazardous wastes as may be necessary to protect human health and the environment. The standards are to address the location, design, construction and operation of such facilities. Owners and operators of new facilities must apply for and receive an RCRA permit before beginning operation of such a facility.

2.3 Statutory Requirements for Minimum Technology

The RCRA imposes certain minimum technological requirements on the design of facilities at landfill disposal sites. Exceptions may be allowed only with the approval of the Regional Administrator of the EPA. Some of the requirements pertain to new landfills. Others pertain to existing landfills to allow existing facilities to continue operations while meeting minimum operational standards. This report addresses the technology for new landfills. The technological requirements for new landfills are provided in detail in Appendix B. A brief description of them follows here.

The RCRA requires the Administrator of the EPA to promulgate regulations, and to revise them from time to time to take into account improvements in technology. The regulations are to require at new landfills, at a minimum:

- the installation of two or more liners and a leachate collection system above and between the liners, and
- ii) groundwater monitoring.

The Administrator may allow exceptions if he finds that alternative design and operating practices, together with location characteristics will prevent the migration of any hazardous constituents into the groundwater or surface water at least as effectively as such liners and leachate collection systems. In addition, the double liner requirements may be waived by the Administrator for monofills, which are landfills that contain a single kind of material only, provided that specified conditions are met. Included among these cenditions are that the monofill has at least one liner and is located more than one quarter mile from an underground source of drinking water.

The RCRA further requires the Administrator to promulgate standards requiring that new landfills utilize approved leak detection systems. These are to be capable of detecting leaks of hazardous constituents at the earliest practicable time in the opinion of the Administrator.

Until such time as the Administrator has promulgated these regulations or guidance documents, the requirement for the installation of two or more liners may be satisfied by the installation of a top liner so as to prevent the migration of any constituent into it through to the end of the post-closure monitoring period, and a lower liner so as to prevent the migration of any constituent through it during the same period. The lower liner shall be deemed to satisfy its requirement if it is composed of a layer at least three feet thick of clay or other natural material with a permeability no greater than 1 x 10exp-7 centimeter per second.

The regulations are also to specify criteria for the acceptable location of new and existing landfill disposal facilities as necessary to protect human health and the environment. The Administrator is required to publish guidance criteria identifying areas of vulnerable hydrogeology.

The RCRA requires that the groundwater monitoring standards promulgated by the EPA shall apply whether or not:

i) the landfill is located above the seasonal high water table;

- ii) two liners and a leachate collection system have been installed at the landfill; or
- iii) the owner or operator inspects the liner (or liners) which has been installed at the facility.

The Administrator may exempt from groundwater monitoring requirements landfill facilities which do not contain liquid waste, exclude precipitation, utilize multiple leak detection systems within the outer layer of containment, and provide for continuing operation and maintenance of these leak detection systems through the period required for post-closure monitoring, and from which, in the Administrator's opinion, hazardous constituents will not migrate beyond the outer layer of containment prior to end of the period for post-closure monitoring.

3. REGULATIONS PROMULGATED BY EPA

The EPA develops and promulgates regulations as directed by the RCRA. The EPA may develop new regulations and revise existing ones at any time. These are published in the Federal Register which is issued daily. An up-to-date compilation of all of the regulations is published every six months in the Code of Federal Regulations (CFR). Title 40 of the Code, Part 264 includes regulations pertaining to the design of landfills. See Appendix C of this report for details. A summary of the regulations pertaining to the design of landfills follows.

A major concern in the design of landfills is containment: landfills should not allow contaminants to escape and pollute the environment. Yet it is recognized that landfill containment structures will ultimately leak given enough time. Therefore, it is important to have a clear definition of what the term "life" of a landfill means. The regulations define the life of a landfill as being comprised of the following components:

- i) an active period during which wastes are periodically received,
- ii) a closure period of 180 days; and
- iii) a post-closure period of 30 years.

The Regional Administrator may shorten or extend components ii) and iii) provided that protection of human health and the environment is the paramount consideration.

The design and operating requirements set forth in the regulations specify that new landfills must have two or more liners and a leachate collection system above and between the liners. The top liner must prevent the migration of any constituent into it until the end of the post-closure period, while the lower liner must prevent the migration of any constituent through it for the same period. The lower liner will be accepted as meeting the requirements if it is constructed of at least a three-foot thick layer of recompacted clay or other natural material with a permeability of no more than 1 x 10exp-7 centimeter per second.

The regulations authorize the Administrator to permit alternative designs if they will perform so as to prevent the migration of any hazardous constituent into the groundwater or surface water at least as effectively as such liners and leachate collection systems. In addition, certain monofils may be exempted under specified conditions.

In addition to the liner system requirements, the regulations require a run-on control system to prevent flow onto the active portion of the landfill during peak discharge from at least a 25-year storm, and a run-off management system to collect and control at least the water volume resulting from a 24-hour, 25-year storm. Collection and holding facilities must be managed to maintain design capacity after storms.

Cover material must be applied as necessary to control wind dispersal from the landfill.

The Regional Administrator must specify in the permit all design and operating practices that are necessary to ensure the fulfilment of the requirements for landfills specified in the Code of Regulations.

During installation liners and cover systems must be inspected for uniformity, damage and imperfections, as specified by the regulations.

The exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks must be recorded.

At final closure, a landfill must have a final cover to provide long-term minimization of migration of liquids through the closed landfill. The cover is to have a permeability less than or equal to the permeability of any bottom liner system or natural subsoils present.

After closure, a series of specified post-closure requirements must be met, including maintenance and monitoring throughout the post-closure care period. As part of the post-closure care, the leachate collection and removal system must be operated until leachate is no longer detected.

4. APPLYING U.S. EPA DESIGN REGULATIONS IN ONTARIO

For the landfill disposal of hazardous wastes, the U.S. regulations require, at a minimum, the protection provided by two or more bottom liners in series each with a leachate collection system immediately above it. In addition, they require a final cover to limit the entry of water into a landfill where the water could come in contact with the wastes to become leachate. The effect is to encapsulate the wastes and thereby minimize the rate of leachate production. What leachate that does occur must be collected and treated before disposal. Leachate collection and treatment is required to continue until the end of the post-closure period or until leachate is no longer detected.

Why was it deemed necessary to incorporate minimum design requirements into legislation in the U.S? Based on our study and discussions with others in this field, it appears that in the U.S. there were too many contaminating sites recently identified, and too many new and safer landfills urgently needed, for the number of qualified engineers and hydrogeologists available to address these problems on a case-by-case basis. Moreover, the diverse range of hydrogeologic environments in the U.S. means that environmental vulnerabilities and associated design requirements at potential landfill sites vary appreciably from one location to another. Therefore, a simple design for all environments was needed to allow less than fully qualified people to get on with the construction of the needed safer landfills immediately. We believe that this was probably the reason, or one of the reasons, why the U.S. adopted a statutory policy of requiring "Minimum Technological Requirements" which are based largely on the use of synthetic membrane liners at its landfill disposal facilities.

In contrast with the U.S. situation, Ontario's present needs for hazardous waste landfill sites appear to be less critical. Therefore, Ontario has enough qualified engineers and hydrogeologists to design sites individually, giving specific consideration to the waste and the environment at each site.

Smith (1984) says that, according to a NATO study group, most landfill disposal units will eventually leak to some extent after closure however well they are designed. Nevertheless, Smith continues, while containment with associated hydraulic barriers may not provide a permanent solution, it can often provide a solution that is likely to remain effective for a considerable period of time. During the "breathing space" thus provided, the hazard presented by the contaminants may be reduced by natural processes, and new forms of permanent treatment may be developed.

Flexible membrane liners must ultimately breakdown by decomposition. When this happens, the containment capability of the liner will fail, although it may already have failed if there were construction imperfections during installation. Though exact time limits have not yet been determined, many toxic wastes can be expected to continue to pose a hazard to sensitive environments long after a flexible membrane liner has decomposed. Therefore, the encapsulation of hazardous wastes using flexible membrane liners may be considered a temporary measure, amounting to storage, not disposal. Therefore, it is important to choose sites for landfills recognizing that leachate from the wastes will ultimately be released to the environment.

Unlike much of the U.S., the Ontario environment offers opportunity to dispose of wastes in thick clay deposits. The clay deposits can limit the movement of landfill leachate through them to a slow rate because of their low permeability. They can also attentuate the transport of contaminants borne by leachate, because their fine grained particles present an enormous surface area for chemical bonding.

Naturally attentuating sites protect the environment longer than engineered facilities involving liners at sites in sensitive environments. Therefore the U.S. requirement for flexible membrane liners if applied in Ontario, may ultimately provide no additional protection for the environment and human safety at disposal facilities for hazardous wastes.

In conclusion, the thick clay deposits in southern Ontario appear to offer an opportunity for the disposal of hazardous wastes in naturally attenuating environments. Therefore the need for Ontario to adopt the universal approach followed by the U.S. EPA for the landfilling of hazardous wastes is questionable and Ontario prefers to consider each application on a case by case, site specific basis.

ANNOTATED BIBLIOGRAPHY OF EPA
TECHNICAL DOCUMENTS ON DESIGN
OF

ENGINEERED LANDFILL DISPOSAL
FACILITIES

APPENDIX A

ANNOTATED BIBLIOGRAPHY OF EPA TECHNICAL DOCUMENTS ON DESIGN OF ENGINEERED LANDFILL DISPOSAL FACILITIES

The U.S. EPA has prepared two types of documents: draft RCRA Technical Guidance Documents (TGD) by the Office of Solid Waste (OSW), and Technical Resource Documents (TRD) by the Office of Research and Development (ORD). These documents are to assist permit officials responsible for hazardous waste landfills, as well as other waste facilities, and to assist the regulated community. The TGD's present design and operating specifications which the EPA believes comply with the requirements of Title 40 of the Code of Federal Regulations, Part 264 (40 CFR 264), for the Design and Operating Requirements and the Closure and Post-Closure Requirements contained in these regulations. The TRD's support the TGD's in the areas of liners, leachate management, closure, covers, and water balance, by describing current technologies and methods for evaluating the performance of the applicant's design. The information in these documents does not represent requirements, but rather suggestions which, if followed, will be likely to meet the requirements of the regulations.

A list of Technical Resource and Technical Guidance Documents follows, together with a brief outline of their contents. The SW numbers in some of the titles correspond to numbers placed on the respective documents by EPA. The numbers at the end of each document description are to provide ordering information. Source information is provided at the end of this Appendix.

1) <u>Guide to the Disposal of Chemically Stabilized and</u> Solidified Wastes (SW-872)

The purpose of this TRD is to provide guidance in the use of chemical stabilization/solidification techniques for limiting hazards posed by toxic wastes in the environment, and to assist in the evaluation of permit applications related to this disposal technology. The document addresses the treatment of hazardous waste for disposal or long term storage, and it surveys the current state and effectiveness of waste treatment technology. A summary of the major physical and chemical properties of treated wastes is presented. A listing of major suppliers of stabilization and solidification technology is included, together with a summary of each process.

*055-000-00226-6

2) Lining of Waste Impoundment and Disposal Facilities (SW-870)

This document provides information on performance, selection, and installation of specific liners and cover materials for specific disposal situations, based upon the current state-of-the-art of liner technology and other pertinent technologies. It contains descriptions of wastes and their effects on linings, a full description of various natural and artificial liners, service life and failure mechanisms; installation problems and requirements of liner types, costs of liners and installation, and tests that are necessary for pre-installation and monitoring surveys. A revised version was to be available in late 1986.

^{*055-000-00231-2}

3) Soil Properties, Classification and Hydraulic Conductivity Testing

This report is a compilation of available laboratory and field testing methods for the measurement of hydraulic conductivity (permeability) of soils.

Background information on soil classification, soil water, and soil compaction are included along with descriptions of sixteen methods for determination of saturated or unsaturated hydraulic conductivity. This TRD (SW-925) was published by OSW in March, 1984, for public comment. It is being revised to incorporate public comments that were received. A draft copy of this document has been sent to ORD where it has been stalled, awaiting clearance.

4) Design, Construction, Maintenance, and Evaluation of Clay Liners for Hazardous Waste Facilities

This 600 page TRD summarizes the state-of-the-art for clay liners as of August, 1985. It was issued for public comment in December, 1986, is currently being revised, and will be reissued for inspection at EPA libraries in Cincinnati, Washington D.C., Research Triangle Park, and in all ten Regional Offices. The draft TRD may be purchased, on paper or microfiche, through NTIS as PB 86-184496/AS.

5) Evaluating Cover Systems for Solid and Hazardous Waste (SW 867)

A critical part of the sequence of designing, constructing, and maintaining an effective cover over solid and hazardous waste sites is the evaluation of engineering plans. This TRD presents a procedure for evaluating closure covers on solid and hazardous wastes sites. All aspects of covers are addressed in detail to allow for a complete evaluation of the entire cover system. There are eleven sequential procedures identified for evaluating engineering plans.

The document describes current technology for landfill covers in three broad areas: data examination, evaluation steps and post-closure plan. The data examination discusses test data review procedure, topographical data review and climatological data review procedures. The evaluation steps include cover composition, thickness, placement, configuration, drainage and vegetation. The post-closure aspects include maintenance and contingency plan evaluation procedures. There are 36 specific steps, regarding the preceding factors, which are recommended to be followed in evaluating a permit for a cover for hazardous waste.

*055-000-00228-2

6) Hydrologic Evaluation of Landfill Performance (HELP) Model

The HELP Model is a modification of the original waste disposal site hydrologic model entitled, "Hydrologic Simulation on Solid Waste Disposal Sites." This update has incorporated the two-dimensional aspects of landfill cover systems, as well as the addition of the leachate collection system. OSW published this TRD (SW-84-009 and SW-84-010) for public comment in two volumes. These two volumes are available from NTIS (†PB-85-100-840 and †PB-85-100-832, respectively) and include the user's guide for Version 1 and documentation and description of the program. The HELP Model

(Version 1) is also available for the IBM PC/XT or compatible computers. Version 2 of the HELP Model is being developed to incorporate public comments and results from verification studies and was to be published in late 1987.

7) Landfill and Surface Impoundment Performance Evaluation (SW-869)

The evaluation of leachate collection systems using compacted clay or synthetic liners to determine how much leachate will be collected and how much will seep through the liner into underlying soils is presented. The adequacy of sand and gravel drain layers, slope, and pipe spacing is also covered. The author has allowed for the widely varied technical backgrounds of his intended audience by presenting, in full, the rigorous mathematics involved in reaching his final equations.

*055-000-00233-9

8) Solid Waste Leaching Procedures Manual

This is a report on laboratory batch procedures for extracting or leaching a sample of solid waste so that the composition of the lab leachate is similar to the composition of leachate from waste under field conditions. This TRD (SW-924) was originally published by OSW in March, 1984, for public comment and has subsequently been revised with their incorporation. At present, the draft document is completed and awaits clearance by ORD.

9) Management of Hazardous Waste Leachate (SW-871)

This document has been prepared to provide guidance for permit officials and disposal site operators on available management options for controlling, treating, and disposing of hazardous waste leachates. It discusses considerations necessary to develop sound management plans for leachate generated at surface impoundments and landfills. Management may take the form of leachate collection and treatment, or pretreatment of the wastes.

*055-000-00224-0

10) Batch-Type Absorption Procedures for Estimating Soil Attenuation of Chemicals

This TRD summarizes laboratory batch procedures for assessing the capacity of soils to attenuate chemical constituents from solutions such as leachates. It explains the scientific basis and rationale for these procedures and the use of data in designing soil liners for pollutant retention.

It was to be issued for public comment in May, 1987. Copies will be available for inspection at EPA Libraries in Cincinnati, Washington D.C., Research Triangle Park, and in all ten Regional Offices. It may also be purchased, on paper or microfiche, from the NTIS as PB 87-146155.

APPENDIX B

EXCERPTS FROM RCRA ON

HAZARDOUS WASTE DISPOSAL

B. EXCERPTS FROM RCRA ON HAZARDOUS WASTE DISPOSAL

Appendix B provides excerpts from the Resource Conservation and Recovery Act of 1976 (RCRA) pertaining to the disposal of hazardous wastes in landfills. The purpose of Appendix B is to show the wording of the pertinent sections of this statute governing how the U.S. Environmental Protection Agency (EPA) is to regulate the disposal of hazardous wastes in landfills. Included here are the title page, list of contents, Subtitle A - General Provisions, Sections 1001, 1002, 1003 and 1004; and Subtitle C - Hazardous Waste Management, all Sections.

BNVIRONMENTAL STATUTES

(5) to take any action authorized by such Act with respect to a respect of an amployment accident which is fatal to one or more employees or which results in hespitalization of five or more amployees, and take any action pursuant to such investigation authorized by such Act, and

on to use any action nationary by such retaining provise shall not apply to any person who is engaged in a ferminal under such Act: Provided further, That the Gregoling provise shall not apply to any person who is engaged in a ferminal operation which does not maintain a temporary labor camp and employs ten or fewer employees: Provided further. "CONGRESSIONAL PINDINGS

"Bee, 1982, (a) SOLID MASTE.—The Congress finds with respect to solid seaton.

"(1) that the confinants technological progress and improvement in methods of manufacture, packaging, and merkating of occarumer products has resulted in an

ever-mounting increase, and in a change in the characteristics, of the mass material discussed by the parchase or lead potential or and the line according and the population growth of our Nation, and the improvements in the sectional end population growth of our population, have required impressed instituting production to meet our needs, and have made necessary the demolition of old buildings, the construction of new buildings, and other versions of transportation, which together with related industry, and other versions of transportations, which together with related industry.

early discrated, and nation market market may be application in argunding matropolities and other technicals his presented these communities with serious financial, mensions that presented these communities with serious financial, mensions that presented the problem in the deposal of sold waster resulting from the industrial, commercial, domaille, and other extensions on its and market was a cellutile earlied on it such areas;

"Nel that while the collection and disposal of solid westes should continue to be primarily the function of State, regional, and local agendar, the problems of water disposal as set forth above have become a matter national in scope and in concern and necessitate Pederal action through financial and technical assistance and leadership in the devalopment, demonstration, and application of new and Improved mathods and processes to reduce the amount of waste and unsalvegeable materials and to provide for proper and economicst solld waste disposal practices. "(b) ENVIRONMENT AND HEALTH.-The Congress finds with respect to the ronment and health, that-

"(1) although land is too valuable a national resource to be needleastly polluted by discreted materials, most solid waste is disposed of on land in open domps and sentlary lendfilling selections where it is disposed of on the land without "(1) disposal of nolid weste and heserobus weste in or on the land without

careful planning and management can present a danger to human health and the

"(1) as a result of the Clean Air Act, the Water Pollution Control Act, and other Foderal and State laws respecting public health and the environment, greater amounts of mald weste for the form of sludge and other pollution treatments of many season and environmentally use the state of the deposal or use of solid water have created greater amounts of air the deposal or use of solid water have created greater amounts of size the survivoirent and for

"(4) open dumping is particularly harmful to health, conteminates drinking heelth:

water from woderground and sertice supplies, and pollutes the air and the land;
"It like pleasament of inchequate controls on hazardous water management will result in spoaterated risks to human health and the environment
"It ill hazardous water management is introperly specificated in the first infairance, corrective solder is likely to be appeared; complex, and times

"(7) certain desse of land disposal facilities are not capable of searcing long-term containment of exertain hazardose wastes, and to search debatantial risk to human habith end the environment, release on land disposal should be minimized or eliminated, and land disposel, perticularly landfill and surface impoundment, should be the least favored method for managing hezardous wastes; "(d) alternatives to extating methods of land disposal must be developed where many of the either in the United States will be turning out of suitable solid waste disposal after within five years unless immediate settion is taken.

RESOURCE CONSERVATION AND RECOVERY ACT

- (c) MATERIALS.—The Congress finds with respect to materials, that—
 (vi) millions of tons of recoverable material which could be used are needesty buried such year;
 (vi) mathods are available to separate usable materials from soild waste;
- "(2) the recovery and conservation of such materials can reduce the dependence of the United States on foreign resources and reduce the deficit in its beliance of payments.
- (d) ENERGY.—The Congress finds with respect to energy, that—
 (1) solid waste represents a potential source of solid fuel, oil, or gas that
- "(3) the need state to develop alternative energy sources for public and private community in crose to reduce our dependence on such sources as patroleum products, natural gas, nuclear and hydroeleutic generation; and "(3) technology sates to produce smalle energy from solid waste. can be converted into energy;

CONORESSIONAL FINDINGS USED OIL RECYCLING

- The Congress finds and declares that-
- (i) used oil is a valuable source of increasingly source energy and materials;
 (2) technology axists to re-refine, reprocess, recisin, and otherwise recycle used
- (3) used oil constitutes a threat to public health end the environment when reused or disposed of improperty and that, therefore, it is in the national interest to recycle used oils in a manner which does not constitute a threat to public health and the environment and which conserve energy and materials. i

"OBJECTIVES AND NATIONAL POLICY

HAZARDOUS WASTES DISPOSAL

C. EXCERPTS FROM 40CFR ON HAZARDOUS WASTE DISPOSAL

Appendix C provides excerpts from the Code of Federal Regulations, Title 40 - Protection of Environment (40CFR) pertaining to the disposal of hazardous wastes in landfills. The purpose of Appendix C is to show the wording of the pertinent sections promulgated by the U.S. Environmental Protection Agency (EPA) and which regulate the disposal of hazardous wastes in landfills. Included here are Part 261.32 showing a table identifying hazardous wastes, and Part 264 Sections:

- A General,
- D Contingency Plan and Emergency Procedures,
- F Releases from Solid Waste Management Units,
- G Closure and Post-Closure,
- H Financial Closure, and
- N Landfills.

ENVIRONMENTAL PROTECTION AGENCY REGULATIONS FOR IDENTIFYING HAZARDOUS WASTE

(40 CFR 261; 45 FR 33119, May 19, 1980, Effective November 19, 1980; Amended as shown in Code of Federal Regulations, Volume 40, Revised as of July 1, 1986; Amended by 51 FR 25470, July 14, 1986; 51 FR 25701, July 16, 1986; 51 FR 25891, July 17, 1986; Corrected by 51 FR 27038, July 29, 1986; Corrected and amended by 51 FR 28297, August 6, 1986; Amended by 51 FR 28682, August 8, 1986; 51 FR 29219, 29222, August 15, 1986; 51 FR 32460, September 12, 1986; Corrected by 51 FR 33612, September 22, 1986; 51 FR 37021, October 17, 1986; 51 FR 37725, 37728, October 24, 1986; 51 FR 40636, November 7, 1986; 51 FR 41308, 41310, 41313, 41327, November 14, 1986; 51 FR 41483, 41486, 41489, 41498, November 17, 1986; 52 FR 2522, January 23, 1987; 52 FR 11821, April 13, 1987; 52 FR 17043, May 8, 1987; 52 FR 23136, June 5, 1987; Corrected by 52 FR 26012, July 10, 1987; Amended by 52 FR 28698, August 3, 1987; 52 FR 29848, 29850, August 12, 1987; 52 FR 4850, February 18, 1988; 53 FR 7913, March 11, 1988; Corrected by 53 FR 13382, April 22, 1988; 53 FR 15170, April 27, 1988; Amended by 53 FR 20117, June 2, 1988)

[Editor's note: New Parts 124, 270, and 271, EPA's permit program regulations, are published in Environment Reporter — Federal Regulations — 1, at 101:0801, and Federal Regulations — 4 at 161:2301 and 161:2351, respectively.]

[Editor's note: EPA January 4, 1985, issued amendments clarifying the agency's jurisdiction over hazardous waste recycling activities (50 FR 661).

EPA said the amendments will become effective July 5, 1985, with the exception of 261.1(b) and 261.2(e). These two sections became effective on December 20, 1984, since the regulatory community did not need any additional time to comply, according to the agency.

Authority: Secs. 1006, 2002(a), 3001 and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921 and 6922).

[Amended by 51 FR 28682, August 8, 1986, 53 FR 13382, April 22, 1988; 53 FR 20117, June 2, 1988]

Subpart A-General

§261.1 Purpose and scope.

(a) This part identifies those solid wastes which are subject to regulation as hazardous wastes under Parts 262 through 265 and Parts 268, 270, 271, and 124 of this chapter and which are sub ject to the notification requirements of section 3010 of RCRA. In this part: [261.1(a) introductory test emended by 40636 November 7, 19861

(1) Subpart A defines the terms "solid waste" and "hazardous waste". identifies those wastes which are excluded from regulation under Parts 262 through 266, 268 and 270 and establishes special management requirements for hazardous waste produced by conditionally exempt small quantity generators and hazardous waste which is recycled.

[261.1(a)(1) revised by 51 FR 10174 March 24, 1986; amended by 51 FR 40636, November 7, 1986]

- (2) Subpart B sets forth the criteria used by EPA to identify characteris-tics of hazardous waste and to list particular hazardous wastes.
- ardous wastes. (b)(1) The definition of solid waste con-

that also are hazardous for purposes of the regulations implementing Subtitle C of RCRA. For example, it does not apply to materials (such as non-hazardous scrap, paper, testiles, or rubber) that are not otherwise hazardous wastes and that are recycled.

- (2) This Part identifies only some of the materials which are solid wastes and hazardous wastes under Sections 3007, 3013, and 7003 of RCRA. A material which is not defined as a solid waste in this Part, or is not a hazardous waste identified or listed in this Part, is still a solid waste and a hazardous waste for purposes of these sections if:
- (i) In the case of Sections 3007 and 3013, EPA has reason to believe that the material may be a solid waste within the meaning of Section 1004(27) of RCRA and a hazardous waste within the meaning of Section 1004(5) of RCRA; or
- (ii) In the case of Section 7003, the statutory elements are established.
- [261.1(b) revised and (c) added by 50 FR 661, January 4, 1985]
- (c) For the purposes of Sections 261.2 and 261.6:
- (1) A "spent material" is any material that has been used and as a result of contamination can no longer serve the purpose for which it was produced without
- (2) "Sludge" has the same meaning used in \$260.10 of this Chapter;
- (3) A "by-product" is a material that is not one of the primary products of a production process and is not solely or separately produced by the production process. Examples are process residues such as slags or distillation column bottoms. The term does not include a co-product that is produced for the general public's use and is ordinarily used in the form it is produced by the process.
- (4) A material is "reclaimed" if it is processed to recover a usable product, or if it is regenerated. Examples ere recovery of lead values from spent batteries and regeneration of spent solvents.

 (5) A material is "used or reused" if it
- is either:
- (i) Employed as an ingredient (includ-(3) Subpart C Identifies characteria- ing use as an intermediate) in an industritics of hazardous waste.

 al process to make e product (for example,

 (4) Subpart D lists particular has distillation bottoms from one process used as feedstock in another process). However, a material will not satisfy this condition if tained in this Part applies only to wastes distinct components of the material are graph (b) of this section, or

recovered as separate end products (as when metals ere recovered from metalcontaining secondary materials); or

- (ii) Employed in a particular function or application as an effective substitute for a commercia! product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).
- (6) "Scrap metal" is bits and pieces of metal parts (e.g.,) bars, turnings, rods, sheets, wire or metal pieces that may be combined together with bolts or soldering (e.g., radiators, scrap automobiles, railroad box cars), which when worn or superfluous can be recycled.
- (7) A material is "recycled" if it is used, reused, or reclaimed.
- (8) A material is "accumulated speculatively" if it is accumulated before being recycled. A material is not accumulated speculatively, however, if the person accumulating it can show that the material is potentially recyclable and has a feasible means of being recycled, and that-during the calendar year (commencing on January 1)-the amount of material that is recycled, or transferred to a different site for recycling, equals at least 75 percent by weight or volume of the amount of that material accumulated at the beginning of the period. In calculating the percentage of turnover, the 75 percent requirement is to be applied to each material of the same type (e.g., slegs from a single smelting process that is recycled in the same way (i.e. from which the same material is recovered or that is used in the same way). Materials accumulating in units that would be exempt from regulation under \$261.4(c) are not to be included in making the calculation. (Materials that are elready defined as solid wastes also are not to be included in making the calculation.) Materials are no longer in this category once they are removed from accumulation for recycling, bowever,

6261,2 Definition of solid waste.

[261.2 revised by 50 FR 661, January 4,

- (a)(1) A solid waste is any discarded material that is not excluded by §261.4(a) or that is not excluded by variance granted under \$\$260.30 and 260.31.
- (2) A discorded material is any material which is.
- (i) Abandoned, as explained in para-

§261.31 Hazardous waste from nonspecific sources.

The following solid wastes are listed hazardous wastes from non-specific sources unless they are excluded under

§§260.20 and 260.22 and listed in Appendix X1.

§261.32 Hazardous waste from specific SOUTCES.

The following solid wastes are listed hazardous wastes from specific sources unless they are excluded under

§§260.20 and 260.22 and listed in Appendix IX.

ENVIRONMENTAL PROTECTION AGENCY REGULATIONS FOR OWNERS AND OPERATORS OF PERMITTED HAZARDOUS WASTE FACILITIES

(40 CFR 264; 45 FR 33221, May 19, 1980, Effective November 19, 1980; Revised as abown in Volume 40, Code of Federal Regulations, July 1, 1985; Amended by 51 FR 16443, May 2, 1986, Effective October 29, 1986; 51 FR 25354, July 11, 1986, Effective September 9, 1986; 51 FR 25470, July 14, 1986; Effective January 12, 1987; 51 FR 40636, November 7, 1986; Corrected by 52 FR 21014, June 4, 1987; Amended by 52 FR 25787, July 8, 1987; 52 FR 25946, July 9, 1987; 52 FR 44320, November 18, 1987; 52 FR 45797, December 1, 1987; 52 FR 46936, December 10, 1987)

[Editor's note: New Parts 124, 270 and 271, EPA's permit program regulations, are published in Environment Reporter -Federal Regulations — 1, at 101:0801 and Federal Regulations — 4 at 161:2301 and 161:2351, respectively.

EPA January 28, 1983 (48 FR 3977) eliminated the March 1, 1983, deadline for generators and treatment, storage, and disposal (TSD) facilities to submit 1982 annual reports. Effective March 1, 1983, EPA will require submission of biennial reports by March 1 of even-numbered years, describing hazardous waste activities during the previous calendar year. Therefore, the next generator and TSD facility report will be due on March 1, 1984, for the 1983 calendar year. Modi-fied forms and instructions reflecting this change in reporting procedures will be published in the near future, the agency

[Editor's note: EPA July 14, 1986, amended these regulations applicable to tank systems that manage hazardous wastes (51 FR 25470). The revised rules are effective January 12, 1987, except for small quantity generators who generate between 100 and 1,000 kg/month of hazardous waste and accumulate in quantities exceeding 6,000 kg or accumulate for more than 180 days (or for more than 270 days if the waste is shipped more than 200 miles). These generators must comply with the revised rules beginning March 24, 1987.]

APPENDIX IX GROUND-WATER MONITORING

Authority: 42 U.S.C. 6905, 6912(a), 6924, and 6925.

[Amended by 50 FR 661, January 4, 1985; 50 FR 1999, January 14, 1985; 50 FR 18374, April 30, 1985; 50 FR 28742, July 15, 1985; 51 FR 16443, May 2, 1986; 51 FR 2470, July 14, 1986; 51 FR 28556, August 8, 1986; 51 FR 40636, November 7, 1986; 52 FR 25946, July 9, 1987; 52 FR 44320, November 18, 1987]

Subpart A-General

§284.1 Purpose, scope and applicability.

(e) The purpose of this Part is to establish minimum national standards which define the acceptable management of hazardous waste.

(b) The standards in this part apply to owners and operators of all facilities which treat, store, or dispose of hazardous waste, except as specifically provided otherwise in this part or Part

261 of this chapter.

(c) The requirements of this part apply to a person disposing of hazardous waste by means of ocean disposal subject to a permit issued under the Marine Protection, Research, and Sanctuaries Act only to the extent they are included in a RCRA permit by rule granted to such a person under Part 270 of this chapter.

[Comment: These Part 264 regulations do apply to the treatment or storage of hazardous waste before it is loaded onto an ocean ressel for incineration or disposal at sea.]

(d) The requirements of this part apply to a person disposing of hazardous waste by means of underground injection subject to a permit issued under an Underground Injection Control (UIC) program approved or promigated under the Safe Drinking Water Act only to the extent they are required by \$144.14 of this chapter.

(Comment: These Part 264 regulations do apply to the above-ground treatment or storage of hazardous waste before it is injected underground.)

(c) The requirements of this part apply to the owner or operator of a POTW which treats, stores, or disposes of hazardous waste only to the extent they are included in a RCRA permit by rule granted to such a person under Part 270 of this chapter.

(f) The requirements of this part do not apply to a person who treats.

stores, or disposes of hazardous waste in a State with a RCRA hazardous waste program authorized under Subpart A of Part 271 of this chapter, or in a State authorized under Subpart B of Part 271 of this chapter for the component or components of Phase II interim authorization which correspond to the person's treatment, storage or disposal processes; except that this part will apply:

(1) As stated in paragraph (d) of this section, if the authorized State RCRA program does not cover disposal of hazardous waste by means of under-

ground injection; and

(2) To a person who treats stores or stores are subspaces of hazardous waste in a State authorized under Subpart A of Part 271 of this chapter, at a facility which was not covered by standards under this part when the State obtained su-horization, and for which EPA promulgates standards under this part fer the State is authorized. This paragraph will only apply until the State is authorized to permit such facilities under Subpart A of Part 271 of this chapter.

(3) To a person who treats, stores, or disposes of hazardous waste in a State which is authorized under Subpart A or B of Part 271 of this chapter if the State has not been authorized to carry out the requirements and prohibitions applicable to the treatment, storage, or disposal of hazardous waste at his facility which are imposed pursuant to the Hazardous and Solid Waste Amendments of 1984. The requirements and prohibitions that are applicable until a State receives authorization to carry them out include all Pederal program requirements identified in § 271.1(2)

[264 I (f)(3) added by 50 FR 28742, July 15, 1985]

(g) The requirements of this part do not apply to:

(1) The owner or operator of a facility permitted, licensed, or registered by a State to manage municipal or industrial solid waste, if the only hazardous waste the facility treats, stores, or disposes of is excluded from regulation under this part by § 281.5 of this chapper.

(2) The owner or operator of a facility managing recyclable materials described in § 261.8(a) (2) and (3) of this chapter (except to the extent that requirements of this part are referred to in Subparts C. D. P. or G of Part 286 of this chapter).

(2) A generator accumulating waste on-site in compliance with § 262.34 of this chapter;

(4) A farmer disposing of waste pesticides from his own use in compliance with § 262.51 of this chapter; or

(5) The owner or operator of a totally enclosed treatment facility, as defined in § 260.10.

(6) The owner or operator of an elementary neutralization unit or a wastewater treatment unit as defined in § 260.10 of this chapter.

(7) [Reserved]

(8Xi) Except as provided in paragraph (gX6XiI) of this section, a person engaged in treatment or containment activities during immediate response to any of the following situations:

(A) A discharge of a hazardous

(B) An imminent and substantial threat of a discharge of hazardouswaste;

(C) A discharge of a material which, when discharged, becomes a hazardous waste.

(ii) An owner or operator of a facility otherwise regulated by this part must comply with all applicable requirements of Subparts C and D.

(III) Any person who is covered by paragraph (gx5xl) of this section and who continues or initiates hazardous was treatment or containment activities after the immediate response is over is subject to all applicable requirements of this part and Parts 122—124 of this chapter for those ectivities.

(9) A transporter storing manifested shipments of hazardous waste in 40 CFR § 282.30 at a transfer facility for a period of len days or less.

The second 264.1(g)(6) was added by 45 FR 66966, December 31, 1980, redesignated as (9) by 46 FR 27476, May 20, 1981]

(10) The addition of absorbent material to waste in a container (as defined in §280.16 of this chapter) or the addition of waste to absorbent material in a container, provided that these actions occur at the time waste is first placed in the container, and §56.17(b), 264.171, and 264.172 are complied with

[264.1(g)(10) added by 47 FR 8306, February 25, 1982]

[Sec. 264.1(g)(10)]

(h) the requirements of this part apply to owners or operators of all facilities which treat, store or dispose of hazardous wastes referred to in Part 268.

[264.1(b) added by 52 FR 21014, June 4, 1987]

§ 264.2 [Reserved]

§ 264.3 Relationship to Interim status standards.

A facility owner or operator who has fully complied with the requirements for interim status — as defined in Section 3005(e) of RCRA and regulations under § 270.70 of this Chapter — must comply with the regulations specified in Part 265 of this Chapter in lieu of the regulations in this Part, until final administrative disposition of his permit application is made.

[Comment: As stated in Section 3005(a) of RCRA, after the effective date of regulations under that Section, i.e., Parts 270 and 124 of this Chapter. The treatment, storage, or disposal of hazardous waste is prohibited except in accordance with a permit. Section 3005(e) of RCRA provides for the continued operation of an existing facility which meets certain condutions until final administrative disposition of the owner's or operator's permit application is made.]

[264.3 and Comment amended by 48 FR 14293, April 1, 1983]

§264.4 Imminent hazard action.

Notwithstanding any other provisions of these regulations, enforcement actions may be brought pursuant to Section 7003 of RCRA.

§§ 264.5 - 264.9 [Reserved]

Subport B-General Facility Standards

§ 264.10 Applicability.

[264.10 revised by 46 FR 2847, January 12, 1981]

(a) The regulations in this Subpart apply to owners and operators of all hazardous waste facilites, except as provided in \$264.1 and in paragraph (b) of this Section.

(b) Section 284.18(b) applies only to facilities subject to regulation under Subparts I through O and Subpart X of this part.

[264.10(b) amended by 52 FR 46963, December 10, 1987]

§ 264.11 Identification number.

Every facility owner or operator must apply to EPA for an EPA identification number in accordance with the EPA notification procedures (45 FR 12746).

(Approved by the Office of Management and Budget under control number 2050-0021)

[264.11 amended by 50 FR 4513, January, 31, 1985]

\$ 264.12 Required notices.

(a) The owner or operator of a facility that has arranged to receive hazardous waste from a foreign source must notify the Regional Administrator in writing at least four weeks in advance of the date the waste is expected to arrive at the facility. Notice of subsequent shipments of the same waste from the same foreign source is not required.

(b) The owner or operator of a facility that receives hazardous waste from an off-site source (except where the owner or operator is also the generator) must inform the generator in writing that he has the appropriate permit(s) for, and will accept, the waste the generator is shipping. The owner or operator must keep a copy of this written notice as part of the operator receiver received.

ating record.

to Before transferring ownership or operation of a facility during its operating life, or of a disposal facility during the post-closure care period, the owner or operator must notify the new owner or operator in writing of the requirements of this part and Part 270 of this chapter.

[264.12 amended by 48 FR 14293, April 1, 1983]

[Comment: An owner's or operator's fallure to notify the new owner or operator of the requirements of this Part in no way relieves the new owner or operator of his obligation to comply with all applicable requiremental.

[Approved by the Office of Management and Budget under control number 2050-0012]

[264.12 amended by 50 FR 4513, January 31, 1985]

§264.13 General waste analysis.

(a) 1] Before an owner or operator treats, stores, or disposes of any hazardous waste, he must obtain a detailed chemical and physical anelysis of a representative sample of the waste. At a minimum, this analysis must contain all the information which must be known to treat, store, or dispose of the waste in accordance with the requirements of this part and Part 268 of this chapter or with the conditions of a permit issued under Part 270 and Part 124 of this chapter.

[264.13(a)(1) amended by 51 FR 40636, November 7, 1986; corrected by 52 FR 21014, June 4, 1987]

(2) The analysis may include data developed under Part 261 of this chapter, and existing published or documented data on the hazardous waste or on hazardous waste generated from similar processes.

(Comment: For example, the facility's records of analyses performed on the waste before the effective date of these regulations of the effective date of these regulations of the effective date of these regulations of the effective date of the effective waste specially of the waste to be managed at the facility, may be included in the data base required to comply with paragraph (ax1) of this section. The owner or operator of an off-site facility may arrange for the generator of the hazardous waste to supply part or all of the information required by paragraph (ax) of the information required to comply with this sections.

- (2) The analysis must be repeated as necessary to ensure that it is accurate and up to date. At a minimum, the analysis must be repeated:
- (i) When the owner or operator le notified, or has reason to believe, that the process or operation generating the hazardous waste has changed; and
- (ii) For off-site facilities, when the results of the inspection required in paragraph (a)(4) of this Section indicate that the hazardous waste received at the facility does not match the waste designated on the accompanying manifest or shipping paper.
- (4) The owner or operator of an offsite facility must inspect and, if necessary, analyze each hazerdous waste movement received at the facility to determine whether it matches the identity of the waste specified on the accompanying manifest or shipping paper. (b) The owner or operator must

(b) The owner or operator must develop and follow a written waste snalysis plan which describes the procedures which he will carry out to

[Sec. 264.13(b)]

108

rt D-Contingancy Plan and **Emergency Precedures**

8 264.50 Applicability.

The regulations in this subpart apply to owners and operators of all zardous waste facilities, except as \$ 264.1 provides otherwise

8 264.51 Purpose and implementation of contingency plan.

(a) Each owner or operator must have a contingency plan for his facility. The contingency plan must be designed to minimize hazards to human health or the environment from fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water.

(b) The provisions of the plan must be carried out immediately whenever there is a fire, explosion, or release of hazardous waste or hazardous waste constituents which could threaten human health or the environment.

Approved by the Office of Manage and Budget under control number 2050-90111

264.52 Content of contingency plan

(a) The contingency plan must describe the actions facility personnel must take to comply with §§ 264.51 and 264.56 in response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility.

(b) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures to to provide emergency plan must be provided to provide the contingency plan must be this chapter, or Pari 1510 of Chapter (Comment: The contingency plan must be this chapter, amergency or continuous to the Regional Administrator to the Regional Administrator and the permit application under plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this part.

(c) The plan must describe arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate # 264.54 Amendment of contingency plan. emergency services, pursuant 1 264.37

(d) The plan must list names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator (see

§ 264.55), and this list must be kept up to date. Where more than one person is listed, one must be named as priemergency coordinator others must be listed in the order in which they will assume responsibility s alternates. For new facilities, this information must be supplied to the Regional Administrator at the time of certification, rather than at the time of permit application.

(e) The plan must include a list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communicaexternal), and decontamination equipment), where this equipment is required. This list must be kept up to date. In addition, the plan must include the location and a physical description of each item on the list, and a brief outline of its capabilities.

(f) The plan must include an evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan must de-acribe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires).

(Approved by the Office of Management and Budget under control number 2050-

264.53 Copies of contingency plan

A copy of the contingency plan and all revisions to the plan must be:
(a) Maintained at the facility; and

(b) Submitted to all local police departments, fire departments, hospitals, and State and local emergency response teams that may be called upon

with Part B of the permit application under Part 270, of this chapter and, after modification or approval, will become a condition of any permit issued.]

(Approved by the Office of Management and Budget under control number 2050-0011)

The contingency plan must be reviewed, and immediately amended, if necessary whenever

- (a) The facility permit is revised;
- (b) The plan fails in an emergency:

(c) The facility changes-in its design, construction, operation, maintenance, or other circumstances way that materially increases the po-tential for fires, explosions, or releases of hazardous waste or hazardous waste constituents, or changes the response necessary in an emergency;

(d) The list of emergency coordinators changes: or

(e) The list of emergency equipment changes.

(Comment: A change in the lists of facility rgency coordinators or equipment in the contingency plan constitutes a minor modi-fication to the facility permit to which the plan is a condition.]

(Approved by the Office of Management and Budget under control number 2050-

264.55 Emergency coordinator.

At all times, there must be at least one employee either on the facility premises or on call (i.e., available to respond to an emergency by reaching the facility within a ahort period of time) with the responsibility for coordinating all emergency response measures. This emergency coordinator must be thoroughly familiar with all aspects of the facility's contingency plan, all operations and activities at the facility, the location and charac-teristics of waste handled, the location of all records within the facility, and the facility layout. In addition, this person must have the authority to commit the resources needed to carry out the contingency plan.

(Comment: The emergency coordinator's re-aponsibilities are more fully spelled out in § 264.56. Applicable responsibilities for the § 206.26. Applicable responsibilities for the emergency coordinator vary, depending on factors such as type and variety of westers) handled by the facility, and type and com-plexity of the facility.

§ 264.56 Emergency procedures.

(a) Whenever there is an imminent or actual emergency situation, the emergency coordinator (or his designee when the emergency coordinator is on call) must immediately:

(1) Activate internal facility alarms or communication systems, where ap-plicable, to notify all facility personnel: and

(2) Notify appropriate State or local agencies with designated roles if their help is needed. designated response

(b) Whenever there is a release, fire, or explosion, the emergency coordina-

[Sec. 264.56(b)]

tor must immediately identify the character, exact source, amount, and areal extent of any released materials. He may do this by observation or review of facility records or manifests, and, if necessary, by chemical analysis.

(c) Concurrently, the emergency co-ordinator must assess possible hazards to human health or the environment that may result from the release, fire, or explosion. This assessment must consider both direct and indirect effects of the release, fire, or explosion (e.g., the effects of any toxic, irritating, or asphyxising gases that are generated, or the effects of any hazardous surface water run-off from water or chemical agents used to control fire and heat-induced explosions.

(d) If the emergency coordinator determines that the facility has had a release, fire, or explosion which could threaten human health, or the environment, outside the facility, he must report his findings as follows:

(1) If his assessment indicates that evacuation of local areas may be advisable, he must immediately notify appropriate local authorities. He must be available to help appropriate officials decide whether local areas should be evacuated; and

(2) He must immediately notify either the government official designated as the on-scene coordinator for that geographical area, (in the applicable regional continuence volan under Part 1810 of this Title) or the National Response Center (using their 24-hour toll free number 800/424-8802). The report must include:

- (i) Name and telephone number of reporter:
- (ii) Name and address of facility;
- (ili) Time and type of incident (e.g., release, fire);
- (iv) Name and quantity of material(a) involved, to the extent known;
- (v) The extent of injuries, if any;
- (vi) The possible hazards to human health, or the environment, outside the facility.
- (e) During an emergency, the emergency coordinator must take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous waste at the facility. These measures must include, where applicable, stopping processes and operations,

collecting and containing release waste, and removing or isolating containers.

(f) If the facility stops operations in response to a fire, explosion, or release, the emergency coordinator must monitor for leaks, pressure buildup, gas generation, or ruptures in values, pipes, or other equipment, wherever this is appropriate.

(a) Immediately after an emergency, the emergency coordinator must provide for treating, storing, or disposing of recovered water, or any other material that results from a release, fire, or explosion at the facility.

(Comment: Unless the owner or operator can demonstrate, in accordance with \$261,3(c) or (d) of this chapter, that the recovered material is not a hazardous waste, the owner or operator becomes a generator of hazardous waste and must manage it in accordance with all applicable requirements of Parts 282, 283, and 284 of this Chapter.]

- (h) The emergency coordinator must ensure that, in the affected area(s) of the facility:
- (1) No waste that may be incompatible with the released material is treated, stored, or disposed of until cleanup procedures are completed; and
- (2) All emergency equipment listed in the contingency plan is cleaned and fit for its intended use before operations are resumed.
- (i) The owner or operator must notify the Regional Administrator, and appropriate State and local authorities, that the facility is in compliance with paragraph (h) of this section before operations are resumed in the affected area(s) of the facility.
- (i) The owner or operator must note in the operating record the time, date, and details of any incident that requires implementing the contingency plan. Within 15 days after the incident, he must submit a written report on the incident to the Regional Administrator. The report must include:
- (1) Name, address, and telephone number of the owner or operator;
- (2) Name, address, and telephone number of the facility;
- (3) Date, time, and type of incident (e.g., fire, explosion);
- (4) Name and quantity of material(s) involved;
- (5) The extent of injuries, if any;(6) An assessment of actual or poten-
- tial hazards to human health or the

environment, where this is applicable;

(7) Estimated quantity and disposition of recovered material that resulted from the incident.

(Approved by the Office of Management and Budget under control number 2050-0012)

Subport E-Monifest System, Recordkooping, and Reporting

\$ 264.70 Applicabittty.

The regulations in this subpart apply to owners and operators of both on-site and off-site facilities, except as 1 264.1 provides otherwise. Sections 264.71, 244.72, and 264.76 do not apply to owners and operators of on-site facilities that do not receive any hazardous waste from off-site sources. Section 264.73(b) only applies to permittees who treat, store, or dispose of hazardous wastes on-site where such wastes were generated.

[264.70 revised by 50 FR 28742, July 15, 1985]

8 264.71 Use of manifest system.

- (a) If a facility receives hazardous waste accompanied by a manifest, the owner or operator, or his agent, must:
- (1) Sign and date each copy of the manifest to certify that the hazardous waste covered by the manifest was received:
- (2) Note any significant discrepancies in the manifest (as defined in § 264.72(a)) on each copy of the manifest:

Comment: The Agency does not intend that the owner or operator of a facility whose procedures under 3 264.38c include whose procedures under 3 264.38c include the foreign of the same of the same of the transporter. Section 264.78(b), however, requires reporting an unreconciled discrepancy discovered during later analysis.

- (3) Immediately give the transporter at least one copy of the signed manifest:
- (4) Within 30 days after the delivery, send a copy of the manifest to the generator; and
- (5) Retain at the facility a copy of each manifest for at least three years from the date of delivery.
- (b) If a facility receives, from a rail or water (bulk shipment) transporter, hazardous waste which is accompanied by a shipping paper containing all the information required on the manifest (excluding the EPA identification

ment and Budget under control number 2050-0012)

§ 264.77 Additional reports.

[264.77 revised by 46 FR 2847, January 12. 19811

In addition to submitting the biennial reports and unmanifested waste reports described in §§ 284.75 and 284.78, the owner or operator must also report to the Regional Administrator: [264.77 introductory text amended by 48 FR 3981, Jenuary 28, 1983]

- (a) Releases, fires, and explosions as specified in § 264.56(j);
- (b) Facility closures specified in \$264 115; and

(Former 264.77(c) amended and redesignated as (b) by 47 FR 32349, July 26. 19821

(c) As otherwise required by Subparts P and K-N.

(The new 264.77(c) added by 47 FR 32349, July 26, 1982, effective January 26, 1983[

§§264.78-264.89 [Reserved]

Subpart F - Releases From Solid Waste Management Units

(Subpart F added by 47 FR 32349, July 26, 1982, effective January 26, 1983; heading revised by 50 FR 28742, July 15, 19851

§264.90 Applicability.

(a)(1) Eacept as provided in paragraph (b) of this section, the regulations in this subpart apply to owners or operators of facilities that treat, store or dispose of hazardous waste. The owner or operator must satisfy the requirements identified in paragraph (a)(2) of this section for all wastes (or constituents thereof) contained in solid waste management units at the facility, regardless of the time at which waste was placed in such units.

(2) All solid waste management units must comply with the requirements in \$264.101. A surface impoundment, waste

pile, and land treatment unit or landfill that receives hazardous waste after July 26, 1982 (hereinafter referred to as a "regulated unit") must comply with the requirements of §§264 91-264.100 in lieu of \$264.101 for purposes of detecting, characterizing and responding to releases to the uppermost aquifer. The financial responsibility requirements of \$254.101 apply to regulated units. [264.90(a) and (b) revised by 50 FR

28742, July 15, 1985] (b) The owner or operator's regulated

- unit or units are not subject to regulation for releases into the uppermost aquifer under this subpart if: (1) The owner or operator is exempted
- under §264.1: or (2) He operates a unit which the Re-
- gional Administrator finds: (i) Is an engineered structure.
- (ii) Does not receive or contain liquid
- waste or waste containing free liquids, (iii) Is designed and operated to exclude
- liquids, precipitation, and other run-on and run-off. (iv) Has both inner and outer layers of
- containment enclosing the waste, (v) Has a leak detection system built into each containment laver.
- (vi) The owner or operator will provide continuing operation and maintenance of these leak detection systems during the active life of the unit and the closure and post-closure care periods, and
- (vii) To a reasonable degree of certainty, will not allow hazardous constituents to migrate beyond the outer containment layer prior to the end of the the post-closure care period
- (3) The Regional Administrator finds. pursuant to \$264.280(d), that the treat-ment zone of a lend treatment unit that qualifies as a regulated unit does not contain levels of hazardous constituents that are above hackground levels of those constituents by an amount that is statistically significant, and if an unsaturated zone monitoring program meeting the requirements of \$264 278 has not shown a statistically significant increase in hazardous constituents below the treatment zone during the operating life of the unit. An exemption under this paragraph can only relieve an owner or operator of responsibility to meet the requirements of this subpart during the post-closure care period; or

- (4) The Regional Administrator finds that there is no potential for migration of liquid from a regulated unit to the uppermost aquifer during the active life of the regulated unit (including the closure period) and the port-closure care period specifiel under §264 117. This demonstration must be certified by a qualified geologist or geotechnical engineer. In order to provide an adequate margin of safety in the prediction of potential migration of liquid. the owner or operator must base any predictions made under this paragraph on assumptions that maximize the rate of liquid migration.
- (5) He designs and operates a pile in compliance with \$264.250(c).
- (c) The regulations under this subpart apply during the active life of the regulated unit (including the closure period). After closure of the regulated unit, the regulations in this subpart:
- (1) Do not apply if all waste, waste residues, contaminated containment system components, and contaminated subsoils are removed or decontaminated at closure:
- (2) Apply during the post-closure care period under § 264.117 if the owner or operator is conducting a detection monitoring program 1 264.98; or
- (3) Apply during the compliance period under § 264.96 if the owner or operator is conducting a compliance monitoring program under § 254.99 or corrective action program under § 264 100
- (d) Regulations in this subpart may apply to miscellaneous units when necessary to comply with §§ 264.801 through 284.803.

[264.90 (d) added by 52 FR 46963, December 10, 19871

\$264.91 Required programs.

- (a) Owners and operators subject to this subpart must conduct a monitoring and response program as follows:
- (1) Whenever hazardous constitu-ents under § 264.93 from a regulated unit are detected at the compliance point under § 264.95, the owner or operator must institute a compliance monitoring program under § 264.29;

117

- (2) Whenever the ground-water protection standard under § 264.92 is exceeded, the owner or operator must institute a corrective action program under § 264.100;
- (3) Whenever hazardous constitu-ents under § 264.93 from a regulated unit exceed concentration limits under \$ 264.94 in ground water between the compliance point under § 284.95 and the downgradient facility property boundary, the owner or operator must institute a corrective action program under § 264.100; or

(4) In all other cases, the owner or operator must institute a detection monitoring program under § 264.98.

(b) The Regional Administrator will specify in the facility permit the spe-cific elements of the monitoring and response program. The Regional Administrator may include one or more of the programs identified in para-graph (a) of this section in the facility permit as may be necessary to protect human health and the environment and will specify the circumstances under which each of the programs will be required. In deciding whether to require the owner or operator to be prepared to institute a particular program, the Regional Administrator will consider the potential adverse effects on human health and the environment that might occur before final administrative action on a permit modification application to incorporate such a program could be taken.

\$264.92 Ground-water protection stand-

The owner or operator must comply with conditions specified in the facili-ty permit that are designed to ensure that hazardous constituents under § 264.93 entering the ground water from a regulated unit do not exceed the concentration limits under § 264.94 in the uppermost aquifer underlying the waste management area beyond the point of compliance under § 264.95 during the compliance period under § 264.96. The Regional Administrator will establish this ground-water protered the ground water from a regulated unit.

§ 264.93 Hazardous constituents.

(a) The Regional Administrator will specify in the facility permit the hazto which ardous constituents ground-water protection standard of § 264.92 applies. Hazardous constituents are constituents identified in Appendix VIII of Part 261 of this chapter that have been detected in ground water in the uppermost aquifer under-lying a regulated unit and that are reasonably expected to be in or de-rived from waste contained in a regu-lated unit, unless the Regional Administrator has excluded them under paragraph (b) of this section.

(b) The Regional Administrator will exclude an Appendix VIII constituent from the list of hazardous constituents specified in the facility permit if he finds that the constituent is not capable of posing a substantial present or potential hazard to human health or the environment. In deciding whether to grant an exemption, the Regional Administrator will consider the follow-

(1) Potential adverse effects on ground-water quality, considering:

- (i) The physical and chemical characteristics of the waste in the regulat-ed unit, including its potential for migration:
- (ii) The hydrugeological characteristics of the facility and surrounding land:
- (iii) The quantity of ground water and the direction of ground-water flow;
- (iv) The proximity and withdrawal rates of ground-water users;
- (v) The current and future uses of
- ground water in the area;
 (vi) The existing quality of ground water, including other sources of contamination and their cumulative impact on the ground-water quality; (vii) The potential for health risks

tection standard in the facility permit caused by human exposure to waste when hazardous constituents have enconstituents:

- (viii) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents:
- (ix) The persistence and permanence of the potential adverse effects; and
- (2) Potential adverse effects on hydraulically-connected aurface water quality, considering:
- (i) The volume and physical and chemical characteristics of the waste in the regulated unit:
- (ii) The hydrogeological characteristics of the facility and surrounding
- (iii) The quantity and quality of ground water, and the direction of ground-water flow;
- (iv) The patterns of rainfall in the region:
- (v) The proximity of the regulated unit to surface waters:
- (vi) The current and future uses of surface waters in the area and any water quality standards established for those surface waters:
- (vii) The existing quality of surface water, including other sources of contamination and the cumulative impact on surface-water quality;
- (viii) The potential for health risks caused by human exposure to waste constituents;
- (ix) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents; and
- (x) The persistence and permanence of the potential adverse effects.
- (c) In making any determination under paragraph (b) of this section about the use of ground water in the area around the facility, the Regional Administrator will consider any identification of underground sources of drinking water and exempted aquifers made under \$ 144.8 of this chapter.

[264.93(c) amended by 48 FR 14293, April 1, 1983]

\$ 264.94 Concentration limits.

- (a) The Regional Administrator will specify in the facility permit concernation limits in the ground water for hazardous constituents established under \$264.93. The concentration of a hazardous constituent:
- (1) Must not exceed the background level of that constituent in the ground water at the time that limit is apecified in the permit; or
- (2) For any of the constituents listed in Table 1, must not exceed the respective value given in that Table if the background level of the constituent is below the value given in Table 1; or
- (3) Must not exceed an alternate limit established by the Regional Administrator under paragraph (b) of this section.
- (b) The Regional Administrator will establish an alternate concentration limit for a hazardous constituent if he finds that the constituent will not pose a substantial present or potential hazard to human health or the environment as long as the alternate concentration limit is not exceeded. In establishing alternate concentration limits, the Regional Administrator will consider the following factors:
- (1) Potential adverse effects on ground-water quality, considering:

- (i) The physical and chemical characteristics of the waste in the regulated unit, including its potential for migration:
- (ii) The hydrogeological characteristics of the facility and surrounding land:
- (iii) The quantity of ground water and the direction of ground-water flow;
- (iv) The proximity and withdrawal rates of ground-water users;
- (v) The current and future uses of ground water in the area;
- (vi) The existing quality of ground water, including other sources of contamination and their cumulative impact on the ground-water quality;
- (vil) The potential for health risks caused by human exposure to waste constituents:
- (viil) The potential damage to wildlife, crops, vegetation, and physical atructures caused by exposure to waste constituents:
- (ix) The persistence and permanence of the potential adverse effects; and
- (2) Potential adverse effects on hydraulically-connected surface-water quality, considering:
- (i) The volume and physical and chemical characteristics of the waste in the regulated unit;
- (ii) The hydrogeological characteristics of the facility and surrounding land;
- (iii) The quantity and quality of ground water, and the direction of ground-water flow; (iv) The patterns of rainfall in the
- region;
 (v) The proximity of the regulated unit to surface waters;
- (vi) The current and future uses of surface waters in the area and any water quality standards established for those surface waters:
- (vii) The existing quality of surface water, including other sources of contamination and the cumulative impact on surface water quality;
- (viii) The potential for health risks caused by human exposure to waste constituents:
- (ix) The potential damage to wildlife, crops, vegetation, and physical

- atructures caused by exposure to waste constituents; and
- (x) The persistence and permanence of the potential adverse effects.
- (c) In making any determination under paragraph (b) of this section about the use of ground water in the area around the facility the Regional Administrator will consider any identification of underground sources of drinking water and exempted aquifers made under § 144.8 of this chapter.

[264.94(c) amended by 48 FR 14293, April 1, 1983]

\$264.95 Point of compliance.

- (a) The Regional Administrator will specify in the facility permit the point of compliance at which the groundwater protection standard of § 264-92 applies and at which monitoring must be conducted. The point of compliance is a vertical surface located at the hydraulically downgradient limit of the waste management area that extends down into the uppermost aquifer underlying the regulated units.
- (b) The waste management area is the limit projected in the horizontal plane of the area on which waste will be placed during the active life of a regulated unit.
- (1) The waste management sees includes horizontal space taken up by any liner, dike, or other barrier designed to contain waste in a regulated unit.
- (2) If the facility contains more than one regulated unit, the waste management area is described by an imaginary line circumscribing the several regulated units.

264.96 Compliance period.

(a) The Regional Administrator will specify in the facility permit the compliance period during which the ground-water protection standard of 264 92 applies. The compliance period is the number of years could in the active life of the waste management are tincluding any waste management activity prior to permitting, and the closure period.

[Sec. 264.96(2)]

- (b) The compliance period begins when the owner or operator initiates a compliance monitoring program meeting the requirements of § 264.99.
- (c) If the owner or operator is engaged in a corrective action program at the end of the compliance period specified in paragraph (a) of this section, the compliance period is extended until the owner or operator can demonstrate that the ground-water protection standard of § 284.92 has not been exceeded for a period of three consecutive years.

8 264.97 General ground-water monitoring requirements.

The owner or operator must comply with the following requirements for any ground-water monitoring program developed to satisfy § 264.98, § 264.99, or § 264.100:

- (a) The ground-water monitoring system must consist of a sufficient number of wells, installed at appropriate locations and depths to yield ground-water samples from the uppermost aquifer that:
- (1) Represent the quality of background water that has not been affected by leakage from a regulated unit;
- and (2) Represent the quality of ground water passing the point of compliance.
- (b) If a facility contains more than one regulated unit, separate groundwater monitoring systems are not required for each regulated unit provided that provisions for sampling the ground water in the uppermost aquifer will enable detection and measurement at the compliance point of hazardous constituents from the regulated units that have entered the ground water in the uppermost aquifer.
- (c) All monitoring wells must be cased in a manner that maintains the integrity of the monitoring-well bore hole. This casing must be screened or perforated and packed with gravel or and, where necessary, to enable collection of ground-water samples. The annular space (i.e., the space between the bore hole and well casing) above the sampling depth must be sealed to prevent contamination of samples and the ground water.

- (d) The ground-water monitoring program must include consistent sampling and analysis procedures that are designed to ensure monitoring results that provide a reliable indication of ground-water quality below the waste management area. At a minimum the program must include procedures and techniques for:
- (1) Sample collection:
- (2) Sample preservation and shipment:
- (3) Analytical procedures; and (4) Chain of custody control.
- (e) The ground-water monitoring program must include sampling and analytical methods that are appropriate for ground-water sampling and that accurately measure hazardous constituents in ground-water samples.
- (f) The ground-water monitoring program must include a determination of the ground-water surface elevation each time ground water is sampled.
- (g) Where appropriate, the groundwater monitoring program must establish background ground-water quality for each of the hazardous constituents or monitoring parameters or constituents specified in the permit.
- (1) In the detection monitoring program under \$264.98, background ground-water quality for a monitoring parameter or constituent must be based on data from quarterly sampling of wells upgradient from the waste management area for one year.
- (2) In the compliance monitoring program under § 264.99, background ground-water quality for a hazardous constituent must be based on data from upgradient wells that:
- (i) Is available before the permit is issued:
- (II) Accounts for measurement errors
- In sampling and analysis; and (IIII) Accounts, to the extent feasible, for seasonal fluctuations in background ground-water quality if such fluctuations are expected to affect the concentration of the hazardous constituent.
- (3) Background quality may be based on sampling of wells that are not upgradient from the waste management area where:
- Hydrogeologic conditions do not allow the owner or operator to determine what wells are upgradient; or

- (ii) Sampling at other wells will provide an indication of background ground-water quality that is as representative or more representative than that provided by the upgradient wells.
- (4) In developing the data base used to determine a background value for each parameter or constituent, the owner or operator must take a minimum of one sample from each well and a minimum of four samples from the entire system used to determine background ground-water quality, each time the system is sampled.
- (h) The owner or operator must use the following statistical procedure in determining whether background values or concentration limits have been exceeded:
- (1) If, in a detection monitoring program, the level of a constituent at the compiliance point is to be compared to the constituent's background value and that background value has a sample coefficient of variation less than 1.00:
- (i) The owner or operator must take at least four portions from a sample at each well at the compliance point and determine whether the difference between the mean of the constituent at each well (using all portions taken) and the background value for the constituent is significant at the 0.05 level using the Cochran's Approximation to the Behrens-Fisher Student's t-test as described in Appendix IV of this part. If the test indicates that the difference is significant, the owner or operator must repeat the same procedure (with at least the same number of portions as used in the first test) with a fresh sample from the monitoring well. If this second round of analyses indicates that the difference is significant, the owner or operator must conclude that a statistically significant change has occurred; or
- (ii) The owner or operator may use an equivalent statistical procedure for determining whether a statistically significant change has occurred. The Regional Administrator will specify auch a procedure in the facility permit if he finds that the alternative procedure reasonably balances the probability of faisely identifying a non-contaminating regulated unit and the

[Sec. 264.97(h)(1)(ii)]

probability of failing to identify a contaminating regulated unit in a manner that is comparable to that of the statistical procedure described in paragraph (hX1XI) of this section.

- (2) In all other situations in a detection monitoring program and in a compliance monitoring program, the owner or operator must use a statistical procedure providing reasonable confidence that the migration of hazardous constituents from a regulated unit into and through the aquifer will be indicated. The Regional Administrator will specify a statistical procedure in the facility permit that he finds:
- (i) Is appropriate for the distribution of the data used to establish background values or concentration limits; and
- (ii) Provides a reasonable balance between the probability of falsely identifying a non-contaminating regulated unit and the probability of failing to identify a contaminating regulated unit.
- (Approved by the Office of Management and Budget under control number 2050-0033) [284 97 amended by 50 FR 4513, January 31, 1985]

§ 264.98 Detection monitoring program

- An owner or operator required to establish a detection monitoring program under this subpart must, at a minimum, discharge the following reanonsibilities:
- (a) The owner or operator must monitor for indicator parameters (e.g., specific conductance, total organic carbon, or total organic halogen), wester constituents, or reaction products that provide a reliable indication of the presence of hearedous constituents in ground water. The Regional Administrator will specify the perameters or constituents to be monitored in the facility permit, after considering the following factors:
- (1) The types, quantities, and concentrations of constituents in wastes managed at the regulated unit;
- (2) The mobility, stability, and persistance of waste constituents or their reaction products in the unsaturated zone beneath the waste management area:

- (3) The detectability of indicator parameters, waste constituents, and reaction products in ground water, and
- (4) The concentrations or values and coefficients of variation of proposed monitoring parameters or constituents in the ground-water background.
- (b) The owner or operator must install a ground-water monitoring system at the compliance point as a specified under § 284.95. The ground-water monitoring system meat-comply with § 284.97(a)(2), (b), and (c).
- (c) The owner or operator must establish a background value for each monitoring parameter or constituent specified in the permit pursuant to paragraph (s) of this section. The permit will specify the background values for each parameter or specify the procedures to be used to calculate the background values.
- (1) The owner or operator must comply with § 264.97(g) in developing the data base used to determine background values.
- (2) The owner or operator must express background values in a form necessary for the determination of statistically significant increases under § 204.97(h).
- (3) In taking samples used in the determination of background values, tha owner or operator must use, a groundwater monitoring system that compiles with \$264.97(a)(1), (b), and (c).
- (d) The owner or operator must determine ground-water quality at each monitoring well at the compilance point at least semi-annually during the active life of a regulated unit (including the closure period) and the post-closure came period. The owner or operator must express the ground-water-quality at each monitoring well in a form accessary for the determination of stellistically significant increases under § 204.97(4)
- (e) The owner or operator must determine the ground-water flow rate and direction in the uppermost equifer at lessi annually.

- (f) The owner or operator must use procedures and methods for sampling and analysis that meet the requirement of § 264.97 (d) and (e).
- (g) The owner or operator must determine whether there is a statistically significant increase over background values for any parameter or constituent specified in the permit pursuant to paragraph (a) of this section sech time be determines ground-weter quality at the compliance point under paragraph (d) of this section.
- (3) In determining whether a statistically significant increase has occurred, the owner or operator must compare the ground-water quality at each monitoring well at the compliance point for each parameter or constituent to the background value for that parameter or constituent, according to the statistical procedure specified in the permit under \$264.97(b).
- (2) The owner or operator must determine whether there has been a statistically significant increase at each moratoring well at the compliance point within a reasonable time period after completion of sampling. The Regional Administrator will specify that time period in the facility permit, after considering the complexity of the statistical test and the availability of laboratory facilities to perform the analysis of ground-water samples.
- (h) if the owner or operator determines, pursuant to paragraph (g) of this section, that there is a statistically significant increase for parameters or constituents specified pursuant to paragraph (a) of this section at any monitoring well at the compliance point, he must:
- (1) Notify the Regional Administrator of this finding in writing within seven days. The notification must indicate what parameters or constituents have shown statistically significant increases:

(2) Immediately sample the ground water in all monitoring wells and determine whether constituents identified in the list in Appendix IX of Part 204 are present and, if so, at what concentration.

(264 96(h)(2) amended by 52 FR 25946, July 9, 1987]

[Sec. 264.98(h)(2)]

(3) Establish a background value for each constituent that has been found at the compliance point under paragraph (h)(2) of this section, as follows:

[264.98(h)[3] introductory text amended by 52 FR 25946, July 9, 1987]

(i) The owner or operator must comply with § 264.97(g) in developing the data base used to determine back-

(ii) The owner or operator must express background values in a form necsignificant increases under

tically significated a 264.97(h); and

- (iii) In taking samples used in the determination of background values, the owner or operator must use a ground-water monitoring system that complies with § 264.97(a)(1), (b), and
- (4) Within 90 days, submit to the Regional Administrator an application for a permit modification to establish a compliance monitoring program meeting the requirements of § 284.99. The application must include the following information:
- "(I) An identification of the concentration of each constituent found in the ground water at each monitoring well at the compliance point:

[264.98(h)[4)[i] amended by 52 FR 25946, July 9, 1987]

- (ii) Any proposed changes to the ground-water monitoring system at the facility necessary to meet the requirements of § 264.99;
- (iii) Any proposed changes to the monitoring frequency, sampling and analysis procedures or methods, or statistical procedures used at the facility necessary to meet the requirements of
- found at the compliance point, a pro-posed concentration limit under § 264.94(a)(1) or (2), or a notice of intent to seek a variance under intent to see
- (5) Within 180 days, submit to the

- (ii) An engineering feasibility plan for a corrective action program necessary to meet the requirements of § 264.100, unless:
- (A) All hazardous constituents identified under paragraph (h)(2) of this section are listed in Table 1 of § 284.94 and their concentrations do not exceed the respective values given in that Table; or
- (B) The owner or operator has sought a variance under § 264.94(b) for every hazardous constituent identified under paragraph (h)(2) of this section.
- (i) If the owner or operator determines, pursuant to paragraph (g) of this section, that there is a statistically significant increase of parameters or consitutents specified pursuant to paragraph (a) of this section at any monitoring well at the compliance point, he may demonstrate that a source other than a regulated unit caused the increase or that the increase resulted from error in sampling, analysis, or evaluation. While the stration under this paragraph in addition to, or in lieu of, submitting a permit modification application under paragraph (hX4) of this section, he is not relieved of the requirement to submit a permit modification application within the time specified in paragraph (h)(4) of this section unless the demonstration made under this paragraph successfully shows that a s other than a regulated unit caused the increase or that the increase resulted from error in sampling, analysis, or evaluation. In making a demonstration under this paragraph, the owner or operator must:

(1) Notify the Regional Administra tor in writing within seven days of determining a statistically significant in-crease at the compliance point that he intends to make a demonstration

under this paragraph; (2) Within 90 days, submit a report

to the Regional Administrator which (iv) For each hazardous constituent demonstrates that a source other than a regulated unit caused the increase, or that the increase resulted from error in sampling, analysis, or evalua-

(3) Within 90 days submit to the Regional Administrator an application for a permit modification to make any Regional Administrator:

(i) All data necessary to justify any monitoring program at the facility; variance sought under | 384.84(b); and and

- (4) Continue to monitor in accordance with the detection monitoring program established under this sec-
- (j) If the owner or operator determines that the detection monitoring program no longer satisfies the requirements of this section, he must, within 30 days, submit an application for a permit modification to make any appropriate changes to the program.
- (k) The owner or operator must assure that monitoring and corrective action measures necessary to achieve compliance with the ground-water protection standard under § 264.92 are taken during the term of the permit.

(Approved by the Office of Management and Budget under control number 2050-0033)

8 264.99 Compliance monitoring program.

- An owner or operator required to establish a compliance monitoring program under this subpart must, at a minimum, discharge the following responsibilities:
- (a) The owner or operator must monitor the ground water to deter-mine whether regulated units are in compliance with the ground-water protection standard under § 264.92. The Regional Administrator will specify the ground-water protection standard in the facility permit, including
- (1) A list of the hazardous constituents identified under § 264.93;
- (2) Concentration limits under § 264.94 for each of those hazardous constituents;
- (3) The compliance point under § 264.95; and
- (4) The compliance period under \$ 264.96.
- (b) The owner or operator must install a ground-water monitoring system at the compliance point as specified under § 264.95. The groundwater monitoring system must comply with § 264.97(a)(2), (b), and (c).
- (c) Where a concentration limit established under paragraph (a)(2) of this section is based on background ground-water guality, the Regional

[Sec. 264.99(c)]

Administrator will specify the concentration limit in the permit as follows:

(1) If there is a high temporal corre lation between upgradient and compliance point concentrations of the hazardous constitutents, the owner or operator may establish the concentration limit through sampling at upgradient wells each time ground water is sampled at the compliance point. The Regional Administrator will specify the procedures used for determining the concentration limit in this manner in the permit. In all other cases, the concentration limit will be the mean of the pooled data on the concentra tion of the hazardous constituent.

(2) If a hazardous constituent is identified on Table 1 under § 264.94 and the difference between the respective concentration limit in Table I and the background value of that constituent under § 264.97(g) is not statistically significant, the owner or operator must use the background value of the constituent as the concentration limit. In determining whether this differ-ence is statistically significant, the owner or operator must use a statistical procedure providing reasonable confidence that a real difference will be indicated. The statistical procedure

(i) Be appropriate for the distribution of the data used to establish background values; and

(ii) Provide a reasonable balance between the probability of falsely identi-fying a significant difference and the probability of failing to identify a significant difference.

(3) The owner or operator must

(i) Comply with § 264.97(g) in developing the data base used to determine background values;

(ii) Express background values in a form necessary for the determination of statistically significant increases under § 264.97(h); and

(fii) Use a ground-water monitoring that complies system § 264.97(a)(1), (b), and (c).

td) The owner or operator must de-termine the concentration of hazardous constituents in ground water at each monitoring well at the compliance point at least quarterly during the compliance period. The owner or operator must express the concentration at each monitoring well in a form necessary for the determination of statistically significant increases under \$ 264.97(h).

te) The owner or operator must determine the ground-water flow rate and direction in the uppermost aquifer at least annually.

(f) The owner or operator must analyze samples from all monitoring wells at the compliance point to determine whether constituents identified in the list in Appendix IX to Part 264 of this chapter are present and. if so, at what concentration. The analysis must be conducted at least annually to determine whether additional Appendix IX constituents are present in the uppermost aquifer. If the owner or operator finds constituents from Appendix IX in the ground water that are not already identified in the permit as monitoring constituents, the owner or operator must report the concentration of these edutional constituents to the Regional Administrator within seven days after completion of the analysis.

[264.99(f) amended by 52 FR 25948, July 9, 1987)

(g) The owner or operator must use procedures and methods for sampling and analysis that meet the requirements of § 264.97(d) and (e).

(h) The owner or operator must determine whether there is a statistically significant increase over the concentration limits for any hazardous constituents specified in the permit pursuant to paragraph (a) of this section each time he determines the concentration of hazardous constituents in ground water at the compliance point

(1) In determining whether a statistically significant increase has occurred, the owner or operator must compare the ground-water quality at each monitoring well at the compli-ance point for each hazardous constituent to the concentration limit for that constituent according to the statistical procedures specified in the permit under § 264.97(h).

(2) The owner or operator must de-termine whether there has been a statistically significant increase at each monitoring well at the compliance point, within a reasonable time period after completion of sampling. The Re rional Administrator will specify that time period in the facility permit, after considering the complexity of the statistical test and the availability of laboratory facilities to perform the analysis of ground-water samples.

- (1) If the owner or operator determines, pursuant to paragraph (h) of this section, that the ground-water protection standard is being exceeded at any monitoring well at the point of compliance, he must:
- (1) Notify the Regional Administrator of this finding in writing within seven days. The notification must indicate what concentration limits have been exceeded.
- (2) Submit to the Regional Administrator an application for a permit modification to establish a corrective action program meeting the requirements of § 264.100 within 180 days, or within 90 days if an engineering feasibility study has been previously sub-mitted to the Regional Administrator under § 264.98(h)(5). The application must at a minimum a include the following information:
- (i) A detailed description of corrective actions that will achieve compliance with the ground-water protection standard specified in the permit under paragraph (a) of this section; and
- (li) A plan for a ground-water monitoring program that will demonstrate the effectiveness of the corrective action. Such a ground-water monitoring program may be based on a compliance monitoring program developed to meet the requirements of this sec-
- (j) If the owner or operator determines, pursuant to paragraph (h) of this section, that the ground-water protection standard is being exceeded at any monitoring well at the point of compliance, he may demonstrate that a source other than a regulated unit caused the increase or that the crease resulted from error in sampling. analysis or evaluation. While the owner or operator may make a demonstration under this paragraph in addition to, or in lieu of, submitting a permit modification application under paragraph (1)(2) of this section, he is not relieved of the requirement to submit a permit modification application within the time specified in para-graph (IX2) of this section unless the demonstration made under this paragraph auccessfully shows that a source other than a regulated unit caused the increase or that the increase resulted from error in sampling, analysis, or evaluation. In making a demonstration under this paragraph, the owner or operator must:

(1) Notify the Regional Administrator in writing within seven days that he intends to make a demonstration

under this paragraph;
(2) Within 90 days, submit a report to the Regional Administrator which demonstrates that a source other than a regulated unit caused the standard to be exceeded or that the apparent noncompliance with the standards re-

sulted from error in sampling, analysis, or evaluation;

(3) Within 90 days, submit to the Rerional Administrator an application for a permit modification to make any appropriate changes to the compliance monitoring program at the facility; and

- (4) Continue to monitor in accord with the compliance monitoring program established under this section.
- (k) If the owner or operator determines that the compliance monitoring program no longer satisfies the requirements of this section, he must, within 90 days, submit an application for a permit modification to make any appropriate changes to the program.
- (1) The owner or operator must assure that monitoring and corrective action measures necessary to achieve compliance with the ground-water protection standard under § 264.92 are taken during the term of the permit.

(Approved by the Office of Management and Budget under control number 2050-0033)

[264.99 amended by 50 FR 4513, January 31, 1985]

264.100 Corrective action program.

An owner or operator required to establish a corrective action program under this subpart must, at a minimum, discharge the following responabilities:

(a) The owner or operator must take corrective action to ensure that regulated units are in compliance with the ground-water protection standard under § 264.92. The Regional Administrator will specify the ground-water protection standard in the facility permit, including:
(1) A list of the hazardous constitu-

ents identified under § 264.93; (2) Concentration limits under § 264.94 for each of those hazardous nstituents;

The compliance point under 1 364.95; and

(4) The compliance period under

(b) The owner or operator must implement a corrective action program that prevents hazardous constituents from exceeding their respective concentration limits at the compliance point by removing the hazardous waste constituents or treating them in place. The permit will specify the specific measures that will be taken.

(c) The owner or operator must corrective action within a reasonable time period after the groundwater protection standard is exceeded. The Regional Administrator will specify that time period in the facility permit. If a facility permit includes a corrective action program in addition to a compliance monitoring program, the permit will specify when the cor-rective action will begin and such a requirement will operate in lieu of

264.99(1)(2).

(d) In conjunction with a corrective action program, the owner or operator must establish and implement a ground-water monitoring program to demonstrate the effectiveness of the corrective action program. Such a monitoring program may be based on the requirements for a compliance monitoring program under § 264.99 and must be as effective as that program in determining compliance with the ground-water protection standard under \$ 264.92 and in determining the success of a corrective action program under paragraph (e) of this section, where appropriate.

[264.100(e) introductory text revised, new (1) and (2) added and former (1) and (2) redesignated as (3) and (4) by 52 FR 45797, December 1, 1987]

(e) In addition to the other requirements of this section, the owner or operator must conduct a corrective action progrem to remove or treet in place eny hazardous constituents under § 264.93 that exceed concentration limits under § 264.94 in groundwater:

(1) Between the compliance point under § 284.95 and the downgradient

property boundary; and (2) Beyond the facility boundary. where necessary to protect human heelth and the environment, unless the owner or operator demonstrates to the satisfaction of the Regional Administrator that, despite the owner's or operator's best efforts, the owner or operator was unable to obtain the

necessary permission to undertake such action. The owner/operator is not relieved of all responsibility to clean up a release that has migrated beyond the facility boundary where off-site access is denied. On-site measures to eddress auch releases will be determined on a case-by-case basis.

- (3) Corrective action measures under this paragraph must be initiated and completed within a reasonable period of time considering the extent of contamination.
- (4) Corrective action measures under this paragraph may be terminated once the concentration of hazardous constituents under §264.93 is reduced to levels below their respective concentration limits under §264.94
- (f) The owner or operator must continue corrective action measures during the compliance period to the extent necessary to ensure that the ground-water protection atandard is not exceeded. If the owner or operator is conducting corrective action at the end of the compliance period, he must continue that corrective action for as long as necessary to achieve compliance with the ground-water protection standard. The owner or operator may terminate corrective action measures taken beyond the period equal to the active life of the waste management area (including the closure period) if he can demonstrate, based on data from the ground-water monitoring program under paragraph (d) of this section, that the ground-water protec-tion standard of § 264.92 has not been exceeded for a period of three consecutive years.

(g) The owner or operator must report in writing to the Regional Ad-ministrator on the effectiveness of the corrective action program. The owner or operator must submit these reports semi-annually.

(h) If the owner or operator determines that the corrective action program no longer satisfies the requirements of this section, he must, within 90 days, submit an application for a permit modification to make any appropriate changes to the program.

(Approved by the Office of Management and Budget under control number 2050-00331

1264 100 amended by 50 FR 4513, January

§264.101 Corrective action for solid waste management units.

[264 101 added by 50 FR 28742, July 15, 1985]

(a) The owner or operator of a facility seeking a permit for the treatment, storage or disposal of hazardous waste must institute corrective action as necessary to protect human health and the environment for all releases of hazardous waste or constituents from any solid waste management unit at the facility, regardless of the time at which waste was placed in such unit.

(b) Corrective action will be specified in the permit. The permit will contain schedules of compliance for such corrective action (where such corrective action cannot be completed prior to issuance of the permit) and assurances of financial responsibility for completing such corrective action.

(c) The owner or operator most implement corrective actions beyond the facility property boundary, where necessary to protect human health and the environment, unless the owner or operator demonstrates to the entisfaction of the Regional Administrator that, despite the owner's or operator's best efforts, the owner or operator was unable to obtain the necessary permission to undertake such actions. The owner/operator is not relieved of all responsibility to clean up a release that has migrated beyond the fucility boundary where off-site access is denied. On-site measures to address such releases will be determined on a case-by-case basis. Assurances of financial responsibility for such corrective action must be provided.

[264 101(c) added by 52 FR 45797, December 1, 1987]

§§264.102-264.109 [Reserved]

1-29-88

Subpart G - Closure and Post-Closure

[Subpart G revised by 51 FR 16443, May 2, 1986]

§264.110 Applicability. Except as §264.1 provides otherwise:

(a) Sections 264.111-264.115 (which concern closure) apply to the owners and

operators of all hazardous waste management facilities; and

- (b) Sections 264.116-264.120 (which concern post-closure care) apply to the owners and operators of:
- (1) All hazardous waste disposal facilities; and
- (2) Waste piles and surface impoundments from which the owner or operator intends to remove the wastes at closure to the estent that these sections are made applicable to such facilities in \$\$264.228 or 264.258.
- (3) Tank systems that are required under §264.197 to meet the requirements for landfills.

[264.110(h)(3) added by 51 FR 25470, July 14, 1986]

§ 264.111 Closure performance standard.

The owner or operator must close the facility in a manner that:

- (a) Minimizes the need for further maintenance; and
- (b) Controls, minimizes or eliminates, to the extent necessary to protect human health and the environment, post-closure escape of hazardous waste, hazardous constituents, leachate, contaminated run-off, or hazardous waste decomposition products to the ground or surface waters or to the atmosphere; and
- (c) Complies with the closure requirements of this subpert, including, but not limited to, the requirements of §§ 264.178, 264.197, 264.228, 264.258, 264.280, 264.310, 264.351, and 264.601 through 264.603.

[264.111 (c) amended by 52 FR 48963, December 10, 1987]

\$264.112 Closure plan; amendment of plan.

(a) Written plan. (1) The owner or operator of a hazardous waste management facility must have a written closure plan. In addition, certain surface impoundments and waste piles from which the owner or operator intends to remove or decontaminate the hazardous waste at partial or final closure are required by §§ 264.286(x) XI) and 264.286(x) XII) have contingent closure plans. The plan must be submitted with the permit application.

accordance with § 270.14(b)(3) of this chapter, and approved by the Regional Administrator as part of the permit issuance procedures under Part 124 of this chapter. In accordance with § 270.32 of this chapter, the approved closure plan will become a condition of any RCRA permit.

(2) The Director's approval of the plan must ensure that the approved closure plan is consistent with § 264.111 through 284.115 and the applicable requirements of §§ 264.90 er seq. 284.178, 284.197, 284.226, 284.258, 284.250, 284.351, and 284.001. Until final closure is completed and certified in accordance with § 284.115, a copy of the approved plan and all approved revisions must be furnished to the Director upon request, including request by mail.

[264.112 (a)(2) revised by 52 FR 46963, December 10, 1987]

(b) Content of plan. The plan must identify steps necessary to perform partial and/or final closure of the facility at any point during its active life. The closure plan must include, at least:

(1) A description of how each hazardous waste management unit at the facility will be closed in accordance

with § 264.111; (2) A description of how final closure of the facility will be conducted in seccordance with § 264.111. The description must identify the maximum extent of the operations which will be unclosed during the active life of the facility; and

(3) An estimate of the maximum inventory of hazardous wastes ever orisite over the active life of the facility and a detailed description of the methods to be used during partial closures and final closure, including, but not limited to, methods for removing, transporting, treating, storing, or disposing of all hazardous wastes, and identification of the type(s) of the off-site hazardous waste management units to be used, if applicable; and

(4) A detailed description of the steps needed to remove or decontaminate all hazardous waste residues and contaminated containment system components, equipment, atructures, and soils during partial and final closure, including, but not limited to, procedures for cleaning equipment and removing contaminated soils, methods for sampling and testing surrounding soils, and criteria for determining the

[Sec. 264.112(b)(4)]

extent of decontamination required to satisfy the closure performance standard: and

(5) A detailed description of other activities necessary during the closure period to ensure that all partial ciosures and final closure satisfy the closure performance standards, including, but not limited to, ground-water monitoring, leachate collection, and run-on

and run-off control: and

(6) A achedule for closure of each hazardous waste management and for final closure of the facility. The schedule must include, at a minimum, the total time required to close hazardous waste management unit and the time required for inter vening closure activities which will allow tracking of the progress of par-tial and final closure. (For example, in the case of a landfill unit, estimates of the time required to treat or dispose of all hazardous waste inventory and of the time required to place a final cover must be included.)

(7) For facilities that use trust funds to establish financial assurance under \$ 264.143 or \$ 264.145 and that are expected to close prior to the expiration of the permit, an estimate of the ex-

- pected year of final closure.

 (c) Amendment of plan. The owner or operator must submit a written request for a permit modification to authorize a change in operating plans, facility design, or the approved closure plan in accordance with the procedures in Parts 124 and 270. The written request must include a copy of the amended closure pian for approval by the Regional Administrator.
- (1) The owner or operator may submit a written request to the Re-gional Administrator for a permit modification to amend the closure plan at any time prior to the notifica-tion of partial or final closure of the facility.
- (2) The owner or operator must submit a written request for a permit nodification to authorize a change in the approved closure plan whenever:
- (i) Changes in operating plans or facility design affect the closure plan, or
- (ii) There is a change in the expect-ed year of closure, if applicable, or
- (iii) In conducting partial or final closure activities, unexpected events require a modification of the approved closure plan.
- The owner or operator must submit a written request for a permit

modification including a copy of the amended closure plan for approval at least 60 days prior to the proposed change in facility design or operation, or no later than 60 days after an unexcted event has occurred which has affected the closure pian. If an unex pected event occurs during the partial or final closure period, the owner or operator must request a permit mo fication no later than 30 days after the unexpected event. An owner or operator of a surface impoundment or waste pile that intends to remove all hazardous waste at closure and is not otherwise required to prepare a contingent closure plan under § 264.228(c)(1) or § 264.258(cx1xi), must submit an amended closure plan to the Regional Administrator no later than 60 days from the date that the owner or operator or Regional Administrator determines that the hazardous waste man agement unit must be closed as a landfill, subject to the requirements of § 284.310, or no later than 30 days from that date if the determination is made during partial or final closure. The Regional Administrator will approve, disapprove, or modify this amended plan in accordance with the procedures in Parts 124 and 270. In accordance with § 270.32 of this chapter, the approved closure plan will become a condition of any RCRA permit issued.

(4) The Regional Administrator may request modifications to the plan under the conditions described in \$ 264.112(c)(2). The owner or operator must submit the modified plan within 60 days of the Regional Administrator's request, or within 30 days if the change in facility conditions occurs during partial or final closure. Any modifications requested by the Re-gional Administrator will be approved in accordance with the procedures in Parts 124 and 270.

(d) Notification of partial closure and final closure. (1) The owner or opministrator in writing at least 60 days prior to the date on which he expects to begin closure of a surface impoundment, waste pile, land treatment or landfill unit, or final closure of a facility with such a unit. The owner or operator must notify the Regional Administrator in writing at least 45 days prior to the date on which he expects to begin final closure of a facility with only treatment or storage tanks, container storage, or incinerator units to he closed.

- (2) The date when he "expects to begin closure" must be either no later than 30 days after the date on which any hazardous waste management unit receives the known final volume of hazardous wastes or, if there is a reasonable possibility that the hazardous waste management unit will receive additional hazardous wastes, no later than one year after the date on which the unit received the most recent volume of hazardous waste. If the owner or operator of a hazardous waste management unit can demonstrate to the Regional Administrator that the hazardous waste management unit or facility has the capacity to re-ceive additional hazardous wastes and he has taken, and will continue to take, all steps to prevent threats to human health and the environment, including compliance with all applicable permit requirements, the Regional Administrator may approve an extension to this one-year limit.
- (3) If the facility's permit is terminated or if the facility is otherwise ordered, by judicial decree or final order under section 3008 of RCRA, to cease receiving hazardous wastes or to close. then the requirements of this paragraph do not apply. However, owner or operator must close the facility in accordance with the deadlines established in § 264.113.
- (e) Removal of wastes and decon-tamination or dismantling of equipment. Nothing in this section shall preclude the owner or operator from removing hazardous wastes and decontaminating or dismantling equipment in accordance with the approved partial or final closure plan at any time before or after notification of partial or final closure.

\$264.113 Closure; time allowed for clo-

- (a) Within 90 days after receiving the final volume of hazardous wastes at a hazardous waste management unit or facility, the owner or operator must treat, remove from the unit or facility, or dispose of on-site, all hazardous wastes in accordance with the approved closure plan. The Regional Administrator may approve a longer period if the owner or operator complies with all applicable requirements for requesting a modification to the permit and demonstrates that:
- (1)(i) The activities required to comply with this paragraph will, of ne-

complete; or

(II)(A) The hazardous waste management unit or facility has the capacity to receive additional hazardous wastes; and

(B) There is a reasonable ilkelihood that he or another person will recom-mence operation of the hazardous waste management unit or the facility within one year; and

(C) Closure of the hazardous waste management unit or facility would be incompatible with continued operation of the site: and

(2) He has taken and will continue to take all steps to prevent threats to human health and the environment, including compliance with all applica-

ble permit requirements.

(b) The owner or operator must complete partial and final closure activities in accordance with the approved closure plan and within 180 days after receiving the final volume of hazardous wastes at the hazardous waste management unit or facility. The Regional Administrator may approve an extension to the closure period if the owner or operator complies with all applicable requirements for requesting a modification to the permit and demonstrates that:

(1)(i) The partial or final closure activities will, of necessity, take longer than 180 days to complete; or

(IIXA) The hazardous waste management unit or facility has the capacity to receive additional hazardous wastes;

(B) There is reasonable likelihood that he or another person will recom-mence operation of the hazardous waste management unit or the facility within one year; and

(C) Closure of the hazardous was management unit or facility would be incompatible with continued operation

of the site; and

(2) He has taken and will continue to take all steps to prevent threats to human health and the environment from the unclosed but not operating hazardous waste management unit or facility, including compliance with all applicable permit requirements.

(c) The demonstrations referred to in \$264,113(a) and (b) must be made as follows: (1) The demonstrations in paragraph (a) must be made at least 30 days prior to the expiration of the 90-day period in paragraph (a); and (2) the demonstration in paragraph (b) must be made at least 30 days prior to

cessity, take longer than 90 days to the expiration of the 180-day period in paragraph (b) of this section.

264.114 Disposal or decontamination of equipment, structures and soils.

During the partial and final closure periods, all contaminated equipment, structures, and soils must be properly disposed of or decontaminated, unless otherwise speci-fied in §§254.223, 364.258, 264.280, or 364.310, or under the authority of §264.601 and §264.803. By removing any hazardous wastes or hazardous constituents during partial and final closure, the owner or operator may become a generator of hazardous waste and must handle that waste in accordance with all applicable requirements of Part 262 of this Chapter.

[264 114 smended by 52 FR 46963, December 10 19871

264.115 Certification of closure.

Within 60 days of completion of closure of each hazardous waste surface impoundment, waste pile, land treatment, and landfill unit, and within 60 days of the completion of final clothe owner or operator must submit to the Regional Administrato-, by registered mail, a certification that the hazardous waste management unit or facility, as applicable, has been closed in accordance with the specifications in the approved closure plan. The certification must be signed by the owner or operator and by an independent registered professional engineer. Documentation supporting the independent registered professional engineer's certification must be furnished to the Regional Administrator upon request until he releases the owner or operator from the financial assurance requirements for closure under § 264.143(i).

\$ 264.116 Survey plat.

No later than the submission of the certification of closure of each hazardous waste disposal unit, the owner or operator must submit to the local soning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator, a survey plat indicating the location and dimensions of landfills cells or other hazardous waste disposal units with respect to permanently surveyed benchmarks. This plat must be pre-pared and certified by a professional

land surveyor. The plat filed with the local zoning authority, or the author-Ity with jurisdiction over local land use, must contain a note, prominently displayed, which states the owner's or operator's obligation to restrict disturbance of the hazardous waste disposal unit in accordance with the applicable Subpart G regulations.

\$264.117 Post-closure care and use of

(aX1) Post-closure care for each hazardous waste management unit subject to the requirements of §§ 264.117 through 264.120 must begin after completion of closure of the unit and continue for 30 years after that date and must consist of at least the following:

(i) Monitoring and reporting in accordance with the requirements of Subperts F. K. L. M. N. and X of this

(ii) Maintenance and monitoring of waste containment systems in accordance with the requirements of Subparts F. K. L. M. N. and X of this part.

[264.117 (a)(1)(i) and (ii) amended by 52 FR 46963, December 10, 1987]

(2) Any time preceding partial closure of a hazardous waste management unit subject to post-closure care requirements or final closure, or eny time during the post-closure period for a particular unit, the Regional Administrator may, in accordance with the permit modification procedures in Parts 124 and 270

(i) Shorten the post-closure care period applicable to the hazardous waste management unit, or facility, if all disposal units have been closed, if he finds that the reduced period is sufficient to protect human health and the environment (e.g., leachate or ground-water monitoring results, characteristics of the hazardous wastes, appilcation of advanced technology, or alternative disposal, treatment, or reuse techniques indicate that the hazardous waste management unit or facility is secure); or

(ii) Extend the post-closure care period applicable to the hazardous waste management unit or facility if he finds that the extended period is necessary to protect human health and the environment (e.g., leachate or ground-water monitoring results indicate a potential for migration of haz-

[Sec. 264.117(a)(2)(ii)]

ardous wastes at levels which may be harmful to human health and the enviconment)

- (b) The Regional Administrator may require, at partial and final closure, continuation of any of the security re-quirements of § 264.14 during part or all of the post-closure period when:
- (1) Hazardous wastes may remain exposed after completion of partial or final closure; or
- (2) Access by the public or domestic livestock may pose a hazard to human health.
- (c) Post-closure use of property on or in which hazardous wastes remain after partial or final closure must never be allowed to disturb the integrity of the final cover, liner(s), or any other components of the containment system, or the function of the facility's monitoring systems, unless the Regional Administrator finds that the disturbance:
- (1) Is necessary to the proposed use of the property, and will not increa the potential hazard to buman bealth or the environment; or
- (2) Is necessary to reduce a threat to human health or the environment. (d) All post-clorure care activities
- must be in accordance with the provisions of the approved post-closure plan as specified in § 264.118.

8 264.116 Post-closure plan; as

(a) Written Plan. The owner or operator of a hazardous waste disposal unit nust have a written post-closure plan. In addition, certain surface impoundments and waste piles from which the owner or operator intends to remove or decontaminate the hazardous wastes at partial or final closure are required by \$\frac{1}{2} 264.228(c)(\(\lambda\)(1)) and 264.258(c)(\(\lambda\)(1)) to have contingent post-closure plans. Owners or operators of surface impoundments and waste piles not otherwise required to prepare contingent post-closure plans under §§ 264.228(cX1Xii) and 264.258(cX1Xii) must submit a postclosure plan to the Regional Adminis-trator within 90 days from the date that the owner or operator or Regional administrator determines that the hazardous waste management unit must be closed as a landfill, subject to the requirements of §§ 254.117 through 264.120. The plan must be submitted with the permit application, in accordance with § 270.14(bx13) of this chapter, and approved by the Re-

gional Administrator as part of the ermit issuance procedures under Part 124 of this chapter. In accordance with § 270.32 of this chapter, the approved post-closure plan will become a condition of any RCRA permit issued.

- (b) For each hazardous waste management unit subject to the requirements of this section, the post-closure plan must identify the activities that will be carried on after closure of each disposal unit and the frequency of these activities, and include at least:
- (1) A description of the planned monitoring ectivities and frequencies et which they will be performed to comply with Subparts F. K. L. M. N. and X of this part during the post-closure care period; and
- [264.118 (b)(1) amended by 52 FR 46963, December 10, 1987]
- (2) A description of the planned maintenance activities, and frequen-cies at which they will be performed,
- (1) The integrity of the cap and final cover or other containment systems in eccordance with the requirements of Subparts F, K, L, M, N, and X of this part; and
- (ii) The function of the monitoring equipment in eccordance with the requirements of Subparts, F. K. L. M. N. and X of this part; and
- [264.118(b)(2)(i) and (ii) amended by 52 FR 46963, December 10, 1987]
- (3) The name, address, and phone number of the person or office to contact about the hazardous waste disposal unit or facility during the post-closure care period.
- (c) Until final closure of the facility, a copy of the approved post-closure plan must be furnished to the Regional Administrator upon request including request by mail. After final closure has been certified, the person or office specified in § 264.188(b)(3) must keep the approved post-closure plan during remainder of the post-closure period.
- (d) Amendment of plan. The owner or operator must request a permit modification to authorize a change in the approved post-closure plan in accordance with the applicable require-ments of Parts 124 and 270. The written request must include a copy of the

- mended post-closure plan for approv-
- al by the Regional Administrator.

 (1) The owner or operator may submit a written request to the Regional Administrator for a permit modification to amend the post-closure plan at any time during the active life of the facility or during the postclosure care period.
- (2) The owner or operator must submit a written request for a permit modification to authorize a change in the approved post-closure plan when-
- (1) Changes in operating plans or facility design affect the approved postclosure plan, or
- (ii) There is a change in the expect-ed year of final closure, if applicable,
- (iii) Events which occur during the active life of the facility, including partial and final closures, affect the approved post-closure plan.
- (3) The owner or operator must submit a written request for a permit modification at least 60 days prior to the proposed change in facility design or operation, or no later than 60 days after an unexpected event has oc-curred which has affected the post-closure plan. An owner or operator of a surface impoundment or waste pile that intends to remove all bazardous waste at closure and is not otherwise required to submit a contingent post-closure plan under \$\$ 264.228(CXIXII) and 264.258(c)(1)(ii) must submit a post-closure plan to the Regional Administrator no later than 90 days after the date that the owner or operator or Regional Administrator determines that the hazardous waste management unit must be closed as a landfill, subject to the requirements of § 264.310. The Regional Administrator will ap-prove, disapprove or modify this plan in accordance with the procedures in Parts 124 and 270. In accordance with § 270.32 of this chapter, the approved post-closure plan will become a permit
- (4) The Regional Administrator may request modifications to the plan under the conditions described in § 264.118(d)(2). The owner or operator must submit the modified plan no later than 60 days after the Regional Administrator's request, or no later than 90 days if the unit is a surface impoundment or waste pile not previ-ously required to prepare a contingent post-closure plan. Any modifications

[Sec. 264,118(d)(4)]

128

requested by the Regional Administrator will be approved, disapproved, or modified in accordance with the procedures in Parts 124 and 270.

264.119 Post-closure notices.

(a) No later than 60 days after certification of closure of each hazardous waste disposal unit, the owner or operator must aubmit to the local zoning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator a record of the type, location, and quantity of hazardous wastes disposed of within each cell or other disposal unit of the facility. Por hazardous wastes disposed of before January 12, 1981, the owner or operator must identify the type, location, and quantity of the hazardous wastes to the best of his knowledge and in accordance with any records he has kept.

(b) Within 60 days of certification of closure of the first hazardous waste disposal unit and within 60 days of certification of closure of the last hazardous waste disposal unit, the owner

or operator must:

- (1) Record, in accordance with State law, a notation on the deed to the facility property—or on some other instrument which is normally examined during title search—that will in perpetuity notify any potential purchaser of the property that:
- (i) The land has been used to manage hazardous wastes; and

(ii) Its use is restricted under 40 CFR Subpart G regulations; and

- (iii) The survey plat and record of the type, location, and quantity of hazardous wastes disposed of within each cell or other hazardous waste disposal unit of the facility required by §§ 264.116 and 264.119(a) have been filed with the local zoning authority or the authority with jurisdiction over local land use and with the Regional Administrator, and
- (2) Submit a certification, signed by the owner or operator, that he has recorded the notation specified in paragraph (bXI) of this section, including a copy of the document in which the notation has been placed, to the Regional Administrator.
- (c) If the owner or operator or any subsequent owner or operator of the land upon which a hazardous waste disposal unit is located wishes to remove hazardous wastes and hazardous waste residues, the liner, if any, or

contaminated soils, he must request a modification to the post-closure permit in accordance with the applicable requirements in Parts 124 and 270. The owner or operator must demonstrate that the removal of hazardous wastes will satisfy the criteria of 1264.117(c). By removing hazardous waste, the owner or operator may become a generator of hazardous waste and must manage it in accordance with all applicable requirements of this chapter. If he is granted a permit modification or otherwise granted approval to conduct such removal activities, the owner or operator may request that the Regional Administrator approve either.

(1) The removal of the notation on the deed to the facility property or other instrument normally examined during title search; or

(2) The addition of a notation to the deed or instrument indicating the removal of the hazardous waste.

\$254.120 Certification of completion of post-closure care.

No later than 60 days after comple tion of the established post-closure care period for each hazardous waste disposal unit, the owner or operator must submit to the Regional Administrator, by registered mail, a certification that the post-closure care period for the hazardous waste disposal unit was performed in accordance with the specifications in the approved post-closure plan. The certification must be signed by the owner or operator and an independent registered professional engineer. Documentation supporting the independent registered professional engineer's certification must be furnished to the Regional Administrator upon request until he releases the owner or operator from the financial assurance requirements for post-closure care under § 264.145(1).

Subport H-Financial Regulrements

264.140 Applicability.

- (a) The requirements of \$\frac{4}{2}\$ 264.142, and 264.147 through 264.151 apply to owners and operators of all hazardous waste facilities, except as provided otherwise in this section or in \$264.1
- (b) The requirements of §§ 264.144 and 264.145 apply only to owners and operators of:

(1) Disposal facilities, and

(2) Piles, and surface impoundments from which the owner or operator in tends to remove the wastes at closure, to the extent that these sections are made applicable to such facilities in §§ 264.228 and 264.258.

(c) States and the Federal government are exempt from the require-

ments of this subpart.

\$264.141 Definitions of terms as used in this subpart.

(a) "Closure plan" means the plan for closure prepared in accordance with the requirements of § 264.112.

(b) "Current closure cost estimate" means the most recent of the estimates prepared in accordance with \$ 264.142 (a), (b), and (c).

(c) "Current post-closure cost estimate" means the most recent of the estimates prepared in accordance with 8 264 144 (a). (b). and (c).

(d) "Parent corporation" means a corporation which directly owns at least 50 percent of the voting stock of the corporation which is the facility owner or operator; the latter corporation is deemed a "subsidiary" of the parent corporation.

(e) "Post-closure plan" means the plan for post-closure care prepared in accordance with the requirements of

\$\$ 264.117 through 264.120.

(f) The following terms are used in the specifications for the financial tests for closure, post-closure care, and liability coverage. The definitions are intended to assist in the understanding of these regulations and are not intended to limit the meanings of terms in a way that conflicts with generally accepted accounting practices.

"Assets" means all existing and all probable future economic benefits obtained or controlled by a particular

entity.

"Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

"Current llabilities" means obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets or the creation of other

current liabilities.

"Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accord-

[Sec. 264.141(f)]

ance with \$ 144.62(a), (b), and (c) of \$264.142 Cost estimate for close

[Added by 51 FR 16443, May 2, 1986]

"Independently sudited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards

"Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer s or provide services to other entities in the future as a result of past transactions or events.

"Net working capital" means current

assets minus current liabilities.
"Net worth" means total minus total liabilities and is equivalent

to owner's equity. Tangible net worth" means the tangible assets that remain after deduct-

ing liabilities; such assets would not include intangibles such as goodwill and rights to patents or royalties.

(g) In the liability insurance requireign the isolity insurance require-ments the terms "bodily injury" and "property damage" shall have the meanings given these terms by appli-cable State law. However, these terms do not include those liabilities which, consistent with standard industry practices, are excluded from coverage in lisbility policies for bodily injury and property damage. The Agency in-tends the meanings of other terms used in the liability insurance require ments to be consistent with their common meanings within the insurance industry. The definitions given below of several of the terms are intended to assist in the understanding of these regulations and are not intended to limit their meanings in a way that conflicts with general insurance industry usage.

"Accidental occurrence" means an accident, including continuous or re-peated exposure to conditions, which results in bodily injury or property damage neither expected nor intended from the standpoint of the insured.

"Legal defense costs" means any expenses that an insurer incurs in defending against claims of third parties brought under the terms and conditions of an insurance policy.

"Nonsudden accidental occurrence" means an occurrence which takes place over time and involves continuous or repeated exposure.

"Sudden accidental occurrence" means an occurrence which is not continuous or repeated in nature.

(a) The owner or operator must have a detailed written estimate, in current dollars, of the cost of closing the facility in accordance with the requirements in §§ 264.111 through 264.115 and applicable closure requirements in § 8 284.178, 284.197, 264.228, 264.258 284,280, 284,310, 284,351, and 284,601 through 284.803.

[264.142 (a) introductory text amended by 52 FR 46963, December 10, 1987]

(1) The estimate must equal the cost of final closure at the point in the facility's active life when the extent and manner of its operation would make closure the most expensive, as indicatclosure plan bv ita \$ 264.112(b)); and

(2) The closure cost estimate must be based on the costs to the owner or operator of hiring a third party to close the facility. A third party is a party who is neither a parent nor a aubsidiary of the owner or operator. (See definition of parent corporation in § 264.141(d).) The owner or operator may use costs for on-site disposal if he can demonstrate that on-site disposal capacity will exist at all times over the life of the facility.

(3) The closure cost estimate may not incorporate any salvage value that may be realized with the sale of hazardous wastes, facility structures or equipment, land, or other assets associated with the facility at the time of partial or final closure.

(4) The owner or operator may not incorporate a zero cost for hazardou wastes that might have economic value.

[264.142 (a) and (b) introductory text revised by 51 FR 16443, May 2, 1986]

(b) During the active life of the facility, the owner or operator must adjust the closure cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrumer-t(s) used to comply with § 264.143. For owners and operators using the financial test or corporate guarantee, the closure cost estimate must be updated for inflation within 30 days after the close of the firm's fiscal year and before aubmis-sion of updated information to the Regional Administrator as specified in § 264.143(f)(3). The adjustment may be made by recalculating the maximum costs of closure in current dollars, or by using an inflation factor de-

rived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its Survey of Current Business, as specified in paragraphs (b)(1) and (2) of this section. The inflation factor is the result of di-viding the latest published annual Deflator by the Deflator for the previous year.

(1) The first adjustment is made by multiplying the closure cost estimate by the inflation factor. The result is the adjusted closure cost estimate.

(2) Subsequent adjustments are made by mutliplying the lastest ad-justed closure cost estimate by the latest inflation factor.

(c) During the active life of the facility, the owner or operator must revise closure cost estimate no later than 30 days after the Regional Administrator has approved the request to modify the closure plan, if the change in the closure plan increases the cost of closure. The revised closure cost estimate must be adjusted for inflation as specified in § 264.142(b).

(264.142(c) amended by 52 FR 16443, May 2,

(d) The owner or operator must keep the following at the facility during the operating life of the facility: The latest closure cost estimate prepared in accordance with § 264.142 (a) and (c) and, when this estimate has been adjusted in accordance § 264.142(b), the latest adjusted closure cost estimate.

(Approved by the Office of Management and Budget under control number 2050-

\$264.143 Financial assurance for closure.

An owner or operator of each facility must establish financial assurance for closure of the facility. He must choose from the options as specified in paragraphs (a) through (f) of this section

(a) Closure trust fund. (1) An owner or operator may satisfy the requirements of this section by establishing a closure trus. fund which conforms to the requirements of this paragraph and submitting an originally signed duplicate of the trust agreement to the Regional Administrator. An owner or operator of a new facility submit the originally signed duplicate of the trust agreement to the Regional

'Administrator at least 60 days before the date on which hazardous waste is first received for treatment, storage, or disposal. The trustee must be an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a Pederal or State agency.

(2) The wording of the trust agreement must be identical to the wording specified in § 264.151(aX1), and the trust agreement must be accompanied by a formal certification of acknowledgment (for example, see 324.151(aX2)). Schedule A of the trust agreement must be updated within 60 days after a change in the amount of the current closure cost estimate covered by the agreement.

timate covered by the agreement.
(3) Payments into the trust fund must be made annually by the owner or operator over the term of the initial RCRA permit or over the remaining operating life of the facility as estimated in the closure pian, whichever period is shorter; this period is hereafter referred to as the "pay-in period." The payments into the closure trust fund must be made as follows:

(I) For a new facility, the first payment must be made before the initial receipt of hazardous waste for treatment, storage, or disposal. A receipt the trustee for this payment must be submitted by the owner or operator to the Regional Administrator before this initial receipt of hazardous waste. The first payment must be at least equal to the current closure cost estimate, except as provided in \$ 264.143(g), divided by the number of years in the pay-in period. Subsequent payments must be made no later than 30 days after each anniversary date of the first payment. The amount of each subsequent payment must be determined by this formula:

where CE is the current closure cost estimate, CV is the current value of the trust fund, and Y is the number of years remaining in the pay-in period.

(ii) If an owner or operator establises a trust fund as specified in \$265.143(a) of this chapter, and the value of that trust fund is less than the current closure cost estimate when a permit is awarded for the facility, the amount of the current closure cost. estimate still to be paid into the trust fund must be paid in over the pay-in period as defined in paragraph (ax3) of this section. Payments must continue to be made no later than 30 days after each anniversary date of the first payment made pursuant to Part 285 of this chapter. The amount of each payment must be determined by this formula:

where CE is the current closure cost estimate, CV is the current value of the trust fund, and Y is the number of years remaining in the pay-in period.

(4) The owner or operator may accelerate payments into the trust fund or he may deposit the full amount of the current closure cost estimate at the time the fund is established. However, he must maintain the value of the fund at no less than the value that the fund would have if annual payments were made as specified in paragraph (ax3) of this section.

- (5) If the owner or operator establishes a closure trust fund after having used one or more alternate mechanisms specified in this section or in § 265.143 of this chapter, his first payment must be in at least the amount that the fund would contain if the trust fund were established initially and annual payments made according to specifications of this paragraph and § 265.143(a) of this chapter, as applicable.
- (8) After the pay-in period is completed, whenever the current closure cost estimate changes, the owner or operator must compare the new estimate with the trustee's most recent annual valuation of the trust fund. If the value of the fund is less than the amount of the new estimate, the owner or operator, within 80 days after the change in the cust estimate, can be considered to the current closure cost estimate, or obtain other financial assurance as specified in this section to cover the difference.
- (7) If the value of the trust fund is greater than the total amount of the current closure cost estimate, the owner or operator may submit a written request to the Regional Adminis-

trator for release of the amount in excess of the current closure cost estimate.

(8) If an owner or operator substitutes other financial assurance as specified in this section for all or part of the trust fund, he may submit a written request to the Regional Administrator for release of the amount in excess of the current closure cost estimate covered by the trust fund.

(9) Within 60 days after receiving a request from the owner or operator for release of funds as specified in paragraph (a) (7) or (6) of this section, the Regional Administrator will instruct the trustee to release to the owner or operator such funds as the Regional Administrator specifies in writing.

- (10) After beginning partial or final closure, an owner or operator or an-other person authorized to conduct partial or final closure may request reimbursements for partial or final cio-aure expenditures by submitting itemized bills to the Regional Administrator. The owner or operator may request reimbursements for partial ciosure only if sufficient funds are remaining in the trust fund to cover the maximum costs of closing the facility remaining operating life. Within 60 days after receiving bills for partial or final closure activities, the Regional Administrator will instruct the trustee to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the partial or final closure expenditures are in accordance with the approved closure plan, or otherwise justified. If the Regional Administrator has reason to believe that the maximum cost of closure over the remaining life of the facility will be significantly greater than the value of the trust fund, he may withhold reim-bursements of such amounts as he deems prudent until he determines, in accordance with 4 264.143(i) that the owner or operator is no longer re-quired to maintain financial assurance for final closure of the facility. If the Regional Administrator does not instruct the trustee to make such reim-bursements, he will provide the owner or operator with a detailed written statement of reasons.
- (11) The Regional Administrator will agree to termination of the trust when:

[Sec. 264.143(a)(11)]

(i) An owner or operator substitutes alternate financial assurance as specified in this section; or

(ii) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with § 264.143(1).

[264.143(a)(10) revised by 51 FR 16443, May 2, 1986]

- (b) Surety bond guaranteeing pay ment into a closure trust fund. (1) An owner or operator may satisfy the requirements of this section by obtaining e surety bond which conforms to the requirements of this paragraph and submitting the bond to the Regional Administrator. An owner or operator of e new facility must submit the bond to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for treatment, storage, or disposal. The bond must be effective before this initial receipt of hazardous waste. The surety company issuing the bond must, at a minimum, be among those listed as acceptable sureties on Federal bonds in Circular 570 of the U.S. Department of the Treasury
- (2) The wording of the surety bond must be identical to the wording specified in § 264.151(b).
- (3) The owner or operator who uses a surety bond to satisfy the requirements of this section must also establish a standby trust fund. Under the terms of the bond, all payments made thereunder will be deposited by the surety directly into the standby trust fund in accordance with instructions from the Regional Administrator. This standby trust fund must meet the requirements specified in § 264.143(a), except that:
- (i) An originally signed duplicate of the trust agreement must be submitted to the Regional Administrator with the surety bond; and
- (ii) Until the standby trust fund is funded pursuant to the requirements of this section, the following are not required by these regulations:
- (A) Payments into the trust fund as specified in § 264.143(a);
- (B) Updating of Schedule A of the trust agreement (see § 264.151(a)) to show current closure cost estimates:
- (C) Annual valuations as required by the trust agreement; and

- (D) Notices of nonpayment as required by the trust agreement.
- (4) The bond must guarantee that the owner or operator will:
- (i) Fund the standby trust fund in an amount equal to the penal sum of the bond before the beginning of final closure of the facility; or
- (ii) Fund the standby trust fund in an amount equal to the penal sum within 13 days. Ifer an administrative order to begin final closure issued by the Regional Administrator becomes final, or within 15 days after an order to begin final closure is issued by a U.S. district court or other court of competent jurisdiction; or

[264.143(b)(4)(ii) amended by 51 FR 16443, May 2, 1986]

- fill) Provide alternate financial assurance as specified in this section, and obtain the Regional Administrator's written approval of the assurance provided, within 90 days after receipt by both the owner or operator and the Regional Administrator of a notice of cancellation of the bond from the surety.
- (5) Under the terms of the bond, the surety will become liable on the bond obligation when the owner or operator falls to perform as guaranteed by the bond.
- (6) The penal sum of the bond must be in an amount at least equal to the current closure cost estimate, except as provided in § 264.143(g).
- (7) Whenever the current closure cost estimate increases, to an amount greater then the penal sum, the owner or operator, within 60 days after the increase, must either cause the penal sum to be increased to an amount at least equal to the current closure cost estimate and submit evidence of such increase to the Regional Administrator, or obtain other financial assurance as specified in this section to cover the increase. Whenever the current closure cost estimate decreases, the penal sum may be reduced to the amount of the current closure cost estimate following written approval by the Regional Administrator.
- (6) Under the terms of the bond, the surety may cancel the bond by sending notice of cancellation by certified mail to the owner or operator and to the Regional Administrator. Cancellation may not occur, however, during the 120 days beginning on the date of re-

- ceipt of the riotice of cancellation by both the owner or operator and the Regional Administrator, as evidence by the return receipts.
- (9) The owner or operator may cancel the bond if the Regional Administrator has given prior written consent based on his receipt of evidence of alternate financial assurance as specified in this section.
- (c) Surety bond guaranteeing per-formance of closure. (1) An owner or operator may astisfy the requirements of this section by obtaining a surety bond which conforms to the requirements of this paragraph and submit-ting the bond to the Regional Administrator. An owner or operator of a new facility must submit the bond to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for treatment, storage, or disposal. The bond must be effective before this initial receipt of hazardous waste. The surety company issuing the bond must, at a minimum, be among those listed as acceptable sureties on Federal bonds in Circular 570 of the U.S. Department of the Treasury.
- (2) The wording of the surety bond must be identical to the wording specified in § 264.151(c).
- (3) The owner or operator who uses a surety bond to satisfy the requirements of this section must also establish a standby trust fund. Under the terms of the bond, all payments made thereunder will be deposited by the surety directly into the standby trust fund in accordance with instructions from the Regional Administrator. This standby trust must meet the requirements specified in § 264.143(a), except that:
- (i) An originally signed duplicate of the trust agreement must be submitted to the Regional Administrator with the surety bond; and
- (ii) Unless the standby trust fund is funded pursuant to the requirements of this section, the following are not required by these regulations:
- (A) Payments into the trust fund as specified in § 264.143(a);
 (B) Updating of Schedule A of the
- trust agreement (see § 264.151(a)) to show current closure cost estimates;
- (C) Annual valuations as required by the trust agreement; and
- (D) Notices of nonpayment as required by the trust agreement.

- (4) The bond must guarantee that
- the owner or operator will:

 (1) Perform final closure in accordance with the closure pian and other requirements of the permit for the facility whenever required to do so; or
- (ii) Provide alternate financial assurance as specified in this section, and obtain the Regional Administrator's written approval of the assurance provided, within 80 days after receipt by both the owner or operator and the Regional Administrator of a notice of onncellation of the bond from the surety.
- (5) Under the terms of the bond, the surety will become liable on the bond obligation when the owner or operator fails to perform as guaranteed by the bond. Pollowing a final administrative determination pursuant to section 3008 of RCRA that the owner or operator has failed to perform final closure in accordance with the approved closure plan and other permit requirements when required to do so, under the terms of the bond the surety will perform final closure as guaranteed by the bond or will deposit the amount of the penal sum into the standby trust.
- [264.143(c)(5) amended by 51 FR 16443, May 2, 1986]
- (8) The penal sum of the bond must be in an amount at least equal to the current closure cost estimate.
- (7) Whenever the current closure cost estimate increases to an amount greater than the penal sum, the owner or operator, within 60 days after the increase, must either cause the penal sum to be increased to an amount at least equal to the current closure cost estimate and submit evidence of such increase to the Regional Administrator, or obtain other financial assurance as specified in this section. Whenever the current closure cost estimate decreases, the penal sum may be reduced to the amount of the current closure cost estimate following written approval by the Regional Administrator.
- (8) Under the terms of the bond, the surety may canel the bond by sending notice of cancellation by certified mail to the owner or operator and to the Regional Administrator. Cancellation may not occur, however, during the 120 days beginning on the date of receipt of the notice of cancellation by

- both the owner or operator and the Regional Administrator, as evidenced by the return receipts.
- (6) The owner or operator may cancel the bond if the Regional Administrator has given prior written consent. The Regional Administrator will provide such written consent when:
- An owner or operator substitutes alternate financial assurance as specified in this section; or
- (ii) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with § 264.143(f).
- (10) The surety will not be liable for deficiencies in the performance of closure by the owner or operator after the Regional Administrator releases the owner or operator from the requirements of this section in accordance with \$264.143(1).
- (d) Closure letter of credit. (1) An owner or operator may satisfy the requirements of this section by obtain-ing an irrevocable standby letter of credit which conforms to the requirements of this paragraph and submitting the letter to the Regional Administrator. An owner or operator of a new facility must submit the letter of credit to the Regional Administrator at least 60 days before the date on which hazardous waste is first received treatment, storage, or disposal. for The letter of credit must be effective before this initial receipt of hazardous waste. The issuing institution must be an entity which has the authority to issue letters of credit and whose letterof-credit operations are regulated and examined by a Federal or State
- (2) The wording of the letter of credit must be identical to the wording specified in § 264.151(d).
- (3) An owner or operator who uses a letter of credit to satisfy the requirements of this section must also establish a standby trust fund. Under the terms of the letter of credit, all amounts paid pursuant to a draft by the Regional Administrator will be deposited by the issuing institution directly into the standby trust fund in accordance with instructions from the Regional Administrator. This standby trust fund must meet the requirements of the trust fund specified in 1264.143(a), except that:

- (!) An originally signed duplicate of the trust agreement must be submitted to the Regional Administrator with the letter of credit; and
- (ii) Unless the standby trust fund is funded pursuant to the requirements of this section, the following are not required by these regulations:
- (A) Payments into the trus; fund as specified in § 264.143(a);
- (B) Updating of Schedule A of the trust agreement (see § 264.151(a)) to show current closure cost estimates:
- (C) Annual valuations as required by the trust agreement; and (D) Notices of nonpayment as re-
- (D) Notices of nonpayment as required by the trust agreement.
- (4) The letter of credit must be accompanied by a letter from the owner or operator referring to the letter of credit by number, issuing institution, and date, and providing the following information: the EPA Identification Number, name, and address of the facility, and the amount of funds assured for closure of the facility by the letter of credit.
- (6) The letter of credit must be irrevocable and issued for a period of a least I year. The letter of credit must provide that the expiration date will be automatically extended for a period of at least I year unless, at least 120 days before the current expiration date, the issuing institution notifies both the owner or operator and the Regional Administrator by certified mail of a decision not to extend the expiration date. Under the terms of the letter of credit, the 120 days will begin on the date when both the owner or operator and the Region Administrator have received the notice, as evidenced by the return receipts.
- (6) The letter of credit must be issued in an amount at least equal to the current closure cost estimate, except as provided in § 264.143(g).
- (1) Whenever the current closure cost estimate increases to an amount greater than the amount of the credit, the owner or operator, within 60 days after the increase, must either cause the amount of the credit to be increased so that it at least equals the current closure cost estimate and submit evidence of such increase to the Regional Administrator, or obtain other financial assurance as specified in this section to cover the increase. Whenever the current closure coeft es-

timate decreases, the amount of the credit may be reduced to the amout of the current closure cost estimate following written approval by the Regional Administrator.

(6) Following a final administrative determination pursuant to section 3008 of RCRA that the owner or operator has failed to perform final closure in accordance with the closure plan and other permit requirements when required to do so, the Regional Administrator may draw on the letter of credit.

[264.143(d)(8) amended by 51 FR 16443, May 2, 1986]

(9) If the owner or operator does not establish alternate financial assurance as specified in this section and obtain written approval of such alternate assurance from the Regional Adminis-trator within 90 days after receipt by both the owner or operator and the Regional Administrator of a notice from issuing institution that it has decided not to extend the letter of credit beyond the current expiration date. the Regional Administrator will draw on the letter of credit. The Regional Administrator may delay the drawing if the issuing institution grants an ex-tension of the term of the credit. During the last 30 days of any such extension the Regional Administrator will draw on the letter of credit if the owner or operator has failed to provide alternate financial assurance as specified in this section and obtain written approval of such assurance from the Regional Administrator.

(10) The Regional Administrator will return the letter of credit to the issuing institution for termination when:
(1) An owner or operator substitutes

(I) An owner or operator substitutes alternate financial assurance as specified in this section; or

(ii) The Regional Administrator releases the owner or operator from the requirements of this section in accord-

ance with § 264.143(1).

(c) Closure insurance. (1) An owner or operator may satisfy the requirements of this section by obtaining closure insurance which conforms to the requirements of this paragraph and submitting a certificate of such insurance to the Regional Administrator. An owner or operator of a new facility must submit the certificate of insurance to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for

treatment, storage, or disposal. The insurance must be effective before this initial receipt of hazardous waste. At a minimum, the insurer must be licensed to transact the business of insurance, or eligible to-provide insurance as a excess or suplus lines insurer, in one or more States.

(2) The wording of the certificate of insurance must be identical to the wording specified in § 264.151(e).

(3) The closure insurance policy must be issued for a face amount at least equal to the current closure cost estimate, except as provided in \$264.143(g). The term "face amount" means the total amount the insurer is obligated to pay under the policy. Actual payments by the insurer will not change the face amount, although the insurer's future liability will be lowered by the amount of the payments.

(4) The closure insurance policy must guarantee that funds will be available to close the facility whenever final closure occurs. The policy must also guarantee that once final closure begins, the insurer will be responsible for paying out funds, up to an amount equal to the face amount of the policy, upon the direction of the Regional Administrator, to such party or parties as the Regional Administrator specifies.

(5) After beginning partial or final closure, an owner or operator or any other person authorized to conduct closure may request reimbursements for closure expenditures by submitting nized bills to the Regional Adminis trator. The owner or operator may request reimbursements for partial closure only if the remaining value of the policy is sufficient to cover the maximum costs of closing the facility over its remaining operating life. Within 60 days after receiving bills for closure activities, the Regional Administrator will instruct the insurer to make reimbursements in such amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the partial or final closure expenditures are in accordance with the approved closure plan or otherwise justified. If the Regional Ad-ministrator has reason to believe that the maximum cost of closure over the remaining life of the facility will be aignficantly greater than the face amount of the policy, he may with-hold reimbursements of such amounts as he deems prudent until he determines, in accordance with § 264.143(1), that the owner or operator is no longer required to maintain financial assumes for final closure of the facility. If the Regional Administrator does not instruct the insurer to make such reimbursements, he will provide the owner or operator with a cetailed written statement of reasons.

[264.143(e)(5) revised by 51 FR 16443, May 2, 1986]

- (8) The owner or operator must maintain the policy in full force and effect until the Regional Administraconsents to termination of the policy by the owner or operator as specified in paragraph (e)(10) of this section. Failure to pay the premium, without substitution of alternate financial assurance as specified in this section, will constitute a significant violation of these regulations, warranting such remedy as the Regional Administrator deems necessary. Such violation will be deemed to begin upon receipt by the Regional Adminstrator of a notice of future cancellation, termination, or failure to renew due to nonpayment of the premium, rather than upon the date of expiration.
- (7) Each policy must contain a provision allowing assignment of the policy to a successor owner or operator. Such assignment may be conditional upon consent of the insurer, provided such consent is not unreasonably refused.
- (8) The policy must provide that the insurer may not cancel, terminate, or fail to renew the policy except for failure to pay the premium. The automatic renewal of the policy must, at a minimum, provide the insured with the option of renewal at the face amount of the expiring policy. If there is a failure to pay the premium, the insurer may elect to cancel, terminate, or fail to renew the policy by sending notice by certified mail to the owner or operator and the Regional Administrator. Cancellation, termination, or failure to renew may not occur, however, during the 120 days beginning with the date of receipt of the notice by both the Regional Administrator and the owner or operator, as evidenced by the return receipts. Cancellation, ter minstlon, or failure to renew may not occur and the policy will remain in full force and effect in the event that on or before the date of expiration:

- (1) The Regional Administrator
- deems the facility abandoned; or
 (ii) The permit is terminated or re-

voked or a new permit is denied; or (iii) Closure is ordered by the Regional Administrator or a U.S. district court or other court of competent ju-

risdiction; or
(iv) The owner or operator is named
as debtor in a voluntary or involuntary
proceeding under Title 11 (Bankrupt-

cy), U.S. Code; or (v) The premium due is paid.

(9) Whenever the current closure cost estimate increases to an amount greater than the face amount of the policy, the owner or operator, within 60 days after the increase, must either cause the face amount to be increased to an amount at least equal to the current closure cost estimate and submit evidence of such increase to the Rerional Administrator, or obtain other financial assurance as specified in this section to cover the increase. Whenever the current closure cost estimate decreases, the face amount may be reduced to the amount of the current closure cost estimate following written approval by the Regional Administra tor

(10) The Regional Administrator will give written consent to the owner or operator that he may terminate the insurance policy when:

 (i) An owner or operator substitutes alternate financial assurance as specified in this section; or

(ii) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with § 264.143(i).

(f) Financial lest and corporate guarantee for closure. (1) An owner or operator may satisfy the requirements of this section by demonstraing that he passes a financial test as specified in this paragraph. To pass this test the owner or operator must meet the criteria of either paragraph (fX1XI) or (fX1XII) of this section.

(i) The owner or operator must have: (A) Two of the following three ratios: a ratio of total liabilities to net worth less than 2.0; a ratio of the sum of net income plus depreciation, depletion, and amortization to total liabilities greater than 0.1; and a ratio of current assets to current liabilities greater than 1.5; and

paragraph (f)(1) of this section ref

(B) Net working capital and tangible net worth each at least six times the sum of the current closure and postclosure cost estimates and the current plugging and abandonment cost estimates; and

[264.143(f)(1)(i)(B) amended by 51 FR 16443, May 2, 1986]

(C) Tangible net worth of at least \$10 million; and

(D) Assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

[264.143(f)(1)(i)(D) amended by 51 FR 16443, May 2, 1986]

(ii) The owner or operator must have:

(A) A current rating for his most recent bond issuance of AAA, AA, A, or BBB as issued by Standard and Poor's or Aaa, Aa, A, or Baa as issued by Moody's; and

(B) Tangible net worth at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

[264.143(f)(1)(ii)(B) amended by 51 FR 16443, May 2, 1986]

- (C) Tangible net worth of at least \$10 million; and
- (D) Assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

[264.143(f)(1)(ii)(D) amended by 51 FR 16443, May 2, 1986]

(2) The phrase "current closure and post-closure cost estimates" as used in paragraph (fX1) of this section refers to the cost estimates required to be shown in paragraphs 1-4 of the letter from the owner's or operator's chief financial officer (§ 284.151(1)). The phrase "current plugging and abandonment cost estimates" as used in paragraph (fX1) of this section refers

to the cost estimates required to be shown in paragraphs 1-4 of the letter from the owner's or operator's chief financial officer (§ 144.70(f) of this title).

[264.143(f)(2) revised by 51 FR 16443, May 2, 1986]

- (3) To demonstrate that he meets this test, the owner or operator must submit the following items to the Regional Administrator:
- (i) A letter signed by the owner's or operator's chief financial officer and worded as specified in § 264.151(f); and (ii) A copy of the independent certified public accountant's report on examination of the owner's or operator's financial statements for the latest completed fiscal year; and

(iii) A special report from the owner's or operator's independent certified public accountant to the owner or operator stating that:

(A) He has compared the data which the letter from the chief linnatia officer apecifies as having been derived from the independently audited, yearend financial statements for the latest flacal year with the amounts in such financial statements; and

(B) In connection with that procedure, no matters came to his attention which caused him to believe that the specified data should be adjusted.

(4) An owner or operator of a new facility must submit the items specified in paragraph (fx3) of this section to the Regional Administrator at lesst 60 days before the date on which hazardous waste is first received for treatment, storage, or disposal.

(5) After the Initial aubmission of items specified in paragraph (70.3) of this section, the owner or operator must send updated information to the Regional Administrator within 60 days after the close of each succeeding fuscal year. This information must consist of all three items specified in paragraph (70.3) of this section.

(6) If the owner or operator no longer meets the requirements of paragraph (fXI) of this section, he must send notice to the Regional Administrator of intent to establish alternate financial assurance as specified in this section. The notice must be sent by certified mail within 90 days after the end of the fiscal year for which

[Sec. 264.143(f)(6)]

the year-end financial data show that the owner or operator no longer meets the requirements. The owner or opera-tor must provide the alternate finantor must provide the alternate limin-cial assurance within 120 days after the end of such fiscal year. (7) The Regional Administrator may, based on a reasonable belief that

the owner or operator may no longer meet the requirements of paragraph (f)(1) of this section, require reports of financial condition at any time from the owner or operator in addition to those specified in paragraph (fX3) of this section. If the Regional Administrator finds, on the basis of such re-ports or other information, that the owner or operator no longer meets the requirements of paragraph (f)(1) of this section, the owner or operator must provide alternate financial assurance as specified in this section within 30 days after notification of such a finding.

(8) The Regional Administrator may disallow use of this test on the basis of qualifications in the opinion expressed by the independent certified public accountant in his report on examination of the owner's or operator's financial statements (see paragraph (fX3XII) of this section). An adverse opinion or a disclaimer of opinion will be cause for disallowance. The Regional Administrator will evaluate other qualifications on an individual basis. The owner or operator must provide alternate financial assurance as specified in this section within 30 days after notification of the disallowance.

(9) The owner or operator is no longer required to submit the items specified in paragraph (fX3) of this section when:

(i) An owner or operator substitutes alternate financial assurance as specified in this section; or

(ii) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with § 264.143(1).

(10) An owner or operator may meet the requirements of this section by obtaining a written guarantee, hereafter referred to as "corporate guarantee."
The guarantor must be the parent corporation of the ow er or operator. The guarantor must meet the requirements for owners or operators in paragraphs (f)(1) through (f)(8) of this section and must comply with the terms of the corporate guarantee. The word-trust fund for the other mechanisms. ting of the corporate guarantee must A single standby trust fund may be es-

be identical to the wording specified in \$ 264.151(h). The corporate guarantee must accompany the items sent to the Regional Administrator as specified in paragraph (fx3) of this section. The terms of the corporate guarantee must provide that:

(i) If the owner or operator falls to perform final closure of a facility covered by the corporate guarantee in accordance with the closure plan and other permit requirements whenever required to do so, the guarantor will do so or establish a trust fund as speci-fied in § 254.143(a) in the name of the

owner or operator.

(ii) The corporate guarantee will remain in force unless the guarantor sends notice of cancellation by certified mail to the owner or operator and to the Regional Administrator. Cancellation may not occur, however, during the 120 days beginning on the date of receipt of the notice of cancellation by both the owner or operator and the Regional Administrator, as evidenced by the return receipts.

(ill) If the owner or operator fails to provide alternate financial assurance as specified in this section and obtain the written approval of such alternate assurance from the Regional Administrator within 90 days after receipt by both the owner or operator and the Regional Administrator of a notice of cancellation of the corporate guarantee from the guarantor, the guarantor will provide such alternative financial assurance in the name of the owner or operator.

(g) Use of multiple financial mechanisms. An owner or operator may astisfy the requirements of this section by establishing more than one finan-cial mechanism per facility. These mechanisms are limited to trust funds, surety bonds guaranteeing payment into a trust fund, letters of credit, and insurance. The mechanisms must be as specified in paragraphs (a), (b), (d), and (e), respectively, of this section, except that it is the combination of mechanisms, rather than the single mechanism, which must provide financial assurance for an amount at least equal to the current closure cost estimate. If an owner or operator uses a trust fund in combination with a surety bond or a letter of credit, he may use the trust fund as the standby

tablished for two or more mechanisms The Regional Administrator may use any or all of the mechanisms to provide for closure of the facility.

(h) Use of a financial mechanism for multiple facilities. An owner or opera-tor may use a financial assurance mechanism specified in this section to meet the requirements of this section for more than one facility. Evidence of financial assurance submitted to the Regional Administrator must include a list showing, for each facility, the EPA Identification Number, name, address. and the amount of funds for closure assured by the mechanism. If the facilities covered by the mechanism are in more than one Region, identical evidence of financial assurance must be submitted to and maintained with the Regional Administrators of all such Regions. The amount of funds available through the mechanism must be no less than the sum of funds that would be available if a separate mechanism had been established and main-tained for each facility. In directing funds available through the mechanism for closure of any of the facilities covered by the mechanism, the Regional Administrator may direct only the amount of funds designated for that facility, unless the owner or operator agrees to the use of additional funds available under the mechanism.

(1) Release of the owner or operator from the requirements of this section Within 60 days after receiving certifi-cations from the owner or operator and an independent registered professional engineer that final closure has been completed in accordance with the approved closure plan, the Regional Administrator will notify the owner or operator in writing that he is no longer required by this section to maintain financial assurance for final closure of the facility, unless the Regional Administrator has reason to believe that final closure has not been in accordance with the approved closure plan. The Regional Administrator shall provide the owner or operator a detailed written statement of any such reason to believe that closure has not een in accordance with the approved closure plan.

[264.143(i) revised by 51 FR 16443, May 2, 1986]

§ 264.144 Cost estimate for post-closure care.

(a) The owner or operator of a disposal surface Impoundment, disposal miscellaneous unit, land treatment unit, or landfill unit, or of a surface impoundment or waste pile required under §§ 284.228 and 264.258 to prepare a contingent closure and post-closure plan, must have a detailed written estimate, in current dollars, of the annual cost of post-closure monitoring and maintenance of the facility in accordance with the applicable post-closure regulations in §§ 264.117 through 384.120, 264.228, 284.258, 284.280, 294.310, and 284.801.

[264.144 (a) introductory test amended by 52 FR 46963, December 10, 1987]

(1) The post-closure cost estimate must be based on the cost to the owner or operator of hiring a third party to conduct post-closure care activities. A third party is a party who is neither a parent nor a subsidiary of the owner or operator. (See definition of parent corporation in §264.141(d.))

(2) The post-closure cost estimate is calculated by multiplying the annual post-closure cost estimate by the number of years of post-closure care required under § 284.117.

[264.144 (a) and (b) introductory text revised by 51 FR 16443, May 2, 1986]

(b) During the active life of the facility, the owner or operator must adjust the post-closure cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with § 264.145. owners or operators using the financial test or corporate guarantee, the post-closure cost estimate must be updated for inflation within 30 days after the close of the firm's fiscal year and before the submission of updated information to the Regional Adminis-trator as specified in § 264.145(fx5). The adjustment may be made by recalculating the post-closure cost esti-mate in current dollars or by using an inflation factor derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its Survey of Current Business as spec-ified in § 264.145(bX1) and (2). The inflation factor is the result of dividing the latest published annual Deflator by the Deflator for the previous year.

(1) The first adjustment is made by multiplying the post-closure cost estimate by the inflation factor. The result is the adjusted post-closure cost estimate

(2) Subsequent adjustments are made by multiplying the latest adjusted post-closure cost estimate by the latest inflation factor.

(c) During the active life of the facility, the owner or operator must revise the post-closure cost estimate within 30 days after the Regional Administrator has approved the request to modify the post-closure plan, if the change in the post-closure plan increases the cost of post-closure care. The revised post-closure cost estimate must be adjusted for inflation as specified in §264.144(b).

[264.144(c) amended by 51 FR 16443, May 2, 1986]

(d) The owner or operator must keep the following at the facility during the operating life of the facility: The latest post-closure cost estimate prepared in accordance with § 264,144 (a) and (c) and, when this estimate has been adjusted in accordance with § 264,144(b), the latest adjusted post-closure cost estimate.

264.145 Financial assurance for post-clo-

The owner or operator of a hazardous waste management unit subject to the requirements of § 264.144 must establish financial assurance for postclosure care in accordance with the approved post-closure plan for the facility 80 days prior to the initial receipt of hazardous waste or the effective date of the regulation, whichever is later. Re must choose from the following options:

[264.145 introductory paragraph revised by 51 FR 16443, May 2, 1986]

(a) Post-closure (rust fund. (1) An owner or operator may satisfy the requirements of this section by establishing a post-closure trust fund which conforms to the requirements of this paragraph and submitting an originally signed duplicate of the trust agreement to the Regional Administrator. An owner or operator of a new facility must submit the originally signed duplicate of the trust agreement to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for disposal.

The trustee must be an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a Federal or State agency.

- (2) The wording of the trust agreement must be identical to the wording specified in § 284.151(av1), and the trust agreement must be accompanied by a formal certification of acknowledgment (for example, see § 264.181(ax2)). Schedule A of the trust agreement must be updated within 60 days after a change in the amount of the current post-closure cost estimate covered by the agreement.
- (3) Payments into the trust fund must be made sanually by the owner or operator over the term of the initial RCRA permit or over the remaining operating life of the facility as estimated in the closure plan, whichever period is shorter; this period is hereafter referred to as the "pay-in period." The payments into the post-closure trust fund must be made as follows:
- (i) For a new facility, the first payment must be made before the initial receipt of hazardous waste for disposal. A receipt from the trustee for this payment must be submitted by the owner or operator to the Regional Administrator before this initial receipt of hazardous waste. The first payment must be at least equal to the current post-closure cost estimate, except as provided in § 264.145(g), divided by the number of years in the pay-in period. Subsequent payments must be made no later than 30 days after each similar than 40 days of the first payment. The amount of each subsequent payment must be determined by this formula:

where CE is the current post-closure cost estimate, CV is the current value of the trust fund, and Y is the number of years remaining in the pay-in period.

(ii) If an owner or operator establishes a trust fund as specified in §285.145(a) of this chapter, and the value of that trust fund is less than the current post-closure cost estimate when a permit is awarded for the facility, the amount of the current post-closure cost estimate still to be peld closure cost estimate still to be peld.

into the fund must be paid in over the pay-in period as defined in paragraph (ax3) of this section. Payments must continue to be made no later than 30 days after each anniversary date of the first payment made pursuant to Part 285 of this chapter. The amount of each payment must be determined by this formula:

where CE is the current post-closure cost estimate, CV is the current value of the trust fund, and Y is the number of years remaining in the pay-in period.

- (4) The owner or operator may accelerate payments into the trust fund or he may deposit the full amount of the current post-closure cost estimate at the time the fund is established. However, he must maintain the value of the fund at no less than the value that the fund would have if annual payments were made as specified in paragraph (a\colon 3) of this section.
- (5) If the owner or operator establishes a post-closure trust fund after having used one or more alternate mechanisms specified in this section or in \$265.145 of this chapter, his first payment must be in at least the amount that the fund would contain if the trust fund were established initially and annual payments made according to specifications of this paragraph and \$265.145(a) of this chapter, as applicable.
- (6) After the pay-in period is completed, whenever the current post-ciosure cost estimate changes during the operating life of the facility, the owner or operator must compare the new estimate with the trustee's most recent annual valuation of the trust fund. If the value of the fund is less than the amount of the new estimate, the owner or operator, within 60 days after the change in the cost estimate. must either deposit an amount into the fund so that its value after this de posit at least equals the amount of the current post-closure cost estimate, or obtain other financial assurance as specified in this section to cover the difference.
- (7) During the operating life of the facility, if the value of the trust fund is greater than the total amount of the current post-closure cost estimate.

the owner or operator may submit a written request to the Regional Administrator for release of the amount in excess of the current post-closure cost estimate.

- (6) If an owner or operator substitutes other financial assurance as specified in this section for all or part of the trust fund, he may submit a written request to the Regional Administrator for release of the amount in excess of the current post-closure cost estimate covered by the trust fund.
- (6) Within 60 days after receiving a request from the owner or operator for release of funds as specified in paragraph (a) (7) or (8) of this section, the Regional Administrator will instruct the trustee to release to the owner or operator such funds as the Regional Administrator specifies in writine.
- (10) During the period of post-closure care, the Regional Administrator may approve a release of funds if the owner or operator demonstrates to the Regional Administrator that the value of the trust fund exceeds the remaining cost of post-closure care.
- (11) An owner or operator or any other person authorized to conduct post-closure care may request reimbursements for post-closure care expenditures by submitting itemized bills to the Regional Administrator. Within 60 days after receiving bills for post-closure care activities, the Regional Administrator will instruct the trustee to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the post-closure care expenditures are in accordance with the approved post-closure plan or otherwise justified. If the Regional Administrator does not instruct the trustee to make such reimstruct the trustee to make such reimstructure of the provide the owner or operator with a detailed written statement of reasons.

[264.145(s)(11) revised by 51 FR 16443, May 2, 1986]

- (12) The Regional Administrator will agree to termination of the trust when:
- (i) An owner or operator substitutes alternate financial assurance as specified in this section: or
- (ii) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with § 264.145(i).

- (b) Surety bond guaranteeing payment into a post-closure trust fund. (1) An owner or operator may satisfy the requirements of this section by obtaining a surety bond which conforms to the requirements of this paragraph and submitting the bond to the Regional Administrator. An owner or op-erator of a new facility must submit the bond to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for disposal. The bond must be effective before this initial receipt of hazardous waste. The surety company is-suing the bond must, at a minimum, be among those listed as acceptable sureties on Federal bonds in Circular 570 of the U.S. Department of the Treasury.
- (2) The wording of the surety bond must be identical to the wording specified in § 264.151(b).
- (3) The owner or operator who uses a surety bond to satisfy the requirements of this section must also establish a standby trust fund. Under the terms of the bond, all payments made thereunder will be deposited by the surety directly into the standby trust fund in accordance with instructions from the Regional Administrator. This standby trust fund must meet the requirements specified in § 264.145(a), except that:
- (i) An originally signed duplicate of the trust agreement must be submitted to the Regional Administrator with the surety bond; and
- (ii) Until the standby trust fund is funded pursuant to the requirements of this section, the following are not required by these regulations:
- (A) Payments into the trust fund as specified in § 264.145(a);
- (B) Updating of Schedule A of the trust agreement (see § 264.151(a)) to show current post-closure cost estimates;
- (C) Annual valuations as required by the trust agreement; and (D) Notices of nonpayment as re-
- (D) Notices of nonpayment as required by the trust agreement.
- (4) The bond must guarantee that the owner or operator will:
- (i) Fund the standby trust fund in an amount equal to the penal sum of the bond before the beginning of final closure of the facility; or

(ii) Pund the standby trust fund in an amount equal to the penal aum within 15 days after an administrative order to begin final closure issued by the Regional Administrator becomes final, or within 15 days after an order to begin final closure is issued by a U.S. district court or other court of competent jurisdiction;

[264.145(b)(4)(ii) revised by 51 FR 16443, May 2, 1986]

- (iii) Provide alternate financial assurance as specified in this section, and obtain the Regional Administrator's written approval of the assurance provided, within 90 days after receipt by both the owner or operator and the Regional Administrator of a notice of cancellation of the bond from the surety
- (5) Under the terms of the bond, the surety will become liable on the bond obligation when the owner or operator fails to perform as guaranteed by the hond
- (6) The penal sum of the bond must be in an amount at least equal to the current post-closure cost estimate, except as provided in § 264.145(g).
- (7) Whenever the current post-closure cost estimate increases to an amount greater than the penal sum. the owner or operator, within 60 days after the increase, must either cause the penal sum to be increased to an amount at least equal to the current post-closure cost estimate and submit evidence of such increase to the Regional Administrator, or obtain other financial assurance as specified in this section to cover the increase. Whenever the current post-closure cost estimate decreases, the penal sum may be reduced to the amount of the current post-closure cost estimate following written approval by the Regional Administrator.
- (8) Under the terms of the bond, the surety may cancel the bond by sending notice of cancellation by certified mail to the owner or or operator and to the Regional Administrator, Cancellation may not occur, however, during the 210 days beginning on the date of receipt of the notice of cancellation by both the owner or operator and the Regional Administrator, as evidenced by the return receipts.

(9) The owner or operator may cancel the bond if the Regional Administrator has given prior written consent based on his receipt of evidence of alternate financial assurance as specified in this section.

(c) Surety bond guaranteeing performance of post-closure care. (1) An owner or operator may satisfy the requirements of this section by obtaining a surety bond which conforms to requirements of this paragraph and submitting the bond to the Regional Administrator. An owner or operator of a new facility must submit the bond to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for disposal. The bond must be effective before this initial receipt of hazardous waste. The surety company issuing the bond must, at a minimum, be among those listed as acceptable sureties on Federal bonds in Circular 570 of the U.S. Department of the Treasury.

- (2) The wording of the surety bond must be identical to the wording specified in § 264.151(c).
- (3) The owner or operator who uses a surety bond to satisfy the requirements of this section must also establish a standby trust fund. Under the terms of the bond, all payments made thereunder will be deposited by the surety directly into the standby trust fund in accordance with instructions from the Regional Administrator. This standby trust fund must meet the requirements aspecified in § 204.145(a), except that:
- (i) An originally signed duplicate of the trust agreement must be submitted to the Regional Administrator with the surety bond; and
- (ii) Unless the standby trust fund is funded pursuant to the requirements of this section, the following are not required by these regulations:
- (A) Payments into the trust fund as specified in § 264.145(a);
- (B) Updating of Schedule A of the trust agreement (see § 264.151(a)) to show current post-closure cost esti-
- mates;
 (C) Annual valuations as required by
 the trust agreement; and
- (D) Notices of nonpayment as required by the trust agreement.

 (4) The bond must guarantee that
- the owner or operator will:

- (f) Perform post-closure care in accordance with the post-closure plan and other requirements of the permit for the facility; or
- (ii) Provide alternate financial assurance as aspecified in this section, and obtain the Regional Administrator's written approval of the assurance provided, within 90 days of receipt by both the owner or operator and the Regional Administrator of a notice of cancellation of the bond from the aurety.
- (5) Under the terms of the bond, the surety will become liable on the bond obligation when the owner or operator fuils to perform as guaranteed by the bond. Following a final administrative determination pursuant to section 3008 of RCRA that the owner or operator has failed to perform post-closure care in accordance with the approved postclosure plen and other permit requirements, under the terms of the bond the surety will perform postclosure care in secondance with the post-closure plan and other permit requirements or will deposit the amount of the penal sum into the standby trust

[264 145(c)(5) revised by 51 FR 16443, May 2, 1986]

- (8) The penal sum of the bond must be in an amount at least equal to the current post-closure cost estimate.
- (7) Whenever the current post-cio-sure cost estimate increases to an amount greater than the penal sum during the operating life of the facility, the owner or operator, within 60 days after the increase, must either cause the penal sum to be increased to an amount at least equal to the cur rent post-closure cost estimate and aubmit evidence of such increase to the Regional Administrator, or obtain other financial assurance as specified in this section. Whenever the current post-closure cost estimate decreases during the operating life of the facility, the penal sum may be reduced to the amount of the current post-closure cost estimate following written approval by the Regional Administrator.
- (8) During the period of post-closure care, the Regional Administrator may approve a decrease in the penal sum if the owner or operator demonstrates to the Regional Administrator that the amount exceeds the remaining cost of post-closure care.

[Sec. 264.145(c)(8)]

- (9) Under the terms of the bond, the surety may cancel the bond by sending notice of cancellation by certified mail to the owner or operator and to the Regional Administrator. Cancellation may not occur, however, during the 120 days beginning on the date of re ceipt of the notice of cancellation by both the owner or operator and the Regional Administrator, as evidenced by the return receipts.
- (10) The owner or operator may cancel the bond if the Regional Administrator has given prior written consent. The Regional Administrator will provide such written consent
- alternate financial assurance as specified in this section; or
- (il) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with § 264.145(i).
- (11) The surety will not be liable for deficiencies in the performance of post-closure care by the owner or operator after the Regional Administrator releases the owner or operator from the requirements of this section in accordance with \$264,145(i).
- (d) Post-closure letter of credit. (1) An owner or operator may satisfy the requirements of this section by obtaining an irrevocable standby letter of credit which conforms to the requirements of this paragraph and submit-ting the letter to the Regional Administrator. An owner or operator of a new facility must submit the letter of credit to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for disposal. The letter of credit must effective before this initial receipt of hazardous waste. The issuing institution must be an entity which has the authority to issue letters of credit and whose letter-of-credit operations are regulated and examined by a Federal or State agency.
- (2) The wording of the letter of credit must be identical to the wording specified in § 264.151(d).
- (3) An owner or operator who uses a letter of credit to satisfy the require ments of this section must also establish a standby trust fund. Under the terms of the letter of credit, all amounts paid pursuant to a draft by the Regional Administrator will be de-

rectly into the standby trust fund in accordance with instructions from the Regional Administrator. This standby trust fund must meet the requirements of the trust fund specified in § 264.145(a), except that:

- (i) An originally signed duplicate of the trust agreement must be submitted to the Regional Administrator with the letter of credit; and
- (ii) Unless the standby trust fund is funded pursuant to the requirements of this section, the following are not
- required by these regulations: (A) Payments into the trust fund as specified in § 264.145(a);
- then:

 (B) Updating of Schedule A of the
 (i) An owner or operator substitutes trust agreement (see § 284.151(a)) to show current post-closure cost esti-
 - (C) Annual valuations as required by the trust agreement; and

(D) Notices of poppayment as required by the trust agreement.

(4) The letter of credit must be accompanied by a letter from the owner or operator referring to the letter of credit by number, issuing institution, and date, and providing the following information: the EPA Identification Number, name, and address of the fa-cility, and the amount of funds assured for post-closure care of the facility by the letter of credit.

(5) The letter of credit must be irrevocable and issued for a period of at least 1 year. The letter of credit must provide that the expiration date will e automatically extended for a period of at least 1 year unless, at least 120 days before the current expiration date, the issuing institution notifies both the owner or operator and the Regional Administrator by certified mail of a decision not to extend the expiration date. Under the terms of the letter of credit, the 120 days will begin on the date when both the owner or operator and the Regional Administrator have received the notice, as evidenced by the return receipts.

- (6) The letter of credit must be issued in a amount at least equal to the current post-closure cost estimate, except as provided in § 264.145(g).
- (7) Whenever the current post-closure cost estimate increases to an amount greater than the amount of the credit during the operating life of the facility, the owner or operator, within 60 days after the increase, must posited by the issuing institution di- either cause the amount of the credit

to be increased so that it at least equals the current post-closure cost es-timate and submit evidence of such increase to the Regional Administrator. or obtain other financial assurance as specified in this section to cover the increase. Whenever the current postclosure cost estimate decreases during the operating life of the facility, the amount of the credit may be reduced to the amount of the current post-ciosure cost estimate following written approval by the Regional Administra-

- (8) During the period of post-closure care, the Regional Administrator may approve a decrease in the amount of the letter of credit if the owner or operator demonstrates to the Regional Administrator that the amount ex-
- (9) Following a final administrative determination pursuent to Section 3008 of RCRA that the owner or operator has failed to perform post-closure care in eccordance with the approved postclosure plan and other permit requirements, the Regional Administrator may draw on the letter of credit.

[264.145(d)(9) amended by 51 FR 16443. May 2, 1986]

(10) If the owner or operator does not establish alternate financial assurance as specified in this section and obtain written approval of such alternate assurance from the Regional Administrator within 90 days after receipt by both the owner or operator and the Regional Administrator of a notice from the issuing institution that it has decided not to extend the letter of credit beyond the current expiration date, the Regional Administrator will draw on the letter of credit. The Regional Administrator delay the drawing if the issuing institution grants an extension of the term of the credit. During the last 30 days of any such extension the Regional Administrator will draw on the letter of credit if the owner or operator has failed to provide alternate financial assurance as specified in this section and obtain written approval of such assurance from the Regional Administrator.

(11) The Regional Administrator will return the letter of credit to the issuing institution for termination when:

- (i) An owner or operator substitutes alternate financial assurance as speci-
- fied in this section; or

 (ii) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with \$ 264,145(1).
- (e) Posi-closure insurance. (1) An owner or operator may satisfy the requirements of this section by obtaining post-closure insurance which conforms to the requirements of this paragraph and submitting a certificate of such insurance to the Regional Administrator. An owner or operator of a new facility must submit the certificate of insurance to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for disposal. The insurance must be effective before this initial receipt of hazardous waste. At a mini-mum, the insurer must be licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States.
- (2) The wording of the certificate of insurance must be identical to the wording specified in § 264.151(e).
- (3) The post-closure insurance policy must be issued for a face amount at least equal to the current post-closure cost estimate, except as provided in \$ 264.145(g). The term "face amount" means the total amount the insurer is obligated to pay under the policy. Actual payments by the insurer will not change the face amount, although the insurer's future liability will be lowered by the amount of the pay-
- (4) The post-closure insurance policy must guarantee that funds will be available to provide post-closure care of the facility whenever the post-closure period begins. The policy must also guarantee that once post-closure care begins, the insurer will be responsible for paying out funds, up to an amount equal to the face amount of the policy, upon the direction of the Regional Administrator, to such party or parties as the Regional Administrator specifies.
- (5) An owner or operator or any other person authorized to conduct postclosure care may request reimbureements for post-closure care expenditures by submitting Itemized bills to the Regional Administrator. Within 60 days after receiving bills for post-closure care activities, the Regional

Administrator will instruct the insurer to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the post-closure care expenditures are in accordance with the approved post-closure plan or otherwise justified. If the Regional Administrator does not instruct the insurer to make such reimbursements, he will provide the owner or operator with a detailed written statement of reasons.

[264.145(e)(5) revised by 51 FR 16443, May 2, 19861

- (6) The owner or operator must maintain the policy in full force and effect until the Regional Administraconsents to termination of the policy by the owner or operator as specified in paragraph (e)(11) of this section. Pailure to pay the premium. without substitution of alternate financial assurance as specified in this section, will constitute a significant violation of these regulations, warranting such remedy as the Regional Administrator deems necessary. Such violation will be deemed to begin upon receipt by the Regional Administrator of a notice of future cancellation, termination, or fallure to renew due to nonpayment of the premium, rather than upon the date of expiration.
- (7) Each policy must contain a provision allowing assignment of the policy to a successor owner or operator. Such assignment may be conditional upon consent of the insurer, provided such consent is not unreasonably refused.
- (8) The policy must provide that the insurer may not cancel, terminate, or fall to renew the policy except for fallure to pay the premium. The automatic renewal of the policy must, at a minimum, provide the insured with the option of renewal at the face amount of the expiring policy. If there is a fallure to pay the premium, the insurer may elect to cancel, terminate, or fail to renew the policy by sending notice by certified mail to the owner or operator and the Regional Administrator. Cancellation, termination, or failure to renew may not occur, however, during the 120 days beginning with the date of receipt of the notice by both the Regional Administrator and the owner or operator, as evidenced by the return receipts. Cancellation, termination, or failure to renew may not occur and the policy will remain in full quirements of this section by demon-

- force and effect in the event that on or before the date of expiration:
- (i) The Regional Administrator deems the facility abandoned; or (ii) The permit is terminated or re-
- voked or a new permit is denied; or (iii) Closure is ordered by the Re-gional Administrator or a U.S. district court or other court of competent ju-
- risdiction; or (iv) The owner or operator is named as debtor in a voluntary or involuntary proceeding under Title 11 (Bankrupt cv), U.S. Code: or
 - (v) The premium due is paid.
- (9) Whenever the current post-closure cost estimate increases to an amount greater than the face amount of the policy during the operating life of the facility, the owner or operator, within 60 days after the increase, must either cause the face amount to be increased to an amount at least equal to the current post-closure cost estimate and submit evidence of such increase to the Regional Administrator, or obtain other financial assurance as specified in this section to cover the increase Whenever the current postclosure cost estimate decreases during the operating life of the facility, the face amount may be reduced to the amount of the current post-closure cost estimate following written approval by the Regional Administrator.
- (10) Commencing on the date that liability to make payments pursuant to the policy accrues, the insurer will thereafter annually increase the face amount of the policy. Such increase must be equivalent to the face amount of the policy, less any payments made, multiplied by an amount equivalent to 85 percent of the most recent investment rate or of the equivalent couponissue yield announced by the U.S. Treasury for 26-week Treasury securi-
- (11) The Regional Administrator will give written consent to the owner or operator that he may terminate the insurance policy when:
- (1) An owner or operator substitutes alternate financial assurance as specified in this section; or
- (li) The Regional Administrator releases the owner or operator from the requirements of this section in accord-
- ance with § 264.145(1)
 (f) Financial less and corporate guarantee for post-closure care. (1) An owner or operator may satisfy the re-

strating that he passes a financial test as specified in this paragraph. To pass this test the owner or operator must meet the criteria of either paragraph (fX1Xi) or (fX1Xii) of this section:

- (i) The owner or operator must have:

 (A) Two of the following three
 ratios: a ratio of total liabilities to net
 worth less than 2.0; a ratio of the sum
 of net income plus depreciation, depiction, and amortization to total liabilties greater than 0.1; and a ratio of
 current assets to eurrent liabilities
 greater than 1.5; and
- (B) Net working capital and tangible net worth each at least six times the sum of the current closure and postclosure cost estimates and the current plugging and abandonment cost estimates; and
- [264.145(f)(1)(i)(B) amended by 51 FR 16443, May 2, 1986]
- (C) Tangible net worth of at least \$10 million; and
- (D) Assets in the United States amounting to at least 90 percent of his total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and shandownent cost estimates.
- [264.145(f)(1)(i)(D) amended by 51 FR 16443, May 2, 1986]
- (ii) The owner or operator must
- (A) A current rating for his most recent bond issuance of AAA. AA, A, or BBB as issued by Standard and Poor's or Aaa, Aa, A or Baa as issued by Moody's: and
- (B) Tangible net worth at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

[264.145(f)(1)(ii)(B) amended by 51 FR 16443, May 2, 1986]

(C) Tangible net worth of at least \$10 million, and

[264.145(f)(1)(ii)(D) amended and (2) revised by 51 FR 16443, May 2, 1986]

(D) Assets located in the United States amounting to at least 90 percent of his total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

- (2) The phrase "current closure and post-closure cost estimates" as used in paragraph (f)(1) of this section refers to the cost estimates required to be shown in paragraphs 1-d of the letter from the owner's or operator's chief financial officer (§264.151(f)). The phrase "current plugging and sbandomment cost estimates" as used in paragraph (f)(1) of this section refers to the cost estimates required to be shown in paragraphs 1-d of the letter from the owner's or operator's chief financial officer (§144.70(f) of this Title).
- (3) To demonstrate that he meets this test, the owner or operator must submit the following items to the Regional Administrator:
- (i) A letter signed by the owner's or operator's chief financial officer and worded as specified in § 264.151(f); and (ii) A copy of the independent certi-
- (ii) A copy of the independent certified public accountant's report on examination of the owner's or operator's financial statements for the latest completed fiscal year; and
- (iii) A special report from the owner's or operator's independent certified public accountant to the owner or operator stating that:
- (A) He has compared the data which the letter from the chief financial officer specifies as having been derived from the independently sudied, yearend financial statements for the latest fiscal year with the amounts in such financial statements; and
- (B) In connection with that procedure, no matters came to his attention which caused him to believe that the specified data should be adjusted.
- (4) An owner or operator of a new facility must aubmit the Items specified in paragraph (7/3) of this section to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for disposal.
- 15) After the initial submission of items specified in paragraph (1/3) of this section, the owner or operator must send updated information to the Regional Administrator within 90 days after the close of each succeeding facal year. This information must consist of all three Items specified in paragraph (1/3) of this section.
- (6) If the owner or operator no longer meets the requirements of

paragraph (FXI) of this section, he must send notice to the Regional Administrator of intent to establish alternate financial assurance as specified in this section. The notice must be sent by certified mail within 90 days after the end of the fiscal year for which the year-end financial data show that the owner or operator no longer meets the requirements. The owner or operator must provide the alternate financial assurance within 120 days after the end of such fiscal year.

(7) The Regional Administrator may, based on a reasonable beilef that the owner or operator may no longer meet the requirements of paragraph (f)(1) of this section, require reports of financial condition at any time from the owner or operator in addition to those specified in paragraph (fX3) of this section. If the Regional Administrator finds, on the basis of such reports or other information, that the owner or operator no longer meets the requirements of paragraph (fX1) of this section, the owner or operator must provide alternate financial assurance as specified in this section within 30 days after notification of such a

finding.

(9) The Regional Administrator may disallow use of this test on the basis of qualifications in the opinion expressed by the independent certified public accountant in his report on examination of the owner's or operator's financial statements (see paragraph (fX3XII) of this section). An adverse opinion or a disclaimer of opinion will be cause for disallowance. The Regional Administrator will evaluate other qualifications on an individual basis. The owner or operator must provide alternate financial assurance as specified in this section within 30 days after notification of the disallowance.

(9) During the period of post-closure care, the Regional Administrator may approve a decrease in the current post-closure cost estimate for which this test demonstrates financial assurance if the owner or operator demonstrates to the Regional Administrator that the amount of the cost estimate exceeds the remaining cost of post-closure care.

(10) The owner or operator is no longer required to submit the items specified in paragraph (fX3) of this section when:

(i) An owner or operator substitutes

alternate financial assurance as specified in this section; or

- (ii) The Regional Administrator releases the owner or operator from the requirements of this section in accordance with § 264.145(1).
- (11) An owner or operator may meet the requirements of this section by obtaining a written guarantee, hereafter referred to as "corporate guarantee," The guarantor must be the parent corporation of the owner or operator. The guarantor must meet the requirements for owners or operators in paragraphs (f)(1) through (9) of this section and must comply with the terms of the corporate guarantee. The wording of the corporate guarantee must be identical to the wording specified in § 264.151(h). The corporate guarantee must accompany the Items sent to the Regional Administrator as specified in paragraph (fX3) of this section. The terms of the corporate guarantee must
- (i) If the owner or operator fails to perform post-closure care of a facility covered by the corporate guarantee in accordance with the post-closure plan and other permit requirements whenever required to do so, the guarantor will do so or establish a trust fund as specified in § 264.145(a) in the name of the owner or operator,
- (ii) The corporate guarantee will remain in force unless the guarantor sends notice of cancellation by certifled mail to the owner or operator and to the Regional Administrator, Cancellation may not occur, however, during the 120 days beginning on the date of receipt of the notice of cancellation by both the owner or operator and the Regional Administrator, as evidenced by the return receipts.
- tiii) If the owner or operator falis to provide alternate financial assurance as specified in this section and obtain the written approval of such alternate assurance from the Regional Administrator within 90 days after receipt by both the owner or operator and the Regional Administrator of a notice of cancellation of the corporate guarantee from the guarantor, the guarantor will provide such alternate financial assurance in the name of the owner or operator.
- (g) Use of multiple financial mecha-

isfy the requirements of this section by establishing more than one financial mechanism per facility. mechanisms are limited to trust funds. surety bonds guaranteeing payment into a trust fund, letters of credit, and insurance. The mechanisms must be as specified in paragraphs (a), (b), (d), and (e), respectively, of this section, except that it is the combination of mechanisms, rather than the single mechanism, which must provide financial assurance for an amount at least equal to the current post-closure cost estimate. If an owner or operator uses a trust fund in combination with a surety bond or a letter of credit, he may use the trust fund as the standby trust fund for the other mechanisms. A single standby trust fund may be established for two or more mechanisms. The Regional Administrator may use any or all of the mechanisms to provide for post-closure care of the facili-

- (h) Use of a financial mechanism for multiple facilities. An owner or opera-tor may use a financial assurance mechanism specified in this section to meet the requirements of this section for more than one facility. Evidence of financial assurance submitted to the Regional Administrator must include a list showing, for each facility, the EPA Identification Number, name, address, and the amount of funds for post-closure care assured by the mechanism. If the facilities covered by the mechaniam are in more than one Region, identical evidence of financial assurance must be submitted to and maintained with the Regional Administrators of all such Regions. The amount of funds available through the mechanism must be no less than the sum of funds that would be available if a separate mechanism had been established and maintained for each facility. In directing funds available through the mechanism for post-closure care any of the facilities covered by the mechanism, the Regional Administrator may direct only the amount of funds designated for that facility. unless the owner or operator agrees to the use of additional funds available under the mechanism.
- (i) Release of the owner or operator nisms. An owner or operator may sat from the requirements of this Section.

Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that the post-closure care period has been completed for a hazardous waste disposal unit in accordance with the approved plan, the Regional Administrator will notify the owner or operator that he is no longer required to maintain financial assurance for post-closure care of that unit, unless the Regional Administrator has reason to believe that post-closure care has not been in accordance with the approved post-closure plan. The Regional Administrator shall provide the owner or operator with a detailed written statement of any such reason to believe that post-closure care has not been in accordance with the approved post-closure plan.

[264.145(i) revised by 51 FR 16443, May 2. 19861

\$264.146 Use of a mechanism for financial assurance of both closure and nost-ciosure care.

An owner or operator may satisfy the requirements for financial assurance for both closure and post-closure care for one or more facilities by using a trust fund, surety bond, letter of credit, insurance, financial test, or corporate guarantee that meets the specifications for the mechanism in both \$\$ 264.143 and 264.145. The amount of funds available through the mechanism must be no less than the sum of funds that would be available if a separate mechanism had been established and maintained for financial assurance of closure and of post-closure care.

8 264.147 Liability requirements.

(a) Coverage for sudden accidental occurrences. An owner or operator of a hazardous waste treatment, storage, or disposal facility, or a group of such facilities, must demonstrate financial responsibility for bodily injury and property damage to third parties caused by sudden accidental occurrences arising from operations of the facility or group of facilities. The owner or operator must have and maintain liability coverage for audden accidental occur-

[Sec. 264.147(a)]

rences in the amount of at least \$1 million per occurrence with an annual aggregate of at least \$2 million, exclusive of legal defense costs. This liability coverage may be demonstrated in one of three ways, as specified in paragraphs (aX1), (aX2), and (aX3) of this section:

(1) An owner or operator may demonstrate the required liability coverage by having liability insurance as specified in this paragraph.

(i) Each insurance policy amended by attachment of the Hazardous Waste Pacility Liability En-dorsement or evidenced by a Certifi-cate of Liability Insurance. The wording of the endorsement must be identical to the wording specified in § 264.151(i). The wording of the certifiate of insurance must be identical to the wording specified in § 264.151(j). The owner or operator must submit a signed duplicate original of the endorsement or the certificate of insurance to the Regional Administrator, or Regional Administrators if the facilities are located in more than one Region. If requested by a Regional Administrator, the owner or operator must provide a signed duplicate origi-nal of the insurance policy. An owner or operator of a new facility must submit the signed duplicate original of the Hazardous Waste Pacility Liability Endorsement or the Certificate of Liability Insurance to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for treatment, storage, or disposal. The insurance must be effective before this initial receipt of hazardous waste.

(ii) Each insurance policy must be issued by an insurer which, at a mininum, is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States.

[264.147(a)(2) and (3) amended by 51 FR 25354, July 11, 1986]

[Interim Final]

(2) An owner or operator may meet the requirements of this section by passing a financial test for liability coverage as specified in paragraph (f) of this section.

(3) An owner or operator may demonstrate the required liability coverage through use of both the financial test and insurance as these mechanisms are specified in this section. The amounts of coverage demonstrated must total at least the minimum amounts required by this paragraph.

(b) Coverage for nonsudden uccidentol occurrences. An owner or operator of a surface impoundment, lanc fill. land treatment facility, or miscellaneous disposal unit that is used to manage hazardous waste, or a group of such facilities, must demonstrate financial responsibility for bodily injury and property damage to third parties caused by nonsudden accidental occurrences arising from operations of the facility or group of facilities. The owner or operator must have and maintain liability coverage for nonsudden accidental occurrences in the amount of at least \$3 million per occurrence with an annual aggregate of at least \$6 million, exclusive of legal defense costs. This liability coverage may be demonstrated in one of three ways, as specified in paragraphs (bX1), (bX2), and (bX3) of this section:

[264.147[b] introductory text amended by 52 FR 46963, December 10, 1987]

(1) An owner or operator may demonstrate the required liability coverage by having liability insurance as specified in this paragraph.

(i) Each insurance policy must be amended by attachment of the Hazardous Waste Pacility Liability En-dorsement or evidenced by a Certifi-cate of Liability Insurance. The wording of the endorsement must be identical to the wording specified in § 264.151(i). The wording of the certificate of insurance must be identical to the wording specified in § 264.151(j). The owner or operator must submit a signed duplicate original of the endorsement or the certificate of insurance to the Regional Administrator, or Regional Administrators if the facilities are located in more than one Region. If requested by a Regional Administrator, the owner or operator must provide a signed duplicate original of the insurance policy. An owner or operator of a new facility must submit the signed duplicate original of the Hazardous Waste Facility Liability Endorsement or the Certificate of Liability Insurance to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for treatment, storage, or disposal. The insurance must be effective before this initial receipt of hazardous waste.

(ii) Each insurance policy must be issued by an insurer which, at a minimum, is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States.

{264.147(b)(2) and (3) amended by 51 FR 25354, July 11, 1986}

[Interim Final]

- (2) An owner or operator may meet the requirements of this section by passing a financial test for liability coverage as specified in paragraph (f) of this section.
- (3) An owner or operator may demonstrate the required liability coverage through use of both the financial test and insurance as these mechanisms are specified in this section. The amounts of coverage must total at least the minimum amounts required by this paragraph.
- (4) For existing facilities, the required liability coverage for nonsudden accidental occurrences must be demonstrated by the dates listed below. The total sales or revenues of the owner or operator in all lines of the owner or operator in all lines of business, in the fiscal year preceding the effective date of these regulations, will determine which of the dates applies. If the owner and operator of a facility are two different parties, or if there is more than one owner or operator, the sales or revenues of the owner or operator with the largest sales or revenues will determine the date by which the coverage must be demonstrated. The dates are as follows:
- (i) For an owner or operator with sales or revenues totalling \$10 million or more, 6 months after the effective date of these regulations.
- (ii) For an owner or operator with sales or revenues greater than \$5 million but less than \$10 million, 18 months after the effective date of these regulations.

(iii) All other owners or operators, 30 months after the effective date of these regulations.

(c) Request for variance. If an owner or operator can demonstrate to the satisfaction of the Regional Administrator that the levels of financial responsibility required by paragraph (a) or (b) of this section are not consistent with the degree and duration of risk associated with treatment, storage, or disposal at the facility or group of facilities, the owner or operator may obtain a variance from the Regional Administrator. The request for a variance must be submitted to the Regional Administrator as part of the appli-cation under § 270.14 of this chapter for a facility that does not have a permit, or pursuant to the procedures for permit modification under § 124.5 of this chapter for a facility that has a permit. If granted, the variance will take the form of an adjusted level of required liability coverage, such level to be based on the Regional Adminis trator's assessment of the degree and duration of risk associated with the ownership or operation of the facility or group of facilities. The Regional Administrator may require an owner or operator who requests a variance to provide such technical and engineering information as is deemed necessary by the Regional Administrator to determine a level of financial responsibility other than that required by paragraph (a) or (b) of this section. Any request for a variance for a permitted facility will be treated as a request for a permit modification under §§ 270.41(a)(5) and 124.5 of this chap-

(d) Adhusiments by the Regional Administrator. If the Regional Administrator determines that the levels of financial responsibility required by paragraph (a) or (b) of this section are not consistent with the degree and duration of risk associated with treatment, storage, or disposal at the facility or group of facilities, the Regional Administrator may adjust the level of financial responsibility required under paragraph (a) or (b) of this section as may be necessary to protect human health and the environment. This adjusted level will be based on the Regional Administrator's assessment of the degree and duration of risk associated with the ownership or operation of the facility or group of facilities. In addition, if the Regional Administrator determines that there is a significant risk to human health and the environment from nonsudden accidental occurrences resulting from the operations of a facility that is not a surface impoundment, landfill, or land treat-

ment facility, he may require that an owner or operator of the facility comply with paragraph (b) of this section. An owner or operator must furnish to the Regional Administrator, within a reasonable time, any information which the Regional Administrator requests to determine whether cause exists for such adjustments of level or type of coverage. Any adjustment of the level or type of coverage for a facility that has a permit will be treated as a permit will be treated as a permit modification under §§ 270.41(a)(5) and 124.5 of this chapter.

- (e) Period of coweage. Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that final closure has been completed in accordance with the approved closure plan, the Regional Administrator will notify the owner or operator in writing that he is no longer required by this Section to maintain liability coverage for that facility, unless the Regional Administrator has reason to believe that closure has not been in accordance with the approved closure plan.
- [264.147(e) revised by 51 FR 16443, May 2, 1986]
- (f) Financial test for liability coverage. (i) An owner or operator may satisfy the requirements of this section by demonstrating that he passes a financial test as specified in this paragraph. To pass this test the owner or operator must meet the criteria of paragraph (f)(1)(1) or f(1)(1)(1).
- (i) The owner or operator must have:
 (A) Net working capital and tangible net worth each at least six times the amount of liability coverage to be demonstrated by this test; and
- (B) Tangible net worth of at least \$10 million; and
- (C) Assets in the United States amounting to either: (1) at least 90 percent of his total assets; or (2) at least six times the amount of liability coverage to be demonstrated by this test.
- (ii) The owner or operator must have:
- (A) A current rating for his most recent bond issuance of AAA, AA, A, or BBB as issued by Standard and Poor's, or Aaa, Aa, A, or Baa as issued by Moody's; and
- (B) Tangible net worth of at least \$10 million; and

- (C) Tangible net worth at least six times the amount of liability coverage to be demonstrated by this test; and
- (D) Assets in the United States amounting to either (1) at least 90 percent of his total assets, or (2) at least six times the amount of liability coverage to be demonstrated by this test.
- (2) The phrase "amount of liability coverage" as used in paragraph (f)(1) of this section refers to the annual aggregate amounts for which coverage is required under paragraphs (a) and (b) of this section.
- (3) To demonstrate that he meets this test, the owner or operator must submit the following three items to the Regional Administrator:
- (i) A letter sigmed by the owner's or operator's chief (financial officer and worded as specified in \$284.151g. If an owner or operator is using the financial test to demonstrate both assurance for closure or post-closure care, as specified by \$1264.143(f), 263.145(f), 263.145(f), and liability coverage, he must submit the letter specified in \$284.151(g) to over both forms of financial responsibility; a separate letter as specified in \$24.151(f) to financial responsibility is separate letter.
- (ii) A copy of the independent certified public accountant's report on examination of the owner's or operator's financial statements for the latest completed fiscal year.
- (iii) A special report from the owner's or operator's independent certified public accountant to the owner or operator stating that:
- (A) He has compared the data which the letter from the chief financial officer specifies as having been derived from the independently audited, yearend financial statements for the latest fiscal year with the amounts in such financial statements; and
- (B) In connection with that procedure, no matters came to his attention which caused him to believe that the specified data should be adjusted.
- (4) An owner or operator of a new facility must submit the items specified in paragraph (1/3) of this section to the Regional Administrator at least 60 days before the date on which hazardous waste is first received for trestment, storage, or disposal.
- (5) After the initial submission of items specified in paragraph (f/3) of this section, the owner or operator must send updated information to the

145

Regional Administrator within 90 days after the close of each succeeding fiscal year. This information must consist of all three items specified in paragraph (fX3) of this section.

- (6) If the owner or operator no longer meets the requirements of paragraph (f/X1) of this section, he must obtain insurance for the entire amount of required liability coverage as specified in this section. Evidence of insurance must be submitted to the Regional Administrator within 90 days after the end of the fiscal year for which the year-end financial data show that the owner or operator no longer meets the test requirements.
- (7) The Regional Administrator may disallow use of this test on the basis of qualifications in the opinion expressed by the independent certified public accountant in his report on examination of the owner's or operator's financial statements (see paragraph (f/3Xiii) of this section). An adverse opinion or a disclaimer of opinion will be cause for disallowance. The Regional Administrator will evaluate other qualifications on an individual basis. The owner or operator must provide evidence of insurance for the entire amount of required liability coverage as specified in this section within 30 days after notification of disallowance.

[New 264.147(g) added by 51 FR 25354, July 11, 1986]

- (g) Corporate guarantee for liability coverage.
- (1) Subject to subparagraph (2), an owner or operator may meet the requirements of this section by obtaining a written guarantee, hereinafter referred to as "corporate guarantee." The guarantor must be the parent corporation of the owner or operator. The guarantee must meet the requirements for owners or operators in paragraphs (f)(1) through (7) of this section. The wording of the corporate guarantee must be identical to the wording specified in \$264 151(h)(2). A certified copy of the corporate guarantee must accompany the items sent to the Regional Administrator as specified in paragraph (f)(3) of this section. The terms of the corporate guarantee must provide that:
- (i) If the owner or operator fails to satisfy a judgment based on a determination of liability for bodily injury or property damage to third parties caused by sudden or nonsudden accidental occurrences

(or both as the case may be), arising from the operation of facilities cowered by this corporate guarantee, or fails to pay an amount agreed to in settlement of claims arising from or alleged to arise from such injury or damage, the guarantor will do so up to the limits of coverage.

- (ii) The corporate guarantee will remain in force unless the guarantor sends notice of cancellation by certified mail to the owner or operator and to the Regional Administrator(s). This guarantee may not be terminated unless and until the EPA Regional Administrator(s) approve(s) alternate liability coverage complying with section 264.147 and/or 265.147.
- (2)(i) In the case of corporations incorporated in the United States, a corporate guarantee may be used to satisfy the requirements of this section only if the Attorneys General or Insurance Commissioners of (A) the State in which the guarantor is incorporated, and (B) each State in which a facility covered by the guarantee is located have submitted a written statement to EPA that a corporate guarantee executed as described in this section and is 284.131(h)(2) is a legally valid and enforceable obligation to that State.

(ii) In the case of corporations incorporated outside the United States. a corporate guarantee may be used to satisfy the requirements of this section only if (A) the non-U.S. corporation has identified a registered agent for service of process in each State in which a facility covered by the guarantee is located and in the State in which it has Its principal place of business, and (B) the Attorney General or Insurance Commissioner of each State in which a facility covered by the guarantee is located and the State in which the guarantor corporation has its principal place of business, has submitted a written statement to EPA that a corporate guarantee executed as described in this section and § 264.151(h)(2) is a legally valid and enferceable obligation in that State.

- [264.147(g)(2) revised by 52 FR 44320, November 18, 1987]
- (h) Notwithstanding any other provision of this part, an owner or operator using liability insurance to satisfy the requirements of this section may use, until October 16, 1982, a Hazardous Waste

Facility Liability Endorsement or Certificate of Liability Insurance that does not certify that the insurer is licensed to transact the business of insurance, or eligible as an excess or surplus lines insurer, in one or more States.

[Former 264.147 (g) redesignated as (h) by 51 FR 25354, July 11, 1986]

(Approved by the Office of Management and Budget under control number 2000-0445, for paragraphs (skiki), (bkiki), (c), (d), and (fX3) through (6).

\$264.148 Incapacity of owners or operators, guarantors, or financial institutions.

- (a) An owner or operator must notify the Regional Administrator by certified mail of the commencement of a voluntary or involuntary proceeding under Title 11 (Bankruptcy). U.S. Code, naming the owner or operator as debtor, within 10 days after commencement of the proceeding. A guarantor of a corporate guarantee as specified in §1264.143(f) and 264.145(f) must make such a notification if he is named as debtor, as required under the terms of the corporate guarantee (4 264.15(h)).
- th) An owner or operator who fulfills the requirements of \$284.143, \$284.145, or \$284.147 by obtaining a trust fund, surety bond, letter of credit, or insurance policy will be deemed to be without the required financial assurance or lisbility coverage in the event of bankruptcy of the trustee or issuling institution, or a suspension or revocation of the authority of the trustee institution to act as trustee or of the institution issuing the surety bond, letter of credit, or instruments. The owner or operator must establish other financial assurance or liability coverage within 80 days after such an event.

264.149 Use of State-required mecha-

(a) For a facility located in a State where EPA is administering the requirements of this Subpart but where the State has hazardous waste regulations that include requirements for financial assurance of closure or postclosure care or liability coverage, an owner or operator may use State-reowner or operator may use State-reguired financial mechanisms to meet 1 264.143 the requirements of § 264.143, § 264.145, or § 264.147, if the Regional Administrator determines that the State mechanisms are at least equivalent to the financial mechanism specified in this Subpart. The Regional Administrator will evaluate the equivaiency of the mechanisms principally in terms of (1) certainty of the availability of funds for the required closure or post-closure care activities or liability coverage and (2) the amount of funds that will be made available. The Regional Administrator may also consider other factors as he deems appropri-The owner or operator submit to the Regional Administrator evidence of the establishment of the mechanism together with a letter re questing that the State-required mechanism be considered acceptable for meeting the requirements of this Subpart. The submission must include the following information: The facility's EPA Identification Number, name, and address, and the amount of funds for closure or post-closure care or liability coverage assured by the mechanism. The Regional Administrator will notify the owner or operator of his determination regarding the mechanism's acceptability in lieu of Iinancial mechanisms specified in this Subpart. The Regional Administrator may require the owner or operator to submit additional information as is deemed necessary to make this determination. Pending this determination, the owner or operator will be deemed to be in compliance with the requirements of \$ 264.143, \$ 264.145, or § 264.147, as applicable.

(b) If a State-required mechanism is found acceptable as specified in paragraph (a) of this section except for the amount of funds available, the owner or operator may satisfy the require-ments of this Subpart by increasing the funds available through the Staterequired mechanism or using additional financial mechanisms as specified in this Subpart. The amount of funds available through the State and Federal mechanisms must at least equal the amount required by this Subpart.

\$ 264,150 State assumption of responsibility.

(a) If a State either assumes legal responsibility for an owner's or operator's compliance with the closure. post-closure care, or liability requirements of this Part or assures that funds will be available from State sources to cover those requirements the owner or operator will be in compliance with the requirements of \$ 264.143, \$ 264.145, or \$ 264.147 if the Administrator determines Regional that the State's assumption of responsibility is at least equivalent to the financial mechanisms specified in this Subpart. The Regional Administrator will evaluate the equivalency of State guarantees principally in terms of (1) certainty of the availability of funds for the required closure or post-closure care activities or liability coverage and (2) the amount of funds that will be made available. The Regional Administrator may also consider other factors as he deems appropriate. The owner or operator must submit to the Regional Administrator a letter from the State describing the nature of the State's assumption of responsibility together with a letter from the owner or operator requesting that the State's assumption of responsibility be considered acceptable for meeting the requirements of this Subpart. The letter from the State must include, or have attached to it, the following information: the facility's EPA Identification Number, name, and address, and the amount of funds for closure or postclosure care or liability coverage that are guaranteed by the State. The Regional Administrator will notify the owner or operator of his determination regarding the acceptability of the State's guarantee in lieu of financia mechanisms specified in this Subpart. The Regional Administrator may require the owner or operator to aubmit additional information as is deemed necessary to make this determination. Pending this determination, the owner or operator will be deemed to be in compliance with the requirements of \$ 264.143, \$ 264.145, or \$ 264.147, as applicable.

(b) If a State's assumption of responaibility is found acceptable as specified in paragraph (a) of this section except for the amount of funds available, the owner or operator may satisfy the requirements of this Subpart by use of both the State's assurance and additional financial mechanisms as specified in this Subpart. The amount of funds available through the State and Federal mechanisms must at least equal the amount required by this Subpart.

264.151 Wording of the instruments.

(aX1) A trust agreement for a trust fund, as specified in § 264.143(a) or § 264.145(a) or § 265.143(a) or § 265.145(a) of this chapter, must be worded as follows, except that instruc-tions in brackets are to be replaced with the relevant information and the brackets deleted:

TRUST AGREDMENT

Trust Agreement, the "Agreement," entered into as of (date) by and between [name of the owner or operator), a [name of State] [insert "corporation," "partnership," "association," or "proprietorship"], the Grantor," and [name of corporate trustee]. linsert "incorporated in the State of -

Insert "incorporated in the close of "
a national bank", the "Trustee,"
Whereas, the United States Environmental Protection Agency, "EPA," an agency of
the United States Government, has established certain regulations applicable to the Grantor, requiring that an owner or opera-tor of a hazardous waste management facility shall provide assurance that funds will be e when needed for closure and/or post-closure care of the facility,

Whereas, the Grantor has elected to es-tablish a trust to provide all or part of such financial assurance for the facilities identi-

Whereas, the Grantor, acting through its duly authorised officers, has selected the Trustee to be the trustee under this agree-ment, and the Trustee is willing to set as

trustee, Now, Therefore, the Grantor and the rustee agree as follows.
Section 1. Definitions. As used in this

Agreement (a) The term "Grantor" means the owner or operator who enters into this Agreement

(b) The term "Trustee" means the Trust-ee who enters into this Agreement and any successor Trustee.

Section 2. Identification of Facilities and Cost Estimates. This Agreement pertains to the facilities and cost estimates identified on attached Schedule A (on Schedule A, for each facility list the EPA Identification Number, name, address, and the current clo-aure and/or post-closure cost estimates, or portions thereof, for which financial assur-ance is demonstrated by this Agreement). Section 3. Establishment of Fund. The

Orantor and the Trustee hereby establish a trust fund, the "Fund," for the benefit of EPA. The Grantor and the Trustee intend that no third party have access to the Fund

except as herein provided. The Pund is established initially as consisting of the property, which is acceptable to the Trustee, described in Schedule B attached hereto, Such property and any other property subse-quently transferred to the Trustee is re-ferred to as the Pund, together with all earnings and profits thereon, less any payments or distributions made by the Trustee pursuant to this Agreement. The Pund shall be held by the Trustee. IN TRUST, as hereor neid by the Irustee. IN IRUST, as here inalter provided. The Trustee shall not be responsible nor shall it undertake any re-sponsibility for the amount or adequacy of, nor any duty to collect from the Grantor, any payments necessary to discharge any li-abilities of the Grantor established by EPA.

Section 4. Payment for Closure and Post-Closure Care. The Trustee shall make pay-Clossre Care. The Trustee shall make pay-ments from the Fund as the EPA Regional Administrator shall direct, in writing, to provide for the payment of the costs of clo-sure and/or post-closure care of the facili-ties covered by this Agreement. The Trustee shall reimburse the Grantor or other per-sons as specified by the EPA Regional Ad-ministrator from the Fund for closure and post-closure expenditures in such amounts. post-closure expenditures in such amounts as the EPA Regional Administrator shall direct in writing. In addition, the Trustee ahall refund to the Grantor such amounts as the EPA Regional Administrator specifies in writing. Upon refund, such funds shall no longer constitute part of the Pund as defined berein.

Section 5. Payments Comprising the Fund. Payments made to the Trustee for the Fund shall consist of cash or securities acceptable to the Trustee.

Section 6. Trustee Menagement. The Trustee shall invest and reinvest the principal and income of the Pund and keep the pal and income of the Pund and keep the Pund invested as a single fund, without dis-tinction between principal and income, in accordance with general investment policies and guidelines which the Grantor may com-municate in writing to the Trustee from time to time, subject, however, to the provi-sions of this Section. In investing, reinvesting, exchanging, selling, and managing the Fund, the Trustee shall discharge his duties with respect to the trust fund solely in the interest of the beneficiary and with the care, skill, prudence, and diligence under the circumstances then prevailing which persons of prudence, acting in a like capacity and familiar with such se in the conduct of an enterprise of a like character and with like alms; except that:

ecurities or other obligations of the Grantor, or any other owner or operator of Orantor, or any other owner or operator of the facilities, or any of their affiliates as de-fined in the Investment Company Act of 1840, as amended, 18 U.S.C. 80a-2.(a), shall not be acquired or held, unless they are serurities or other obligations of the Pederal or a State government.

(ii) The Trustee is authorized to invest the Pund in time or demand deposits of the Trustee, to the extent insured by an agency

of the Pederal or State government; and (iii) The Trustee is authorized to hold cash awaiting investment or distribution uninvested for a reasonable time and without liability for the payment of interest there-

Section 7. Commingling and Investmen The Trustee is expressly authorized in its discretion:

(a) To transer from time to time any or all of the assets of the Pund to any common, commingled, or collective trust fund created by the Trustee in which the Fund is eligible to participate, subject to all of the provi-sions thereof, to be commingled with the amets of other trusts participating therein

tb) To purchase shares in any investment company registered under the Investment Company Act of 1940, 15 U.S.C. 80a-1 et seq., including one which may be created, managed, underwritten, or to which investment advice is rendered or the shares of which are sold by the Trustee. The Trustee may vote such shares in its discretion. Section 8. Express Powers of Trustee Without in any way limiting the powers and discretional conferred upon the Trustee by the other provisions of this Agreement oby law, the Trustee is expressly authorized and empowered: tb) To purchase shares in any investment

nd empowered:
(a) To sell, exchange, convey, transfer, or otherwise dispose of any property held by it, by public or private sale. No person dealing with the Trustee shall be bound to see to the application of the purchase money or to inquire into the validity or expediency of any such sale or other disposition;

(b) To make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any and all other in-struments that may be necessary or approprinte to carry out the powers herein grant-

(c) To register any securities held in the Pund in its own name or in the name of a nominee and to hold any security in bearer form or in book entry, or to combine certifitorm of in book entry, or to combine certain-castes representing such securities with cer-tificates of the same issue held by the Trustee in other fiduciary capacities, or to deposit or arrange for the deposit of such securities in a qualified central depositary even though, when so deposited, such securities may be merged and held in bulk in the name of the nominee of such depositary with other securities deposited therein another person, or to deposite therein by another person, or to deposit or arrange for the deposit of any securities issued by the United States Government, or any agency or instrumentality thereof, with a Pederal Reserve bank, but the books and records the Trustee shall at all times show that all such securities are part of the Fund;

(d) To deposit any cash in the Fund in interest-bearing accounts maintained or sav-ings certificates issued by the Trustee, in its separate corporate capacity, or in any other banking institution affiliated with the Trustee to the estent insured by an agency of the Pederal or State government; and

(e) To compromise or otherwise adjust all claims in favor of or against the Fund

elaims in favor of or against the Fund Section 9. Taxes and Expenses. All taxes of any kind that may be assessed or levied against or in respect of the Fund and all brokerage commissions incurred by the Fund shall be paid from the Fund. All other Pund shall be paid from the runo. All other expenses incurred by the Trustee in connection with the administration of this Trust, including fees for legal services rendered to the Trustee, the compensation of the Trust-ee to the extent not paid directly by the Orantor, and all other proper charges and disbursements of the Trustee shall be paid from the Pund

Section 10. Annual Valuation. The Trustee shall annually, at least 30 days prior to the anniversary date of establishment of the Pund, furnish to the Grantor and to the appropriate EPA Regional Administrator a appropriate LPA Regional Administrator a statement confirming the value of the Trust. Any securities in the Fund shall be valued at market value as of no more than 60 days prior to the anniversary date of establishment of the Pund. The failure of the Grantor to object in writing to the Trustee within 90 days after the statement has been furnished to the Grantor and the EPA Regional Administrator shall constitute a congional Administrator shall constitute a con-clusively binding assent by the Grantor, barring the Grantor from asserting any claim or liability against the Trustee with respect to matters disclosed in the state-

Section 11. Advice of Counsel. The Trust-ce may from time to time consult with coun-sel, who may be counsel to the Grantor. with respect to any question arising as to the construction of this Agreement or any action to be taken hereunder. The Trustee shall be fully protected, to the extent permitted by law, in acting upon the advice of counse)

Section 12. Trustee Compensation. The Trustee shall be entitled to reasonable com-pensation for its services as agreed upon in writing from time to time with the Grantor

Section 13. Successor Trustee. The Trustee Section 13. Successor Trustee. The Trustee may resign or the Orantor may replace the Trustee, but such resignation or replacement shall not be effective until the Grantor, has appointed a successor trustee and or has appointed a successor trustee and this successor accepts the appointment. The successor trustee shall have the same powers and duties as those conferred upon the Trustee hereunder. Upon the successor trustee's acceptance of the appointment. the Trustee shall assign, transfer, and pay over to the successor trustee the funds and properties then constituting the Fund. If for any reason the Grantor cannot or does not act in the event of the resignation of the Trustee, the Trustee may apply to a court of competent jurisdiction for the appointment of a successor trustee or for in structions. The successor trustee shall speci fy the date on which it assumes administra-tion of the trust in a writing sent to the Grantor, the EPA Regional Administrator. and the present Trustee by certified mail 10

days before such change becomes effective. Any expenses incurred by the Trustee as a result of any of the acts contemplated by this Section shall be paid as provided in Sec-

Section 14. Instructions to the Trustee, All Section 14. Instructions to the Trustee. All orders, requests, and instructions by the Grantor to the irrustee shall be in writing, signed by such persons as are designated in the attached Exhibit A or such other designated. s as the Grantor may designate by indment to Exhibit A. The Trustee shall be fully protected in acting without inquiry in accordance with the Grantor's orders, requests, and instructions. All orders, requests, and instructions by the EPA Regional Administrator to the Trustee shall be in writing, signed by the EPA Regional Administration of the Bestings in which the Gasilians of the Bestings in which the Gasilians. istrators of the Regions in which the facili-ties are located, or their designees, and the Trustee shall act and shall be fully protected in acting in accordance with such orders, requests, and instructions. The Trustee shall have the right to assume, in the ab-sence of written notice to the contrary, that sence of written notice to the contrary, that me event constituting a change or a termination of the authority of any person to act on behalf of the Orantor or EPA hereunder has occurred The Trustee shall have no district the contract of much orders, to most of the contract of the cont

Trustee shall notify the Grantor and the appropriate EPA Regional Administrator, by certified mail within 10 days following the expiration of the 30-day period after the anniversary of the establishment of the Trust, if no payment is received from the Grantor during that period After the pay-in period is completed, the Trustee shall not

be required to send a notice of nonpayment.

Section 18. Amendment of Agreement. This Section 18. Amendment of Agreement. This Agreement may be amended by an instrument in writing executed by the Grantor, the Trustee and the appropriate EPA Regional Administrator, or by the Trustee and the appropriate EPA Regional Administrator if the Grantor resues to exist.

Section 17. Irrevocability and Termination Subject to the night of the parties to amend this Agreement as provided in Section 16. this Trust shall be irrevocable and shall continue until terminated at the writing and the provided of the section 16.

shall continue until terminated at the writ-ten agreement of the Grantor, the Trustee, and the EPA Regional Administrator, or by and the EFA regional Administrator, or by the Trustee and the EPA Regional Adminis-trator, if the Grantor ceases to exist. Upon termination of the Trust, all remaining trust property, less final trust administra-tion eapenaes, shall be delivered to the

Section 14. Immunity and Indemnifica-ion. The Trustee shall not incur personal liability of any nature in connection with any act or omission, made in good faith, in the administration of this Trust, or in carrying out any directions by the Grantor or the EPA Regional Administrator issued in accordance with this Agreement. The Trustee shall be indemnified and saved harmless by the Grantor or from the Trust Pund, or both, from and against any personal liabil-ity to which the Trustee may be subjected reason of any act or conduct in its official capacity, including all expenses reasonably incurred in its defense in the event the Grantor fails to provide such defense.

Section 19. Choice of Law. This Agreement shall be administered, construed, and enforced according to the lass of the State of finsert name of State).

Section 20. Interpretation. As used in this Agreement, words in the singular include the plural and words in the plural include the plural and words in the plural include the singular. The descriptive headings for each Section of this Agreement shall not affect the interpretation or the legal effica-cy of this Agreement. In Witness Whereof the parties have caused this Agreement to be executed by their respective officers odly suthorized and

their corporate seals to be hereunto affixed and attested as of the date first above writand attested as of the date first above writ-ten: The parties below certify that the wording of this Agreement is identical to the wording specified in 40 CFR 264.151(ax1) as such regulations were con-stituted on the date first above written.

[Title], Authorised Representative of [name of Insurer]

[Address of Representative]

(Approved by the Office of Management and Budget under control number 2000-0445, for paragraphs (g), (l), and (j).)

Subpart I—Use and Management of Containers

\$ 264.170 Applicability.

The regulations in this Subpart apply to owners and operators of all

hazardous waste facilities that store containers of hazardous waste, except as § 264.1 provides otherwise.

(Comment: Under 1 281.7 and 1 281.3 2(c.), it is hazardous waste to emptide from a container the residue remaining in the container the residue remaining in the container is not considered a hazardous waste if the container is "empty" as defined in 1 281.7 in that event, management of the con, and the sempt from the requirements o, this Subpart.1

\$284.171 Condition of containers.

If a container holding hazardous waste is not in good condition (e.g., severe rusting, apparent structural defects) or if it begins to leak, the owner or operator must transfer the hazardous waste from this container to a container that is in good condition or manage the waste in some other way that complies with the requirements of this part.

\$264.172 Compatibility of waste with containers.

The owner or operator must use a container made of or lined with materials which will not react with, and are otherwise compatible with, the hazardous waste to be stored, so that the ability of the container to contain the waste is not impaired.

\$264.172 Management of containers.

- (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.
- (b) A container holding hazardous waste must not be opened, handled, or atored in a manner which may rupture the container or cause it to leak.

[Comment: Reuse of containers in transportation is governed by U.S. Department of Transportation regulations including those set forth in 49 CFR 173.28.1

8 264.174 Inspections.

At least weekly, the owner or operator must inspect areas where containers are stored, looking for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.

[Comment: See §§ 264.15(c) and 264.17) for remedial action required if deterioration or leaks are detected.]

[Sec. 264.174]

§§ 264.284-264.299 [Reserved]

Subpart N-Landfills

(Subpart N added by 47 FR 32349, July 26, 1982, effective January, 26, 1983)

§ 264.300 Appliosbility.

The regulations in this subpart apply to owners and operators of facilities that dispose of hazardous waste in landfills, except as \$ 204.1 provides otherwise.

§ 254.301 Design and operating

(e) Any landfill that is not covered by paragraph (c) of this section or \$ 265.30(1e) of this chapter must have a liner system for all portions of the landfill (except for existing portions of such landfill). The liner system must have:

[264.301(a) introductory paragraph revised by 50 FR 28742, July 15, 1985]

- (1) A liner that is designed. constructed, and installed to prevent any migration of westee out of the landfill to the adjective sources sail or ground weter or curface water at anytime during the active life (including the closure period) of the landfill. The liner must be constructed of materials that prevent waters from passing into the liner during the active life of the facility. The liner must be:
- (i) Constructed of materials that have appropriate chemical properties and sufficient etrength and thickness to prevent failure due to pressure gredients (including stetic head and external hydrogeologic forces), physical contact with the wests or leachete to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(ii) Plazed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift and

(iii) Instelled to cover all surrounding earth likely to be in contact with the waste or leachate; and (2) A leachate collection and removal

(2) A leschate collection and removal system immediately above the liner that is designed, constructed, maintained, and operated to collect and remove leachate from the landfill. The Regional Administrator will specify design and operating conditions in the permit to ensure that the leachate depth over the thier does not exceed 30 cm (one foot). The leachate collection and removal system must be:

(i) Constructed of meterials that ara:
(A) Chemically resistant to the waste managed in the landfill and the leachate expected to be generated; and

(B) Of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying westes, waste cover materials, and by any souipment used at the landfill; and

(ii) Designed and operated to function without clogging through the scheduled closure of the landfill.

- (b) The owner or operator will be exempted from the requirements of paragraph (a) of this section if the Regional Administrator finds, based on a demonstration by the owner or operator, that alternative design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents (see § 204.53) into the ground water or surface water at any future time. In deciding whether to grant an exemption, the Regional Administrator will consider.
- (1) The nature and quantity of the wastes:
- (2) The proposed alternate design and operation;
- (3) The hydrogeologic setting of the facility, including the attenuative capacity and thickness of the liners and soils present between the landfill and ground water or surface water, and
- (4) All other factors which would influence the quality and mobility of the leachete produced and the potential for it to migrate to ground water or surface water.

(New 264.301(c)—(e) added by 50 FR 28742, July 15, 1985)

(c) The owner or operator of each new landfill, each new landfill unit at an existing facility, each replacement of an existing landfill unit, and each lateral expansion of an existing landfill unit, must install two or more liners and a leachate collection eyetem above and between the liners. The liners and leachate collection systems must protect human health and the environment. The requirement for the installation of two or more liners in this paragraph may be satisfied by the installation of a top liner designed, operated and constructed of materials to prevent the migration of any constituent into such liner during the period euch facility remains in operation (including any post-closure monitoring period), and a lower liner designed, operated, and constructed to prevent the migration of any constituent through such liner during such period. For the purpose of the preceding santence, a lower liner shall be deemed

to settisfy such requirement if it is constructed of at least a 3-foot thick layer of recompected clay or other natural material with a permeability of no more than 1×10⁻⁷ centimeter per second.

(d) Paragraph (c) of this section will not apply if the owner or operator demonstrates to the Regional Administrator, and the Regional Administrator finds for euch landfill, that alternative design and operating practices, together with location characteristics, will prevent the migration of any bazardous constituent into the ground water or eurface water at leset as effectively as such there and leachets collection systems.

(e) The double liner requirement set forth in paragraph (c) of this section may be waived by the Regional Administrator for any monofill, if:

(1) The monofill contains only hazardous wastes from foundry furnece emission controls or metal casting molding sand, and such wastes do not contain constituents which would render the wastes hazardous for reasons other than the EP toxicity characteristics in § 261.24 of this chapter, and

(2)(i)(A) The monofill has at least one liner for which there is no evidence that such liner is leaking:

(B) The monofill is located more than one-quarter mile from an underground source of drinking water (as that term is defined in § 144.3 of this chapter); and

(C) The monofill is in compliance with generally applicable ground-water monitoring requirements for facilities with permits under RCRA 3005(c); or (ii) The owner or operator

(ii) The owner or operator demonstrates that the monofill is located, designed and operated so as to assure that there will be no migration of any hazardous constituent into ground water or surface water at any future time.

(Former 264 301(c)—(g) redesignated as (f)—(j) by 50 FR 28742, July 15, 1985)

(f) The owner or operator must design, construct, operate, and meintain a run-op control system capable of preventing flow onto the active portion of the landfill during peak discharge from at least a 25-year storm.

(g) The owner or operator must design, construct, operats, and meintains a run-off management system to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(h) Collection and holding facilities (e.g., tanks or besins) suscitated with run-on and run-off control systems must be emptied or otherwise managed expeditiously after storms to meintain design capacity of the system.

[Sec. 264.301(h)]

175

- (i) If the landfill contains any particulate matter which may be subject to wind dispersal, the owner or operator must cover or otherwise manage the landfill to control wind dispersal.
- (j) The Regional Administrator will specify in the permit all design and operating practices that are necessary to ensure that the requirements of this section are satisfied.
- (b) Any permit under RCRA 3005(c) which is issued for a landfill located within the State of Alabama shall require the installation of two or more liners and a leachate collection system above and between such liners, notwithstanding any other provision of RCRA.

[264.301(k) added by 50 FR 28742, July 15, 1985]

(Approved by the Office of Management and Budget under control number 2050-0007)

[264.301 amended by 50 FR 4513, January 31, 1985]

§ 264.302. Double-fined landfills: Exemption from Sultpart F ground-water protection requirements. [Removed]

[264.302 removed by 50 FR 28742, July 15, 1985]

§264.303 Monitoring and inspection.

- (a) During construction or installation, liners (except in the case of existing portions of landfills exempt from \$264.301(a) and cover systems (e.g., membranes, sheets, or coatings) must be inspected for uniformity, damage, and imperfections (e.g., holes, cracks, thin spots, or foreign materials). Immediately after construction or installation.
- Synthetic liners and covers must be inspected to ensure tight seams and joints and the absence of tears, punctures, or blisters; and
- (2) Soil-based and admixed liners and covers must be inspected for imperfections including lenses, cracks, channels, root holes, or other structural non-uniformities that may cause an increase in the permeability of the liner or cover.
- (b) While a landfill is in operation, it must be inspected weekly and after atorms to detect evidence of any of the following:
- (1) Deterioration, malfunctions, or improper operation of run-on and run-off control systems;

[Former 264.303(b)(2) removed and (3) and (4) redesignated as (2) and (3) by 50 FR 28742, July 15, 1985]

- (2) Proper functioning of wind dispersal control systems, where present; and (3) The presence of leachate in and
- (3) The presence of leachate in and proper functioning of leachate collection and removal systems, where present.

§§264.304-264.303 [Reserved]

§264.309 Surveying and recordkeeping.

The owner or operator of a landfil must maintain the following items in the operat-

- ing record required under \$264.73:
 (a) On a map, the exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks; and
- (b) The contents of each cell and the approximate location of each hazardous waste type within each cell.
- (Approved by the Office of Management and Budget under control number 2050-0007)

[264.309 amended by 50 FR 4513, January 31, 1985]

§264.310 Closure and post-closure care. (a) At final closure of the landfill or

- (a) At has closure of the isnonii or upon closure of any cell, the owner or operator must cover the landfill or cell with a final cover designed and constructed to:
- Provide long-term minimization of migration of liquids through the closed landfill;
- (2) Function with minimum maintenance;
- (3) Promote drainage and minimize erosion or abrasion of the cover;
- (4) Accommodate settling and subsidence so that the cover's integrity is maintained; and
- (5) Have a permeability less than or equal to the permeability of any bottom liner system or natural subsoils present.
- (b) After final closure, the owner or operator must comply with all post-closure requirements contained in §§264.117-264.120, including maintenance and monitoring throughout the post-closure care period (specified in the permit under £264.117). The owner or operator must:
- Maintain the integrity and effectiveness of the final cover, including making repairs to the cap as necessary to correct the effects of settling, subsidence, erosion, or other events;

[264.310(b)(2) removed and former (3)— (6) redesignated as (2)—(5) respectively by 50 FR 28742, July 15, 1985]

- (2) Continue to operate the leachate collection and removal system until leachate is no longer detected.
- (3) Maintain and monitor the groundwater monitoring system and comply with all other applicable requirements of Subpart F of this Part;
- (4) Prevent run-on and run-off from eroding or otherwise damaging the final cover; and
- (5) Protect and maintain surveyed benchmarks used in complying with §264.309.
- (c) During the post-closure care period, if liquid leaks into a leak detection system installed under \$264 302, the owner or operator must notify the Regional Administrator of the leak in writing within seven days after detecting the leak. The Regional Administrator will modify the permit to require compliance with the requirements of Subpart F of this Part.

§264.311 [Reserved]

§264.312 Special requirements for ignit- -able or reactive waste.

- (a) Except as provided in paragraph (b) of this section, and in §264.316, ignitable or reactive waste must not be placed in a landfill, unless the waste is treated, rendered, or mixed before or immediately after placement in a landfill so that:
- (1) The resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste under §§261.21 or 261.23 of this Chapter; and
- (2) Section 264.17(b) is complied with. (b) Ignitable wastes in containers may be landfilled without meeting the requirements of paragraph (a) of this section, provided that the wastes are disposed of in such a way that they are protected from any material or conditions which may cause them to ignite. At a minimum, ignitable wastes must be disposed of in nonleaking containers which are carefully handled and placed so as to avoid heat, sparks, rupture, or any other condition that might cause ignition of the wastes; must be covered daily with soil or other noncombustible material to minimize the potential for ignition of the wastes; and must not be disposed of in cells that contain or will contain or other wastes which may generate heat sufficient to cause ignition of the waste.

§264.313 Special requirements for incompatible wastes.

Incompatible wastes, or incompatible wastes and materials, (see Appendix V

[Sec. 264.313]

of this part for examples) must not be placed in the same landfill cell, unless §264.17(b) is complied with.

§264.314 Special requirements for bulk and containerized liquids.

[264.314 title emended by 50 FR 18374, April 30, 1985]

(a) Bulk or non-containerized liquid waste or waste containing free liquids may be placed in a landfill prior to May 8, 1985 only if:

[264.314(a) introductory test amended by 50 FR 28742, July 15, 1985]

(1) The landfill has a liner and leachate collection and removal system that meet the requirements of \$264.301(a); or

(2) Before disposal, the liquid waste or waste containing free liquids is treated or stabilized, chemically or physically (e.g., by mixing with an absorbent solid), so that free liquids are no longer present.

(b) Effective May 8, 1985, the placement of bulk or non-containerized liquid hazardous waste or hazardous waste containing free liquids (whether or not absorbents have been added) in any landfill is prohibited.

[New 264.314(b) added and former (b) redesignated as (d) by 50 FR 28742, July 15, 1985]

(c) To demonstrate the absence or presence of free liquids in either a containerized or a bulk waste, the following test must be used Method 9095 (Paint Filter Liquids Test) as described in "Test Methods for Evaluating Solid Wastes, Physical/Chemical Methods." [EPA Publication No. SW-846].

[264.314(c) edded by 50 FR 18374, Apri] 30, 1985] (d) Containers holding free liquids must

(d) Containers holding free liquids must not be placed in a landfill unless:

- (1) All free-standing liquid: (i) has been removed by decanting, or other methods; (ii) has been mixed with absorbent or solidified so that free-standing liquid is no longer observed; or (iii) has been otherwise eliminated; or
- (2) The container is very small, such as an ampule; or
- (3) The container is designed to hold free liquids for use other than storage, such as a battery or capacitor; or
- (4) The container is a lab pack as defined in \$264.316 and is disposed of in accordance with \$264.316.
- (e) Effective November 8, 1985, the placement of any liquid which is not a hazardous waste in a landfill is prohibited unless the owner or operator of such landfill demonstrates to the Regional Administrator, or the Regional Administrator determines that

(1) The only reasonably available alternative to the placement in such landfill is placement in a landfill or unlined surface impoundment, whether or not permitted or operating under interim status, which contains, or may reasonably be anticipated to contain, hazardous waste; and

(2) Placement in such owner or operator's landfill will not present a risk of contamination of any underground source of drinking water (as that term is defined in §144.3 of this chapter.)

(The reporting and recordkeeping requirements contained in this section were approved by OMB under control number 2050-0037.)

[264.314(e) and OMB No. added by 50 FR 28742, July 15, 1985]

§264.315 Special requirements for containers.

Unless they are very small, such as an ampule, containers must be either:

(a) At least 90 percent full when placed in the landfill; or

(b) Crushed, shredded, or similarly reduced in volume to the maximum practical extent before burial in the landfill.

§264.316 Disposal of small containers of bazardous waste in overpacked drums (lab macks).

Small containers of hazardous waste in overpacked drums (lab packs) may be placed in a landfill if the following requirements are met:

(a) Hazardous waste must be packaged in non-leaking inside containers. The inside containers must be of a design and constructed of a maternal that will not react dangerously with, be decomposed by, or be ignited by the contained waste. Inside containers must be tightly and securely sealed. The inside containers must be of the size and type specified in the Department of Transportation (DOT) hazardous materials regulations (49 CFR Parts 173, 178, and 179), if those regulations specify a particular inside container for the waste.

(b) The inside containers must be overpacked in an open head DOT-specification metal shipping container (49 CFR Perts 178 and 179) of no more than 416-liter (110 gallon) capacity and surrounded by, at a minimum, a sufficient quantity of absorbent material to completely absorb all of the liquid contents of the inside containers. The metal outer container must be full after packing with inside containers and absorbent material.

(c) The absorbent material used must not be capable of reacting dangerously with, being decomposed by, or being ignited by the contents of the inside containers in accordance with §264 17(b).

(d) Incompatible wastes, as defined in \$260.10 of this chapter, must not be

placed in the same outside container.

(c) Reactive wastes, other than cyanideor sulfide-bearing waste as defined in §261.23(a)(5) of this chapter, must be treated or rendered non-reactive prior to packaging in accordance with paragraphs (a) through (d) of this section. Cyanideanc sulfide-bearing reactive waste may be packed in accordance with paragraphs (a) this section without first being treated or rendered non-reactive.

§ 264.317 Special requirements for hazardous wastes FO20, FO21, FO22, FO23, FO26, and FO27.

[264.317 added by 50 FR 1999, January 14, 1985]

[a] Hazardous Wastes FOX0, FO21, FO22 FO23, FO26, and FO27 must not be placed in a landfill unless the owner or operator operates the landfill in accord with a management plan for these wastes that is approved by the Regional Administrator pursuant to the standards set out in this paragraph, and in accord with all other applicable requirements of this Part The factors to be considered are.

(1) The volume, physical, and chemical characteristics of the wastes, including their potential to migrate through the soil or to volatilize or escape into the atmosphere.

volunize or scape into the amosphere.

[2] The attenuative properties of underlying and surrounding soils or other materials,

[3] The mobilizing properties of other materials co-disposed with these wastes; and

terials co-disposed with these wastes; and (4) The affectiveness of additional treatment, design, or monitoring requirements (b) The Regional Administrator may determine that additional design, operating, and monitoring requirements are necessary.

termine that additional design, operating, and monitoring requirements are necessary for landfills managing hazardous wastes FO20, FO21, FO22, FO23, FO26, and FO27 in order to reduce the possibility of migration of these wastes to ground water, surface water, or air so as to protect human beaith and the environment.

§§ 264.318-264.338 [Raserved]

Subpart O-Incinerators

8 264.340 Applicability.

[264.340(a) revised by 50 FR 661, January 4, 1985]

(a) The regulations in this Subpart apply to owners or operators of facilities that incinerate hazardous waste, except as \$264.1 provides otherwise. The following facility owners or operators are considered to incinerate hazardous waste:

(1) Owners or operators of hazardous waste incinerators (as defined in §260.10 of this Chapter); and

(2) Owners or operators who burn hazardous waste in boilers or in industrial furnaces in order to destroy them, or who burn hazardous waste in boilers or in industrial furnaces for any recycling purpose and elect to be regulated under this subpart.

[264.340(a)(2) revised by 50 FR 49202, November 29, 1985]

[Bec. 264.340(a)(2)]
